A note about copyright

Dear Customer

What does the little © mean and why does it matter?

Your market-leading BPP books, course materials and e-learning materials do not write and update themselves. People write them: on their own behalf or as employees of an organisation that invests in this activity. Copyright law protects their livelihoods. It does so by creating rights over the use of the content.

Breach of copyright is a form of theft – as well being a criminal offence in some jurisdictions, it is potentially a serious breach of professional ethics.

With current technology, things might seem a bit hazy but, basically, without the express permission of BPP Learning Media:

- Photocopying our materials is a breach of copyright
- Scanning, ripcasting or conversion of our digital materials into different file formats, uploading them to Facebook or emailing them to your friends is a breach of copyright

You can, of course, sell your books, in the form in which you have bought them – once you have finished with them. (Is this fair to your fellow students? We update for a reason.) Please note the e-products are sold on a single user licence basis: we do not supply 'unlock' codes to people who have bought them secondhand.

And what about outside the UK? BPP Learning Media strives to make our materials available at prices students can afford by local printing arrangements, pricing policies and partnerships which are clearly listed on our website. A tiny minority ignore this and indulge in criminal activity by illegally photocopying our material or supporting organisations that do. If they act illegally and unethically in one area, can you really trust them?

Helping you with your revision

BPP Learning Media – ACCA Approved Content Provider

As an ACCA **Approved Content Provider**, BPP Learning Media gives you the **opportunity** to use revision materials reviewed by the ACCA examination team. By incorporating the ACCA examination team's comments and suggestions regarding the depth and breadth of syllabus coverage, the BPP Learning Media Practice & Revision Kit provides excellent, **ACCA-approved** support for your revision.

Selecting questions

We provide signposts to help you plan your revision.

- A full **question index**

Attempting mock exams

There are two mock exams that provide practice at coping with the pressures of the exam day. We strongly recommend that you attempt them under exam conditions. **Mock exam 1** is the Specimen Exam June 2014. **Mock exam 2** reflects the question styles and syllabus coverage of the exam.

Using your BPP Practice & Revision Kit

Aim of this Practice & Revision Kit

To provide the practice to help you succeed in the examination for *FAB Accountant in Business*. To pass the examination you need a thorough understanding in all areas covered by the syllabus and teaching guide.

Recommended approach

- Make sure you are able to answer questions on **everything** specified by the syllabus and teaching guide. You cannot make any assumptions about what questions may come up on your paper. The examination team aims to discourage 'question spotting'.
- Learning is an **active** process. Use the **DO YOU KNOW?** Checklists to test your knowledge and understanding of the topics covered in *FAB Accountant in Business* by filling in the blank spaces. Then check your answers against the **DID YOU KNOW?** Checklists. Do not attempt any questions if you are unable to fill in any of the blanks – go back to your **BPP Interactive Text** and revise first.
- When you are revising a topic, think about the mistakes that you know that you should avoid by writing down **POSSIBLE PITFALLS** at the end of each **DO YOU KNOW?** Checklist.
- Once you have completed the checklists successfully, you should attempt the questions on that topic. Each question is worth 1, 2 or 4 marks and carries with it a time allocation of 1.2 minutes per mark.
- You should attempt each bank of MCQs to ensure that you are familiar with their styles and to practise your technique. Ensure that you read **Tackling Multiple Choice Questions** on page xiii to get advice on how best to approach them.
- Once you have completed all of the questions in the body of this Practice & Revision Kit, you should attempt the **MOCK EXAMS** under examination conditions. Check your answers against our answers to find out how well you did.

Passing the FAB/F1 exam

FAB introduces students (who may not have a business background) to the business entity made up of people and systems which interact with each other. There is a lot to learn, but none of it is particularly difficult and a good grasp of these topics will help you in higher-level business papers (ACCA papers P1 and P3).

To access FIA and ACCA syllabuses, visit the ACCA website.

www.accaglobal.com

The exam

You can take this exam as a paper-based exam or by CBE. All questions in the exam are compulsory. This means you cannot avoid any topic, but also means that you do not need to waste time in the exam deciding which questions to attempt. There are 46 MCQs in the exam, worth either 1 or 2 marks, as well as 6 multiple task questions worth 4 marks each and a mixture of MCQs and other types of OTQ (number entry, multiple response and multiple response matching) in the CBE. This means that the examination team is able to test most of the syllabus at each sitting. So you need to have revised right across the syllabus for this exam.

Revision

This Kit has been reviewed by the FAB examining team and contains the Specimen exam. Working through the questions in the Kit provides excellent preparation for the exam. It is important to tackle questions under exam conditions. Allow yourself just the number of minutes shown next to the questions in the index and don't look at the answers until you have finished. For questions you answer incorrectly, think about your answer and the correct answer. If you require further clarification, refer to the explanation of the topic provided in your Interactive Text. Question practice is an essential part of your revision, don't neglect it!

Passing the exam

The following points will help you pass the exam.

- Read the question carefully.
- Don't spend more than the allotted time on each question. Don't become bogged down. If you are having trouble with a question, stop, think, decide on your best option and answer the question. Move on!

Approach to examining the syllabus

FAB is a two-hour paper. It can be taken as a paper based or a computer based examination.

The exam is structured as follows:

| | |
|---|--------------------------|
| 30 compulsory multiple choice questions of 2 marks each | <i>No of marks</i> 60 |
| 16 compulsory multiple choice questions of 1 mark each | 16 |
| 6 compulsory multiple task questions of 4 marks each | 24 |
| | <u>100</u> |

The Computer Based Examination

Computer based examinations (CBEs) are available for the first seven Foundation in Accountancy papers (not papers FAU, FTM or FFM), in addition to the conventional paper based examination.

Computer based examinations must be taken at an ACCA CBE Licensed Centre.

How does CBE work?

- Questions are displayed on a monitor
- Candidates enter their answer directly onto the computer
- Candidates have two hours to complete the examination
- When the candidate has completed their examination, the final percentage score is calculated and displayed on screen
- Candidates are provided with a Provisional Result Notification showing their results before leaving the examination room
- The CBE Licensed Centre uploads the results to the ACCA (as proof of the candidate's performance) within 72 hours
- Candidates can check their exam status on the ACCA website by logging into myACCA.

Benefits

- **Flexibility** as a CBE can be sat at any time.
- **Resits** can also be taken at any time and there is no restriction on the number of times a candidate can sit a CBE.
- **Instant feedback** as the computer displays the results at the end of the CBE.
- Results are notified to ACCA **within 72 hours**.

CBE question types

- Multiple choice – choose one answer from four options
- Number entry – key in a numerical response to a question
- Multiple response – select more than one response by clicking the appropriate tick boxes
- Multiple response matching – select a response to a number of related part questions by choosing one option from a number of drop down menus

For more information on computer-based exams, visit the ACCA website.

www.accaglobal.com/en/student/Exams/Computer-based-exams.html

Tackling Multiple Choice Questions

MCQs are part of all Foundations in Accountancy exams. You have to **choose the option that best answers the question**. The incorrect options are called distracters. There is a skill in answering MCQs quickly and correctly. By practising MCQs you can develop this skill, giving you a better chance of passing the exam.

You may wish to follow the approach outlined below, or you may prefer to adapt it.

Step 1 Skim read all the MCQs and identify what appear to be the easier questions.

Step 2 Attempt each question – **starting with the easier questions** identified in Step 1. Read the question **thoroughly**. You may prefer to work out the answer before looking at the options, or you may prefer to look at the options at the beginning. Adopt the method that works best for you.

Step 3 Read the options and see if one matches your own answer. Be careful with numerical questions as the distractors are designed to match answers that incorporate common errors. Check that your calculation is correct. Have you followed the requirement exactly? Have you included every stage of the calculation?

Step 4 You may find that none of the options matches your answer.

- Re-read the question to ensure that you understand it and are answering the requirement
- Eliminate any obviously wrong answers
- Consider which of the remaining answers is the most likely to be correct and select the option

Step 5 If you are still unsure make a note and continue to the next question

Step 6 Revisit unanswered questions. When you come back to a question after a break you often find you are able to answer it correctly straight away. If you are still unsure have a guess. You are not penalised for incorrect answers, so **never leave a question unanswered!**

After extensive practice and revision of MCQs, you may find that you recognise a question when you sit the exam. Be aware that the detail and/or requirement may be different. If the question seems familiar read the requirement and options carefully – do not assume that it is identical.

Using your BPP products

This Kit gives you the question practice and guidance you need in the exam. Our other products can also help you pass:

- **Interactive Text** introduces and explains the knowledge required for your exam
- **Passcards** provide you with clear topic summaries and exam tips
- **i-Pass CDs** offer tests of knowledge against the clock

You can purchase these products by visiting www.bpp.com/learningmedia.

Questions

Do you know? – The business organisation, its stakeholders and the external environment

Check that you can fill in the blanks in the statements below before you attempt any questions. If in doubt, you should go back to your BPP Interactive Text and revise first.

- Organisations can achieve results which **i.....** cannot achieve by themselves.
- A organisation (NGO) is an independent voluntary association of people acting together for some common purpose (other than achieving government office or making money).
- Stakeholders are those individuals or groups that, potentially, have an **interest** in what the organisation does. These stakeholders can be **w.....** the organisation, **c.....** to the organisation or external to the organisation.
- **G..... p.....** influences the economic environment, the framework of laws, industry structure and certain operational issues. Political **i.....** is a cause of risk.
- **P.....** is the right of the individual not to suffer unauthorised disclosure of information.
- A contract is a **l..... b.....** agreement.
- **O.....** is the contracting out of specified operations or services to an external vendor.
- The **v.... c.....** describes those activities of the organisation that add value to purchased inputs.
- The **c..... e.....** is structured by five forces: barriers **to entry**; **substitute products**; the bargaining power of **c.....**; the bargaining power of **suppliers**; **c..... rivalry**.
- Equilibrium **n..... i.....** is determined using aggregate supply and aggregate demand analysis.
- Demand pull **i.....** arises from an excess of aggregate demand over the productive capacity of the economy.
- **C.... p.... inflation** arises from increases in the costs of production.
- Economic may be measured by increases in the **real** gross national product (GNP) per head of the population.
- **Macroeconomic policy objectives** relate to economic growth, **i.....**, unemployment and the **b..... of p.....**
- If a government decides to use fiscal policy to influence demand in the economy, it can choose either **e.....** changes or **t..** changes as its policy instrument.
- **M..... p.....** uses money supply, interest rates or credit controls to influence **aggregate demand**.
- A surplus or deficit on the balance of payments usually means a **surplus or deficit on the c..... a.....**
- The **m..... e.....** refers to the immediate operational environment including suppliers, competitors, customers, stakeholders and intermediaries.
- Elasticity, in general, refers to the relationship between two variables. Price elasticity of demand explains the relationship between **change in q.....demanded** and **changes in p.....**
- **l..... e.....** of demand measures the responsiveness of demand to changes in household income. **C.....elasticity of demand** is determined by the availability of substitute (competitors') products.
- The effects of **demand and supply** conditions on markets can be analysed by studying the behaviour of both demand and supply **c.....**

Did you know? – The business organisation, its stakeholders and the external environment

Could you fill in the blanks? The answers are in bold. Use this page for revision purposes as you approach the exam.

- Organisations can achieve results which **individuals** cannot achieve by themselves.
- A **non-governmental** organisation (NGO) is an independent voluntary association of people acting together for some common purpose (other than achieving government office or making money).
- Stakeholders are those individuals or groups that, potentially, have an **interest** in what the organisation does. These stakeholders can be **within** the organisation, **connected** to the organisation or external to the organisation.
- **Government policy** influences the economic environment, the framework of laws, industry structure and certain operational issues. Political **instability** is a cause of risk.
- **Privacy** is the right of the individual not to suffer unauthorised disclosure of information.
- A contract is a **legally binding** agreement.
- Outsourcing is the contracting out of specified operations or services to an external vendor.
- The value chain describes those activities of the organisation that add value to purchased inputs.
- The **competitive environment** is structured by five forces: barriers **to entry**; **substitute products**; the bargaining power of customers; the bargaining power of **suppliers**; **competitive rivalry**.
- Equilibrium **national income** is determined using aggregate supply and aggregate demand analysis.
- Demand pull **inflation** arises from an excess of aggregate demand over the productive capacity of the economy.
- Cost push **inflation** arises from increases in the costs of production.
- Economic **growth** may be measured by increases in the **real** gross national product (GNP) per head of the population.
- **Macroeconomic policy objectives** relate to economic growth, **inflation**, unemployment and the **balance of payments**.
- If a government decides to use fiscal policy to influence demand in the economy, it can choose either **expenditure** changes or **tax** changes as its policy instrument.
- **Monetary policy** uses money supply, interest rates or credit controls to influence **aggregate demand**.
- A surplus or deficit on the balance of payments usually means a **surplus or deficit on the current account**.
- The micro environment refers to the immediate operational environment including suppliers, competitors, customers, stakeholders and intermediaries.
- Elasticity, in general, refers to the relationship between two variables. Price elasticity of demand explains the relationship between **change in** quantity demanded and **changes in** price.
- Income elasticity of demand measures the responsiveness of demand to changes in household income. **Cross elasticity of demand** is determined by the availability of substitute (competitors') products.
- The effects of **demand and supply** conditions on markets can be analysed by studying the behaviour of both demand and supply **curves**.

2.12 BCD Co is a large trading company. Steve is the administration manager and is also responsible for legal and compliance functions. Sheila is responsible for after sales service and has responsibility for ensuring that customers who have purchased goods from BCD Co are fully satisfied. Sunny deals with suppliers and negotiates on the price and quality of inventory. He is also responsible for identifying the most appropriate suppliers of plant and machinery for the factory. Sam is the information technology manager and is responsible for all information systems within the company.

According to Porter's value chain, which of the managers is involved in a primary activity as opposed to a support activity?

- A Steve
- B Sheila
- C Sunny
- D Sam

(2 marks)

2.13 What is the latest stage at which a new recruit to a company should first be issued with a copy of the company's health and safety policy statement?

- A On accepting the position with the company
- B As early as possible after employment
- C After the first few weeks of employment
- D During the final selection interview

(2 marks)

2.14 In Porter's five forces model, which of the following would not constitute a 'barrier to entry'?

- A Scale economies available to existing competitors
- B High capital investment requirements
- C Low switching costs in the market

(1 mark)

2.15 Three of the following strategies are closely related. Which is the exception?

- A Downsizing
- B Delegating
- C Delaying
- D Outsourcing

(2 marks)

2.16 Which of the following would be identified as a cultural trend?

- A Health and safety legislation
- B Concern with health and diet
- C Increasing age of the population

(1 mark)

2.17 For demographic purposes, which of the following is not a variable in the identification of social class?

- A Income level
- B Lifestyle
- C Occupation
- D Education

3 The macro-economic environment

28 mins

3.1 Which of the following is **not** an element of fiscal policy?

- A Government spending
- B Government borrowing
- C Taxation
- D Exchange rates

(2 marks)

- 3.2 Which of the following is associated with a negative Public Sector Net Cash Requirement?
- A The government is running a budget deficit.
 - B The government's expenditure exceeds its income.
 - C The government is running a budget surplus.
 - D Public Sector Debt Repayment (PSDR) is high.
- (2 marks)**

- 3.3 taxes are collected by the Revenue authority from a business, which attempts to pass on the tax to consumers in the price of goods.
- Which word correctly completes this statement?
- A Progressive
 - B Direct
 - C Indirect
- (1 mark)**

- 3.4 If a government has a macro-economic policy objective of expanding the overall level of economic activity, which of the following measures would **not** be consistent with such an objective?
- A Increasing public expenditure
 - B Lowering interest rates
 - C Increasing taxation
- (1 mark)**

- 3.5 The currency in country X is the Krone while country Y uses the Euro. Country Y has recently experienced an increase in its exchange rate with Country X. Which of the following effects is likely to result in Country Y?
- A A stimulus to exports in Country Y
 - B An increase in the costs of imports from Country X
 - C Reducing demand for imports from Country X
 - D A reduction in the rate of cost push inflation
- (2 marks)**

- 3.6 The following, **with one exception**, are 'protectionist measures' in international trade. Which is the exception?
- A Import quotas
 - B Subsidies for exporters
 - C Customs procedures
 - D Tariffs
- (2 marks)**

- 3.7 Are the following statements true or false?
- 1 Frictional unemployment will be short term
 - 2 Governments can encourage labour mobility if they want to reduce unemployment
- A Both statements are true.
 - B Statement 1 is true and statement 2 is false.
 - C Statement 1 is false and statement 2 is true.
 - D Both statements are false.
- (2 marks)**

- 3.8 Monetary policy is a government economic policy relating to:
- 1 Interest rates
 - 2 Taxation
 - 3 Public borrowing and spending
 - 4 Exchange rates
- Which of the above are correct?
- A 1 and 4
 - B 2 and 3
 - C 2 and 4
 - D 3 and 4
- (2 marks)**

3.9 Which of the following organisations might benefit from a period of high price inflation?

- A An organisation which has a large number of long-term payables
- B An exporter of goods to a country with relatively low inflation
- C A large retailer with a high level of inventory on display and low rate of inventory turnover

(1 mark)

3.10 Which of the following are the goals of macroeconomic policy?

- 1 Encouraging economic growth
- 2 Low unemployment
- 3 Achievement of a balance between exports and imports
- 4 Achieving zero inflation

- A 1 and 2
- B 2 and 3
- C 2, 3 and 4
- D 1, 2 and 3

(2 marks)

3.11 Which of the following is an example of cyclical unemployment?

- A The entry of school leavers into the labour pool each year
- B Lay-offs among agricultural labourers in winter
- C Automation of ticketing services in tourism
- D Recession in the building industry

(2 marks)

3.12 A surplus on the balance of payments usually refers to a surplus or deficit on the account.

Which word correctly complete this statement?

- A Current
- B Capital
- C Financial

(1 mark)

3.13 Northland, Southland, Eastland and Westland are four countries of Asia. The following economic statistics have been produced for the year 2007.

| Country | <i>Northland</i> | <i>Southland</i> | <i>Eastland</i> | <i>Westland</i> |
|---|------------------|------------------|-----------------|-----------------|
| Change in GDP (%) | -0.30 | +2.51 | -0.55 | +2.12 |
| Balance of payments current account (\$m) | +5550.83 | -350.47 | -150.90 | +220.39 |
| Change in consumer prices (%) | +27.50 | +15.37 | +2.25 | +2.15 |
| Change in working population employed (%) | -4.76 | +3.78 | +1.76 | -8.76 |

Which country experienced stagflation in the relevant period?

- A Northland
- B Southland
- C Eastland
- D Westland

(2 marks)

3.14 economic growth is determined by supply-side rather than by demand side factors.

Which word correctly completes this statement?

- A Actual
- B Potential
- C National

(Total = 23 marks)

4 Micro-economic factors**50 mins**

- 4.1 In a free market economy, the price mechanism:
- A Aids government control
 - B Allocates resources
 - C Measures national wealth
- (1 mark)**
-
- 4.2 The supply curve of a firm operating in a competitive market is its
- A Marginal cost curve above the average variable cost curve
 - B Marginal cost curve above the average total cost curve
 - C Average total cost curve beyond the point where the marginal cost curve cuts it from below
 - D Average variable cost curve below the average revenue curve
- (2 marks)**
-
- 4.3 A legal minimum price is set which is below the equilibrium price. What will be the impact of this?
- A Excess of demand over supply
 - B Excess of supply over demand
 - C Nothing
- (1 mark)**
-
- 4.4 Which one of the following would cause the supply curve for a good to shift to the right (outwards from the origin)?
- A A fall in the price of the good
 - B An increase in the demand for the good
 - C A fall in production costs of the good
 - D The imposition of a minimum price
- (2 marks)**
-
- 4.5 When the price of a good is held above the equilibrium price, the result will be
- A Excess demand
 - B A shortage of the good
 - C A surplus of the good
- (1 mark)**
-
- 4.6 Which one of the following would **not** lead directly to a shift in the demand curve for overseas holidays?
- A An advertising campaign by holiday tour operators
 - B A fall in the disposable incomes of consumers
 - C A rise in the price of domestic holidays
 - D A rise in the price of overseas holidays
- (2 marks)**
-
- 4.7 Which of the following is likely to lead to a fall in the price of good Q which is a normal good?
- A A rise in the price of good P, a substitute for good Q
 - B A fall in the level of household incomes generally
 - C A fall in the price of good T, a complement to good Q
 - D A belief that the price of good Q is likely to double in the next 3 months
- (2 marks)**
-
- 4.8 According to the theory of the firm, which of the following statements describes an oligopoly?
- A There are no barriers to entry into or exit from the market
 - B There is only one producer in the market
 - C There are four producers exerting considerable influence in the market
 - D There are many producers but they each use product differentiation to distinguish themselves from each other
- (2 marks)**
-

4.9 Which of the following is not a substitute for carpets?

- A Ceramic floor tiles
- B Wooden floorboard
- C Carpet underlay

(1 mark)

4.10 Which of the following is not a complement to cars?

- A Petrol
- B Tyres
- C Holidays

(1 mark)

4.11 The demand for fashion goods is not influenced by:

- A Price
- B Allocative inefficiency among producers
- C The distribution of income among households
- D Expectation of future price changes

(2 marks)

4.12 If the price of coffee falls, which **one** of the following outcomes would be expected to occur?

- A A fall in the quantity of coffee demanded
- B A rise in the price of tea
- C A fall in the demand for drinking cups
- D A fall in the demand for tea

(2 marks)

4.13 What is an inferior good?

- A A good of such poor quality that demand for it is very weak
- B A good for which the cross elasticity of demand with a substitute product is greater than 1
- C A good for which demand will fall as household income rises

(1 mark)

4.14 Consider the price and demand for flower vases. The price of cut flowers goes up sharply. Which of the following would you expect to happen?

- A The demand curve for flower vases will shift to the left and their price will rise
- B The demand curve for flower vases will shift to the right and their price will rise
- C There will be a movement along the demand curve for flower vases and their price will go down
- D The demand curve for flower vases will shift to the left and their price will go down

(2 marks)

4.15 Consider the price and demand for tickets to travel by sea ferry. The price of travelling by hovercraft (a substitute form of travel) goes up. Which of the following would you expect to happen?

- A The demand curve for sea ferry tickets will shift to the left, and their price will go down. More sea ferry tickets will be sold.
- B The demand curve for sea ferry tickets will shift to the right, and their price will go up. More ferry tickets will be sold.
- C The demand curve for sea ferry tickets will shift to the right and their price will go down. More sea ferry tickets will be sold.
- D The demand curve for sea ferry tickets will shift to the right and their price will go up. Fewer sea ferry tickets will be sold.

(2 marks)

4.16 The summer demand for hotel accommodation in London comes mainly from foreign tourists. Demand for hotel rooms in London in summer could be reduced by a fall in the price or value of which of the following?

- 1 US dollars
 - 2 Aeroplane tickets
 - 3 Sterling
- A Item 1 only
 - B Items 1 and 2 only
 - C Items 2 and 3 only
 - D Item 3 only

(2 marks)

4.17 ABC produces a variety of soft drink. It has two competitors but all three producers use product differentiation to distinguish themselves from each other. What type of market is this?

- A Perfect competition
- B Monopoly
- C Monopolistic competition
- D Oligopoly

(2 marks)

4.18 Suppose that, in a certain advanced industrialised country, the government has applied price controls over rents of both public and private rented accommodation for a number of years, and a serious problem of widespread homelessness has built up. Just recently, the rent price controls have been eased. Which of the following consequences should now occur?

- 1 An increase in homelessness
 - 2 In the longer term, an increase in new building work
 - 3 The provision of more rented accommodation
 - 4 Fewer owner-occupied dwellings
- A Consequences 1 and 2
 - B Consequences 2 and 3
 - C Consequences 3 and 4
 - D Consequences 1 and 4

(2 marks)

4.19 The demand curve for a resource may shift because of

- A A change in the demand for a good whose production is dependent on the resource
- B Concerns about potential harmful pollution from the resource
- C A change in the price of a substitute resource
- D All of the above

(2 marks)

4.20 The income elasticity of demand for a product is high. This means that:

- A Sales will fall only slightly when incomes of households fall
- B Sales will rise sharply when incomes of households rise
- C The good is an inferior good

(1 mark)

4.21 Using the point method, what is the price elasticity of demand of product X as price falls from its current price of \$20 to \$15?

| | <i>Old</i> | <i>New</i> |
|----------|------------|------------|
| Price | 20 | 15 |
| Quantity | 10 | 15 |

- A 0.5
- B 1
- C 1.5
- D 2

(2 marks)

4.22 Consumer surplus is:

- A The excess between what consumers are prepared to pay for a good or service, and the prevailing market price
- B The indirect tax producers pay on a good or service
- C The marginal utility gained by consuming one more unit of a good or service
- D The indirect tax consumers pay on a good or service

(2 marks)

4.23 Which combination of demand and supply curves would be appropriate for a firm attempting to increase its profits by increasing its market share?

- A Inelastic demand, inelastic supply
- B Elastic demand, elastic supply
- C Inelastic demand, elastic supply
- D Elastic demand, inelastic supply

(2 marks)

4.24 If the absolute value of the price elasticity of demand for dry white wine is greater than one, a decrease in the price of all wine would result in:

- A A more than proportional decrease in the quantity of dry white wine purchased
- B A less than proportional decrease in the quantity of dry white wine purchased
- C A less than proportional increase in the quantity of dry white wine purchased
- D A more than proportional increase in the quantity of dry white wine purchased

(2 marks)

4.25 Mr Smith has a limited income which restricts the number of different goods he can buy. Which one of the following best describes the position at which Mr Smith's utility from purchasing different goods is maximised?

- A Marginal utility from each good is equal
- B Marginal utility from each good is 0
- C Ratio of marginal utility to price is equal for each good

(1 mark)

(Total = 42 marks)

5 Section A MTQs

29 mins

5.1 (a) Are the following statements about elasticities true or false?

- (i) If income elasticity is positive, the commodity is called an inferior good
- (ii) If two goods are complements, the cross elasticity will be negative
- (iii) If price elasticity is greater than 1, demand is said to be inelastic
- (iv) Unrelated products would have a cross elasticity of infinity

(2 marks)

(b) Which **three** of the following reasons would result in a shift of the demand curve to the right for a normal good?

- A A fall in the price of substitutes
- B A change in taste towards a competitor good
- C An increase in household incomes
- D An expected future rise in the price of the good
- E A rise in the price of complements
- F An increase in population

(2 marks)

5.2 (a) A company has recently dismissed employees in the following circumstances:

Sarah was dismissed following disciplinary proceedings, although she was not guilty of negligence, and was not given her contractual period of notice by the company.

Trevor was dismissed from the company immediately after committing an act that was found to be grossly negligent.

Umberto, a relatively new employee who was showing a lot of promise, was dismissed after telling management that he had joined a trade union.

Vanessa, having previously being rated as one of the best performing employees in the company, was dismissed after management discovered she was pregnant.

For each of the following situations, classify whether the dismissal is:

- A Unfair
- B Wrongful
- C Neither

- (i) Sarah
- (ii) Trevor
- (iii) Umberto
- (iv) Vanessa

(2 marks)

(b) Are the following statements about redundancy true or false?

- (i) In the event of redundancy, an employee with one year's continuous employment is entitled to compensation
- (ii) Redundancy can occur where an employer ceases to carry on business in a particular location

(2 marks)

5.3 (a) The following are steps that governments can take to influence certain areas.

- A Tax incentives for investment
- B Equal opportunities legislation
- C Forbid takeovers
- D Product safety standards

For each of the following areas, which government action will positively influence that area?

- (i) Output capacity
- (ii) Competition
- (iii) Employment
- (iv) Consumer protection

(2 marks)

(b) For each of the following government policy tools, indicate whether they relate to

- A Fiscal policy
- B Monetary policy

- (i) Borrowing
- (ii) Taxation
- (iii) Interest rates
- (iv) Money supply

- 5.4 (a) GHJ Co is a manufacturing company that makes one product. The production process is labour intensive and as a result the product is highly specialised. GHJ Co also provides its customers with maintenance and after sales service.

Department W uses materials and labour to produce the final product.

Department X stores the final product and delivers it to customers.

Department Y is in charge of advertising and promotion of the final product.

Department Z is responsible for providing spare parts to customers.

The following are all primary activities from Porter's value chain

- A Operations
- B After sales service
- C Outbound logistics
- D Marketing and sales

For each of the departments, select the corresponding primary activity listed above

- (i) Department W
- (ii) Department X
- (iii) Department Y
- (iv) Department Z **(2 marks)**

- (b) Which **two** of the following factors indicate that suppliers have high bargaining power in an industry?

- A There are a large number of suppliers
- B There is a lack of substitute products available
- C Switching costs for customers are low
- D The product supplied is highly differentiated
- E Product quality is not important to customers **(2 marks)**

- 5.5 (a) Product BB15 has recently reduced its price by 5% which increased the sales volume by 12.5%. This price change also caused a fall in the sales volume of product CC25 by 2.5%. There was no change in the price of product CC25.

- (i) What is the price elasticity of demand for product BB15?
- (ii) What is the cross elasticity of demand?
- (iii) Products BB15 and CC25 are _____

Which word correctly fills the blank above?

- A Complements
- B Substitutes
- C Unrelated **(3 marks)**

- (b) For a normal, but inferior good, the demand curve slopes _____ to the right.

Which word from the list below correctly fills in the blank?

- A Downwards
- B Upwards
- C Horizontally **(1 mark)**

- 5.6 (a) Which THREE of the following statements reflect the activities of an NGO?
- A They have targets for customer satisfaction
 - B They are almost always charities
 - C They are aimed at promoting social, political or environmental change
 - D They often raise funds through donations
 - E They are legally constituted organisations with commercial aims
 - F They are measured in terms of effectiveness and efficiency
- (3 marks)**
- (b) What acronym is generally used for performance measurement of an NGO?
- A VFM
 - B ROCE
 - C PBIT
 - D SWOT
- (1 mark)**

Do you know? – Business organisation structure, functions and governance

Check that you can fill in the blanks in the statements below before you attempt any questions. If in doubt, you should go back to your BPP Interactive Text and revise first.

- An **organisation** always exists alongside the formal one.
- Organisations can be d..... on a **functional** basis, a **geographical** basis, a **product** basis, a **brand** basis, or a **matrix** basis. Organisation structures often feature a variety of these types, as h..... structures.
- In a d..... **structure** some activities are **decentralised** to business units or regions.
- The strategic apex exerts a pull to centralise, leading to the s..... **structure**.
- **Span of control** or '**span of management**' refers to the number of s..... responsible to a s.....
- Recent trends have been towards d..... organisations of levels of management.
- R..... may be **pure**, **applied** or **development**. It may be intended to improve **products** or **processes**.
- **The** **function** plans, organises, directs and controls the necessary activities to provide products and services, creating outputs which have added value over the value of inputs.
- The **function** manages an organisation's relationships with its customers.
- (HRM) is concerned with the most effective use of human resources. It deals with organisation, staffing levels, motivation, employee relations and employee services.
- Organisation c..... is 'the way we do things round here'.
- **Harrison** classified four types of culture, to which **Handy** gave the names of Greek deities.
 - **Power** culture (...) is shaped by one individual
 - **Role** culture (.....) is a bureaucratic culture shaped by rationality, rules and procedures
 - **Task** culture (.....) is shaped by a focus on outputs and results
 - **Existential** or person culture (Dionysus) is shaped by the interests of individuals
- Within an organisation, c..... can consist entirely of executives or may be instruments for joint consultation between employers and employees.
- Good c..... g..... involves **risk management** and **internal control, accountability** to stakeholders and other shareholders and conducting business in an **ethical and effective way**.
- The b.... should be responsible for taking major **policy** and **strategic** decisions.
- **Division of responsibilities** at the head of an organisation is most simply achieved by separating the roles of C....and c..... e.....
- Audit committees of **independent n...-** **directors** should liaise with **external audit, supervise internal audit**, and **review** the **annual accounts** and **internal controls**.
- Annual reports must **convey** a **f... and b..... view** of the organisation. They should state whether the organisation has complied with governance regulations and codes, and give specific disclosures about the board, internal control reviews, going concern status and relations with stakeholders.

Did you know? – Business organisation structure, functions and governance

Could you fill in the blanks? The answers are in bold. Use this page for revision purposes as you approach the exam.

- An **informal organisation** always exists alongside the formal one.
- Organisations can be **departmentalised** on a **functional** basis, a **geographical** basis, a **product** basis, a **brand** basis, or a **matrix** basis. Organisation structures often feature a variety of these types, as **hybrid** structures.
- In a **divisional structure** some activities are **decentralised** to business units or regions.
- The strategic apex exerts a pull to centralise, leading to the **simple structure**.
- **Span of control** or '**span of management**' refers to the number of subordinates responsible to a superior.
- Recent trends have been towards **delayering** organisations of levels of management.
- Research may be **pure**, **applied** or **development**. It may be intended to improve **products** or **processes**.
- **The production function** plans, organises, directs and controls the necessary activities to provide products and services, creating outputs which have added value over the value of inputs.
- The **marketing function** manages an organisation's relationships with its customers.
- **Human resource management** (HRM) is concerned with the most effective use of human resources. It deals with organisation, staffing levels, motivation, employee relations and employee services.
- Organisation culture is 'the way we do things round here'.
- **Harrison** classified four types of culture, to which **Handy** gave the names of Greek deities.
 - **Power** culture (Zeus) is shaped by one individual
 - **Role** culture (Apollo) is a bureaucratic culture shaped by rationality, rules and procedures
 - **Task** culture (Athena) is shaped by a focus on outputs and results
 - **Existential** or person culture (Dionysus) is shaped by the interests of individuals
- Within an organisation, committees can consist entirely of executives or may be instruments for joint consultation between employers and employees.
- Good corporate governance involves **risk management** and **internal control, accountability** to stakeholders and other shareholders and conducting business in an **ethical and effective way**.
- The board should be responsible for taking major **policy** and **strategic** decisions.
- **Division of responsibilities** at the head of an organisation is most simply achieved by separating the roles of Chair and chief executive.
- **Independent non-executive directors** have a key role in governance. Their number and status should mean that their views carry significant weight.
- Audit committees of **independent non-executive directors** should liaise with **external audit**, **supervise internal audit**, and **review** the **annual accounts** and **internal controls**.
- Annual reports must **convey a fair and balanced view** of the organisation. They should state whether the organisation has complied with governance regulations and codes, and give specific disclosures about the board, internal control reviews, going concern status and relations with stakeholders.

- 6.1 Which of the following statements about an organisation chart is not true?
- A An organisation chart provides a summary of the structure of a business.
 - B An organisation chart can improve internal communications within a business.
 - C An organisation chart can improve employees' understanding of their role in a business.
 - D An organisation chart can indicate functional authority but not line authority within a business.
- (2 marks)**
-

- 6.2 Which of the following is a correct definition of 'span of control'?
- A The number of employees subordinate in the hierarchy to a given manager
 - B The number of levels in the hierarchy 'below' a given manager's
 - C The number of employees directly responsible to a manager
- (1 mark)**
-

- 6.3 Which of the following terms is **not** used by Mintzberg in his description of organisational structure?
- A Strategic apex
 - B Support base
 - C Technostructure
 - D Operating core
- (2 marks)**
-

- 6.4 Y plc is a growing organisation which has recently diversified into a number of significant new product markets. It has also recently acquired another company in one of its overseas markets.
- What would be the most appropriate form of organisation for Y plc?
- A Geographical departmentation
 - B Divisionalisation
 - C Functional departmentation
- (1 mark)**
-

- 6.5 Which of the following principles of classical management is challenged by matrix management?
- A Structuring the organisation on functional lines
 - B Structuring the organisation on geographical lines
 - C Unity of command
 - D Decentralisation of decision-making
- (2 marks)**
-

- 6.6 Which of the following statements about the informal organisation is **not** true?
- A The influence of the informal organisation was highlighted by the Hawthorne Studies, in the way group norms and dynamics affected productivity.
 - B Informal organisation can pose a threat to employee health and safety.
 - C Informal organisation can stimulate innovation.
 - D Managers in positions of authority generally cannot be part of the informal organisation.
- (2 marks)**
-

- 6.7 Which one of the following is an advantage of centralisation?
- A It helps to develop the skills of junior managers
 - B It avoids overburdening top managers in terms of workload and stress
 - C Senior managers can take a wider view of problems and consequences
- (1 mark)**
-

- 6.8 Which of the following statements is/are true?
- (i) An informal organisation exists within every formal organisation
 - (ii) The objectives of the informal organisation are broadly the same as those of the formal organisation
 - (iii) A strong, close-knit informal organisation is desirable within the formal organisation
- A Statement (i) only
B Statements (i) and (iii) only
C Statements (ii) and (iii) only
D Statement (iii) only **(2 marks)**
-
- 6.9 What is an organisation which has removed the internal barriers which separate hierarchy levels and functions and also between the organisation and its suppliers, customers and competitors known as?
- A Modular organisation
B Hollow organisation
C Jobless structure
D Boundaryless organisation **(2 marks)**
-
- 6.10 Which of the following statements are true?
- (i) With a shared service centre services are likely to be less tailored
 - (ii) The IT function is commonly provided using shared service approach
 - (iii) A shared service centre is not part of the organisation
- A Statement (i) and (iii) only
B Statements (i) and (ii) only
C Statements (ii) and (iii) only **(1 mark)**
-

7**Organisational culture and committees****40 mins**

- 7.1 BZ Ness Ltd is an organisation with a strongly traditional outlook. It is structured and managed according to classical principles: specialisation, the scalar chain of command, unity of command and direction. Personnel tend to focus on their own distinct tasks, which are strictly defined and directed. Communication is vertical, rather than lateral. Discipline is much prized and enshrined in the rule book of the company.
- From the scenario, what sort of culture does BZ Ness Ltd have, using Harrison's classifications?
- A Role culture
B Task culture
C Existential culture
D Power culture **(2 marks)**
-
- 7.2 Which of the following statements is true?
- A Strong values improve corporate performance
B Strong values can replace rules and controls in an organisation
C Strong values minimise conflict within an organisation
D Strong values are dangerous if they filter out 'uncomfortable' environmental information **(2 marks)**
-

- 7.3 Culture is the collective programming of the mind which distinguishes the members of one from another.

Which word or phrase most accurately completes the definition?

- A Nation
- B Category of people
- C Social class

(1 mark)

- 7.4 Which of the following is **not** one of the terms used by Hofstede to describe a key dimension of culture?

- A Power-distance
- B Acquisitive/giving
- C Individualism/collectivism
- D Uncertainty avoidance

(2 marks)

- 7.5 Which is the 'deepest' set of underlying factors which determine culture, and the hardest to manage?

- A Values
- B Rituals
- C Assumptions

(1 mark)

- 7.6 Who defined organisational culture as 'the set of shared, taken-for-granted implicit assumptions that a group holds and that determines how it perceives, thinks about and reacts to its environment'?

- A Maslow
- B Schein
- C Porter
- D Mintzberg

(2 marks)

- 7.7 Research has indicated that workers in country A display characteristics such as toughness and the desire for material wealth and possessions, while workers in country B value personal relationships, belonging and the quality of life.

According to Hofstede's theory, these distinctions relate to which of the following cultural dimensions?

- A Masculinity – femininity
- B Power – distance
- C Individualism – collectivism
- D Uncertainty avoidance

(2 marks)

- 7.8 The research and development (R & D) function of a business:

- (i) Is primarily concerned with market research
- (ii) Can improve existing products as well as developing completely new products
- (iii) Has been less important for firms manufacturing computers to meet an industry standard than for those firms developing the next generation of computers
- (iv) Is always undertaken under contract by specialist external consultancies

Which of the above statements are correct?

- A (i) and (ii) only
- B (ii) and (iii) only
- C (i), (iii) and (iv) only
- D (ii) and (iv) only

(2 marks)

7.9 Services have certain qualities which distinguish them from products. Because of their , physical elements such as vouchers, tickets, confirmations and merchandise are an important part of service provision.

Which of the following words most accurately completes the sentence?

- It is the responsibility of the to take such steps as are reasonably open to them to **prevent and detect** fraud.
- The growth of globalisation has created more opportunities for m..... l..... which governments and international bodies are trying to combat with legislation.

Did you know? – Accounting and reporting systems, controls and compliance

Could you fill in the blanks? The answers are in bold. Use this page for revision purposes as you approach the exam.

- Accounting is a way of recording, analysing and summarising transactions of a business.
- The two most important external financial statements are the statement of financial position and the income statement. Reports produced for internal purposes include budgets and costing schedules.
- The **income statement** is a record of income generated and expenditure incurred over a given period.
- The **statement of financial position** is a list of all the assets owned by a business and all the liabilities owed by a business at a particular date.
- The **statement of cash flows** shows sources of cash generated during a period and how these funds have been spent.
- The purchases and sales systems will be the most important components of most company accounting systems.
- Controls should be regularly checked and any problems reported to management.
- A **database** may be described as a 'pool' of data, which can be used by any number of applications. Its use is not restricted to the accounts department.
- **Spreadsheets**, too, are often used both in financial accounting and cost accounting.
- **Internal controls** should help organisations counter risks, maintain the quality of reporting and comply with laws and regulations. They provide reasonable assurance that the organisations will fulfil their objectives.
- Controls can be classified in various ways including **administrative** and **accounting**; **prevent, detect** and **correct**; **discretionary** and **non-discretionary**; **voluntary** and **mandated**; **manual** and **automated**.
- **Internal auditors** are **employees** of the organisation whose work is designed to **add value** and who report to the **audit committee**. **External auditors** are from **accountancy firms** and their role is to **report on the financial statements to shareholders**.
- An **audit trail** shows who has accessed a system and the operations performed.
- In a corporate context fraud can fall into one of two main categories: **removal of funds or assets** from a business or the **intentional misrepresentation of the financial position of a business**.
- There are three broad **pre-requisites** or 'pre-conditions' that must exist in order to make fraud a possibility: dishonesty, motivation and opportunity.
- It is the responsibility of the directors to take such steps as are reasonably open to them to **prevent and detect** fraud.
- The growth of globalisation has created more opportunities for money laundering which governments and international bodies are trying to combat with legislation.

 4. An audit trail is produced so all transactions can be traced to the time of posting and the individual who entered them.

For each of the following controls, identify if they are

A Discretionary

B Non-discretionary

- (i) Balancing of accounting entries
- (ii) Authorisation of non-current asset purchase
- (iii) Password access to the system
- (iv) Review of the audit trail

(2 marks)

- (b) _____ audit is based on testing and evaluating the internal controls of an organisation.

Which of the following correctly fills the blank?

A An operational

B A transactions

C A systems

(1 mark)

- (c) A control system consisting of sufficient controls will be entirely effective. Is this statement true or false? **(1 mark)**

- 13.3 (a) The external auditor should design audit procedures to have a reasonable expectation of detecting fraud. Everything else is the responsibility of the directors.

Which **two** of the following are advantages of computerised accounting systems over manual systems?

- A The risk of errors is eradicated
- B Processing is faster
- C Corrections can be made quicker
- D Information is less accessible

(2 marks)

- (b) A _____ is a program that deals with a particular part of the accounting system.

Which word fills in the blank above?

A Spreadsheet

B Database

C Module

(1 mark)

- (c) Is the following statement about databases true or false?

A database does not need updating once it has been set up.

(1 mark)

- 13.4 (a) Which **two** of the following are examples of physical access controls?
- A Door locks
 - B Automatic system back ups
 - C Intruder alarms
 - D Authorisation of purchases
 - E Physical inspection of inventory
- (2 marks)**
- (b) Check digits, control totals and limit checks are examples of which type of control?
- A Output control
 - B Processing control
 - C Input control
- (1 mark)**
- (c)controls help an organisation recover in the event of a disaster.
Which word fills in the blank above?
- A Integrity
 - B Contingency
 - C Security
- (1 mark)**

- 13.5 (a) Stella is an external auditor who has observed some cash transactions that don't have any supporting documentation. Upon further investigation she discovered that these payments are made into bank accounts of the Finance Director's family. She discusses this with the audit manager and they jointly decide not to take any further action.
- James is also an external auditor and has discovered a fraud at one of his clients and has decided he will make a report to his MLRO. At the same time he decides to inform the financial controller of the client about making the report.
- (i) Which of the following offences has been committed by Stella?
- A Tipping off
 - B Failure to report
 - C No offence has been committed
- (ii) Which of the following offences has been committed by James?
- A Tipping off
 - B Failure to report
 - C No offence has been committed
- (2 marks)**
- (b) Elyse is transferring amounts of money from business to business to disguise the fact that the money was originally the proceeds from criminal activity.
- Laura is in the process of banking several small amounts of illegally obtained money with a variety of banks in order to avoid anti-money laundering requirements.
- (i) Which of the following phases of money laundering is being undertaken by Elyse?
- A Placement
 - B Layering
 - C Integration
- (ii) Which of the following phases of money laundering is being undertaken by Laura?
- A Placement
 - B Layering
 - C Integration
- (2 marks)**

13.6 (a) Which of these is an example of an 'internal check'?

- A Adherence to internal policies
- B Completeness of the accounting records
- C Safeguarding of assets
- D Use of control totals

(1 mark)

(b) Categorise each of these statements as relating to the work of either internal or external audit:

- B There is competition with other groups
- C Members passively accept work decisions
- D Individuals achieve their own targets **(2 marks)**

17.2 A team leader is having difficulties with conflict in the team, due to 'clashes' or incompatibilities in the personalities of two of its members. The leader draws up a list of options for managing the problem.

Which option, from the following list, would be the least practicable?

- A Educate the members about personality differences
- B Encourage the members to modify their personalities
- C Remove one of the members from the team **(1 mark)**

17.3 At the Soli-Darretty Bros factory, a project team has been put together by management. The team are engaged in debating how they are going to approach the task, and who is going to do what. Some of their first ideas have not worked out but they are starting to put forward some really innovative ideas: they get quite excited in brainstorming sessions, and are uninhibited in putting forward their views and suggestions. Factions are emerging, not only around different ideas, but around two dominating individuals who always seem to disagree.

At what stage of Tuckman's group development model is this team?

- A Forming
- B Storming
- C Norming

(1 mark)

17.4 are mental states (made up of thoughts, feelings and intentions) which influence an individual's response to all objects and situations with which they are related.

Which word correctly completes this definition?

- A Personality traits
- B Perceptions
- C Attitudes
- D Emotional intelligences

(2 marks)

17.5 For which of the following applications is teamworking **not** best suited?

- A Ideas generation for innovation
- B Co-ordination of different functions
- C Crisis decision-making
- D Co-ordination of geographically dispersed workers

(2 marks)

17.6 If a team is bogged down in argument, and discussion is turning hostile, which of the following types of contribution would the team leader seek to discourage?

- A Bringing-in
- B Blocking
- C Summarising
- D Testing understanding

(2 marks)

17.7 Which of the following is **not** a key tool of team building?

- A Members identify with the team
- B Members are as alike as possible
- C Members commit to shared objectives

(1 mark)

17.8 Grant is a member of a project team. His colleagues in the team rely on him to read and check complex project documentation. Grant has a keen eye for detail and often identifies minor details in documents that others miss but may be of significance. Despite the diligent approach, Grant always meets his deadlines. However, some of Grant's colleagues feel frustrated when he refuses to involve others. He can hold up progress as he will not agree to the team signing off project documents until all of his concerns are fully discussed.

According to Belbin's team roles theory, Grant is an example of which of the following?

- A Implementer
- B Completer – finisher
- C Monitor – evaluator
- D Shaper

(2 marks)

17.9 What is the most important attribute of a 'group', which distinguishes it from a random crowd of people?

- A Purpose
- B Conformity
- C Identity

(1 mark)

17.10 In Belbin's model of team roles, which of the following is most important for a well-functioning team?

- A A mix and balance of team roles
- B Nine members, so that all roles are filled
- C A focus on functional/task roles, not process roles
- D As few members as possible

(2 marks)

17.11 A team is winding up a challenging project that it has been working on for some time. Next week, the same team will go on to a new project with quite different challenges.

Which stage of the group development model is this team likely to be going through?

- A Norming
- B Dorming
- C Adjourning

(1 mark)

17.12 Which of the following would be an effective technique for encouraging healthy team solidarity?

- A Discouraging competition with other groups
- B Encouraging competition within the group
- C Encouraging members to express disagreements
- D Discouraging members from expressing disagreements

(2 marks)

17.13 Which of the following theories suggests that people behave according to other people's expectations of how they should behave in that situation?

- A Team identity theory
- B Role theory
- C Hero theory

(1 mark)

17.14 An organisation has set up a team in which any member of the team can perform the full range of its tasks. The manager is able to share out tasks between members according to who is available to do a given job when it is required.

What sort of team organisation does this describe?

- A Multi-disciplinary team
- B Multi-skilled team
- C Self-managed team
- D Virtual team

(2 marks)

17.15 Team-member Tom is one of those people who is dynamic and thrives on pressure. He tends to be the one who challenges and pushes other team members, sometimes annoying or upsetting them – but also getting the team past difficult periods.

Which of Belbin's team roles does Tom exercise?

- A Plant
- B Co-ordinator (chair)
- C Implementer
- D Shaper

(2 marks)

17.16 A team is having a brainstorming session and one member suggests 'Let's move on to something else as we're getting nowhere'. What type of contribution is this?

- A Proposing
- B Supporting
- C Blocking
- D Shutting out

(2 marks)

17.17 Team-leader Arnica has given a briefing stating the current situation and asking for suggestions to move the project on. What stage is the team current at?

- A Forming
- B Storming
- C Norming
- D Performing

18 Motivating individuals and groups

34 mins

18.1 Phil T Luker & Son offers its employees a reward package which includes salary and company car. Its factory is safe and clean and rather smart. The work is technically challenging and employees are encouraged to produce innovative solutions to problems.

Which of the rewards offered by the firm is a form of intrinsic reward?

- A The salary
- B The car
- C The work

(1 mark)

18.2 Which of the following is not a category in Maslow's hierarchy of needs theory?

- A Physiological needs
- B Freedom of inquiry and expression needs
- C Need for affiliation
- D Safety needs

(2 marks)

18.3 Keepham (Hungary) Co offers its employees:

- (i) Sensible company policies
- (ii) Good salaries and bonuses
- (iii) Considerate supervision
- (iv) Training programmes

According to Herzberg's two-factor theory, which of these things will satisfy employees in such a way as to motivate them to superior effort in the long-term?

- A (ii) only
- B (iv) only
- C (ii) and (iv) only
- D (i), (ii), (iii) and (iv)

(2 marks)

18.4 What term is given, in motivation theory, to the things people value and choose to pursue?

- A Goals
- B Innate needs
- C Satisfaction

(1 mark)

- 18.5 Willy Dewitt-Ornott works in Sales. There is always a sales competition at the year end and the winner is likely to be made team leader. Willy's quite certain that he will be able to win and that he will have more responsibility, which he would like. But he would also have to work much longer hours, and he is quite reluctant to do this for family reasons.

If an expectancy equation were used to assess Willy's motivation to work hard at the end of the year, based on the information given, which of the following results would you expect to see?

- A Valence would be high, expectancy high, motivation high
 - B Valence would be high, expectancy low, motivation low
 - C Valence would be around 0, expectancy high, motivation low
 - D Valence would be around 0, expectancy high, motivation high
- (2 marks)**

- 18.6 All of the following, with one exception, are alternative terms for the same thing. Which is the exception?

- A Motivator factor
 - B Hygiene factor
 - C Environmental factor
 - D Maintenance factor
- (2 marks)**

- 18.7 The five core dimensions which contribute to job satisfaction are skill variety, task identity, task significance, and feedback.

Which of the following is the dimension missing from the above list?

- A Recognition
 - B Advancement
 - C Autonomy
 - D Rewards
- (2 marks)**

- 18.8 Participation can motivate employees by making them take 'ownership' of the task and increasing their commitment. In which of the following circumstances, however, would this **not** happen?

- A Participation is genuine
 - B The purpose of participation is made clear
 - C Everyone is allowed to participate equally
 - D Efforts at participation are maintained for a reasonable period
- (2 marks)**

- 18.9 The management of Guenguiss Cans Co runs a 'tight ship', with clocking-on timekeeping systems, close supervision and rules for everything. 'Well,' says the general manager, 'if you allow people to have any freedom at work, they will take advantage and their work rate will deteriorate'.

Which of Douglas McGregor's 'theories' does this management team subscribe to?

- A Theory X
 - B Theory Y
 - C Theory Z
- (1 mark)**

- 18.10 Application of process theories to motivation in practice involves all but one of the following measures. Which is the exception?

- A Clarifying intended results
 - B Giving feedback on actual results
 - C Immediacy of reward following results
 - D Consistency of reward for results
- (2 marks)**

- 18.11 Which of the following is a potential problem with individual performance-related pay (PRP) as a motivator?

- A Its effect on organisational communication
 - B Its relevance to business objectives
 - C The fact that it does not relate to individuals' wage or salary grades
 - D Its effect on team motivation
- (2 marks)**

18.12 The following, with one exception, are claimed as advantages for job enrichment as a form of job re-design. Which is the exception?

- A It increases job satisfaction
- B It enhances quality of output
- C It replaces monetary rewards
- D It reduces supervisory costs

(2 marks)

18.13 According to Maslow's hierarchy of needs, which of the following is the final 'need' to be satisfied?

- A Self-realisation
- B Self-actualisation
- C Esteem needs
- D Physiological needs

(2 marks)

18.14 Job evaluation puts a relative value on jobs primarily on the basis of which of the following factors?

- A Equity
- B Job content
- C Market rates of pay

(1 mark)

18.15 In Vroom's expectancy theory, what is meant by 'valence'?

- A The strength of an individual's preference for a given outcome
- B The strength of an individual's motivation to act in a certain way
- C The strength of an individual's belief that acting in a certain way will obtain the desired outcome

(1 mark)

18.16 Eva Moor-Drudgery used to pack chocolate bars into boxes of three dozen. Her job has been redesigned, so that she now packs them, applies a 'sell-by' date stamp, cellophanes the box and applies a promotional sticker.

Of which form of job redesign is this an example?

- A Job rotation
- B Job enlargement
- C Job enrichment

(1 mark)

18.17 Which job design technique was advocated by the scientific management school?

- A Empowerment
- B Micro-division of labour
- C Division of labour
- D Job enlargement

(2 marks)

19 Training and development**34 mins**

- 19.1 Trainee Sara is unhappy in her current training programme, because it is too 'hands on': she is required to attempt techniques before she has had a chance to study the underlying principles first. She spends the evenings trying to read ahead in the course textbook.

Which of Honey and Mumford's learning styles is probably Sara's preferred style?

- A Reflector
- B Pragmatist
- C Theorist

(1 mark)

- 19.2 Which of the following is **not** a characteristic of a 'learning organisation'?

- A The generation and transfer of knowledge
- B Support for learning and development by all members
- C A scientific approach to problem-solving, in order to minimise risk and error
- D Willingness to continuously transform itself in response to a changing environment

(2 marks)

- 19.3 Which of the following statements about training is most likely to be the foundation of an effective training policy?

- A Training is the responsibility of the HR department
- B Training is all cost and no quantifiable benefit
- C The important thing is to do lots of training
- D Training can be an effective solution to some performance problems

(2 marks)

- 19.4 is 'the planned and systematic modification of behaviour through learning events, programmes and instruction which enable individuals to achieve the level of knowledge, skills and competence to carry out their work effectively'.

Which word correctly completes this definition?

- A Conditioning
- B Training
- C Education

(1 mark)

- 19.5 The learning cycle developed by David Kolb is a process for learning. Which of the following words correctly completes this sentence?

- A Programmed
- B Experiential
- C Action
- D Reflection

(2 marks)

- 19.6 All the following, with one exception, are clear benefits of training and development for an organisation. Which is the exception?

- A Increased organisational flexibility
- B Less need for detailed supervision
- C Enhanced employability of staff members
- D Improved succession planning

(2 marks)

19.7 Which of the following are 'on the job' training methods?

- (i) Day-release
 - (ii) Job rotation
 - (iii) Coaching
 - (iv) Temporary promotion
- A Method (iii) only
 - B Methods (i) and (iii) only
 - C Methods (ii), (iii) and (iv) only
 - D Methods (i), (ii), (iii) and (iv)

(2 marks)

19.8 You have been asked to comment on the most effective approach for training accounts staff in the use of a new payroll system. Which of the following arguments would you put forward for choosing an **on**-the-job approach?

- A Ability of learners to concentrate on the learning process
- B Risk of errors
- C Relevance to the informal customs and practices of the department
- D Application of learned skills to the job

(2 marks)

19.9 The effectiveness of a training scheme may be measured at different levels. Which of the following levels would be most appropriate for a team leader seeking to evaluate a training programme designed to improve the productivity of her section?

- A Level 1: trainee reactions
- B Level 2: trainee learning
- C Level 3: job behaviour
- D Level 5: ultimate value

(2 marks)

19.10 development is a process whereby employees are offered a wide range of developmental opportunities, rather than focusing on skills required in the current job.

Which word or phrase correctly completes this sentence?

- A Management
- B Career
- C Personal

(1 mark)

19.11 Peter has been identified, using Honey & Mumford's learning styles questionnaire, as a Pragmatist learner. He is now preparing a personal development plan to improve his sales skills. Which of the following training methods is he most likely to include in his plan?

- A On-the-job coaching by his supervisor
- B A group workshop in 'interpersonal skills practice'
- C Personal development journaling
- D A computer-based training module on sales

(2 marks)

19.12 The HR manager of a firm has been asked to explain to the finance director the quantifiable benefits of training programmes. Which of the following might she hesitate to put forward?

- A Increased speed of working
- B Increased accuracy of work
- C Increased employee satisfaction

(1 mark)

- 19.131 The growth or realisation of a person's ability and potential through the provision of learning and educational experiences.
- 2 The planned and systematic modification of behaviour through learning events, programmes and instruction which enable individuals to achieve the level of knowledge, skills and competences to carry out their work effectively.

Which of the following is correct?

- A 1 is the definition of development and 2 is the definition of training
B 1 is the definition of education and 2 is the definition of development
C 1 is the definition of training and 2 is the definition of development
D 1 is the definition of education and 2 is the definition of training (2 marks)
-

- 19.14 Which of the following documents would be part of a formal training needs analysis exercise?

- A An email reminding you that a new piece of legislation is about to come into effect
B A health and safety officer's report showing that a department failed its assessment in a recent fire evacuation drill
C A set of competence standards for your job or department
D Feedback from a colleague about the standard of your work (2 marks)
-

- 19.15 is learning through a network of computers or the internet (but not stand-alone CD-Rom or tuition software), so that learning support is available from online tutors, moderators and discussion groups.

What term is used for this learning technology?

- A E-learning
B Computer based training
C Blended learning
D Computer based assessment (2 marks)
-

- 19.16 The stages of Kolb's experiential learning cycle are as follows.

- 1 Draw conclusions from the experience
2 Have an experience
3 Plan the next steps
4 Reflect on the experience

Which is the correct order?

- A 2, 4, 1, 3
B 2, 3, 4, 1
C 2, 4, 3, 1 (1 mark)
-

- 19.17 What is a competence framework **mainly** used for?

- A To identify present level of competence
B To identify training needs
C To evaluate training success or failure (1 mark)

(Total = 28 marks)

20 Performance appraisal**26 mins**

20.1 Which of the following is **not** a purpose of performance appraisal?

- A Job evaluation
- B Identification of training needs
- C Succession planning

(1 mark)

20.2 A manager is assessing the performance of her team members. In accordance with the appraisal system of the organisation, she has been given a list of characteristics and performance elements, with notes on how to interpret and apply the terms: 'integrity', 'punctuality' and so on. She is required to comment on how each appraisee measures up in terms of each factor.

Which appraisal technique is this organisation using?

- A Overall assessment
- B Grading
- C Behavioural incident
- D Guided assessment

(2 marks)

20.3 All of the following, except one, are sound principles for devising performance measures. Which is the exception?

- A They should be related to actual key tasks of the job
- B They should be easily achievable
- C They should be within the control of the individual
- D They should be observable or measurable

(2 marks)

20.4 In an appraisal interview, the manager tells the subordinate how he has been assessed – good and bad – and then gives him a chance to put questions, suggest improvement targets, explain shortcomings and identify problems.

Using Maier's classification, what is the name given to this approach to appraisal interviewing?

- A Tell and sell
- B Tell and listen
- C Problem solving
- D Sell and listen

(2 marks)

20.5 Which of the following is likely to be the most objective approach to appraisal?

- A Self appraisal
- B Peer appraisal
- C Upward appraisal
- D 360-degree feedback

(2 marks)

20.6 is 'a process to establish a shared understanding about what is to be achieved, and an approach to managing and developing people in order to achieve it'.

Which two words correctly completes this definition?

- A Performance appraisal
- B Performance management
- C Peer appraisal

(1 mark)

20.7 Which of the following are meaningful criteria for measuring the effectiveness of an appraisal scheme?

- (i) Serious intent
 - (ii) Fairness
 - (iii) Efficiency
 - (iv) Co-operation
 - (v) Results
- A (ii), (iii) and (v) only
B (iii) and (v) only
C (i), (ii), (iii) and (iv) only
D (i), (ii), (iii), (iv) and (v)

(2 marks)

20.8 is the name given to gathering of appraisals from the individual, superiors, subordinates, peers and co-workers and customers.

Which word or phrase correctly completes this sentence?

- A Multi-source feedback
B Management by objectives
C Performance management

(1 mark)

20.9 Appraisal is a complex human relations and political exercise. Which of the following is **not** necessarily a helpful factor in the design of an appraisal scheme?

- A The purpose of the system is positive and clearly expressed
B There is reasonable standardisation throughout the organisation
C Time is allowed for appraisee preparation and appraiser training
D There is an implied link between assessment and reward

(2 marks)

20.10 Which of the following is **not** a barrier to effective appraisal?

- A Appraisal is seen as a way of wrapping up unfinished business for the year
B Appraisal is seen as conforming to Human Resource procedures
C Appraisal is seen as an opportunity to raise workplace problems and issues
D Appraisal is seen as an annual event

(2 marks)

20.11 Which **one** of the following criteria would **not** be suitable for evaluating an appraisal system?

- A Serious intent
B Fairness
C Bonuses awarded

(1 mark)

20.12 Which of the following is an advantage to all employees of having a formal appraisal system?

- A Suitable promotion candidates are identified
B It provides a basis for medium- to long-term HR planning
C Individual objectives are related to the objectives of the whole organisation
D It provides a basis for reviewing recruitment and selection decisions

(2 marks)

20.13 A sales team is assessed according to the number of sales calls made, number of leads generated, and number and value of sales made.

Which appraisal technique is described in this example?

- A Behavioural incident
B Rating scale
C Guided assessment
D Results-oriented

(2 marks)

29 mins

21.1 (a) Peter, Gloria, Shirley and Matthew are part of a newly formed team.

Peter is a reliable employee who likes to take ideas from other people and turn them into actions. He is not very flexible and tends to be resistant to change or new possibilities.

Gloria is a dynamic individual who responds best when under pressure. She is driven to overcome any obstacles, but has a tendency to hurt other people's feelings.

Shirley is single-minded and dedicated to her work. She has a lot of specific knowledge, but only contributes to discussions on these areas and lacks the ability to see the bigger picture.

Matthew is strategically minded. He likes to see all the available options before judging them. He has a proven track record of good judgements, but can be overly critical and does not inspire others that he works with.

Belbin identified the following team roles:

- A Shaper
- B Monitor-Evaluator
- C Implementer
- D Specialist

For each team member listed below, select the appropriate team role from the list above:

- (i) Peter
- (ii) Gloria
- (iii) Shirley
- (iv) Matthew

(2 marks)

(b) _____ occurs when an individual is penalised for giving information in a discrimination claim against an employer.

Which word correctly fills in the blank?

- A Indirect discrimination
- B Harassment
- C Victimisation

(1 mark)

(c) Is the following statement true or false?

Encouraging individuals from disadvantaged group to apply for groups is known as positive action.

(1 mark)

21.2 (a) Do the following statements relate to

- A Extrinsic rewards
- B Intrinsic rewards
- C Incentives
- (i) A feeling of achievement
- (ii) A promise of additional time off for meeting a target
- (iii) Working conditions
- (iv) Salary

(2 marks)

(b) Which **two** of the following steps would be classified as job enrichment?

- A Giving an employee freedom to decide how the job should be done
- B Increasing the number of tasks an employee participates in
- C Transferring an employee from one job to another
- D Encouraging employee participation in planning decisions of superiors
- E Dividing a job up into a small number of sequential tasks

(2 marks)

- 21.3 (a) Shaun likes to understand basic principles and take a hands-off approach based on logical argument. He wants to participate in a structured training programme which is run by teachers.
- Louise needs to work at her own pace and tends to be fairly slow and cautious in her learning. She likes to observe things, take time to think about them and then produces a carefully thought-out conclusion.
- Susan only likes to study if she can see a link to a real practical problem. She likes to learn new techniques through on-the-job training, but tends to discard good ideas which require some development to work properly.
- Tony is flexible and optimistic, but does not have any patience with theories. He wants to receive hands-on training and enjoys practical problems.

Honey and Mumford classified the four following learning styles:

- A Theorists
- B Reflectors
- C Activists
- D Pragmatists

For each of the following individuals, select the correct learning style from the list above:

- (i) Shaun
 - (ii) Louise
 - (iii) Susan
 - (iv) Tony
- (b) Which **two** of the following are off-the-job training methods? (2 marks)
- A Job rotation
 - B Computer-based training
 - C Temporary promotion
 - D Demonstration
 - E College courses
- (2 marks)
-

21.4 (a) George, Helen, Josh and Leigh are all on development programmes.

George is learning skills that are not directly required in his current role, but should allow him to contribute more flexibly and innovatively to the organisation in the future whichever role he is in.

Helen is gaining experience of each of the different functions in her company as well as a variety of position and work settings as preparation for increased responsibility in the future.

Josh is receiving training to ensure his professional standards in his accountancy work are maintained and enhanced through education, development and training.

Leigh is partway through a series of planned secondments within her department and has recently been working in two project group for implementing new systems.

The following are all different approaches to development:

- A Management development
- B Personal development
- C Professional development
- D Career development

For each of the following individuals, select the development approach they are on:

- (i) George
- (ii) Helen
- (iii) Josh
- (iv) Leigh

(2 marks)

(b) Which TWO of the following are necessary for a training programme to be effective?

- A Training should be expensive
- B There should be clear objectives
- C Training should be off-the-job
- D There should be timely feedback
- E Training should be on-the-job

(2 marks)

- 21.5 (a) Company W assess the performance of its sales staff by the number of clients visited and the number of products they each sell.

Company X rates its managerial staff. Each manager is awarded a score from 1 (excellent) to 4 (poor), based on feedback from subordinates and superiors.

Company Y appraises the performance of its staff through assessors commenting on a number of desired characteristics and performance elements.

Company Z compares attributes displayed by its staff to a series of attributes that indicate either satisfactory or unsatisfactory performance in their job role.

The following are different types of appraisal techniques

- A Guided assessment
- B Grading
- C Behavioural-incident method
- D Results-oriented scheme

For each company, select the type of appraisal scheme being used:

- (i) Company W
- (ii) Company X
- (iii) Company Y
- (iv) Company Z

(2 marks)

- (b) The manager does not criticise, but instead discusses issues with the employee. The employee is encouraged to think things through and commits to personal improvement.

Which of Maier's three approaches to appraisal interviews is this an example of?

- A Tell and sell
- B Tell and listen
- C Problem-solving

(1 mark)

- (c) Is the following statement true or false?

Performance appraisal can be used to identify potential candidates for promotion.

(1 mark)

- 21.6 (a) What type of power is best used to describe the behaviour of a manager who is refusing a request for one of his team members to help with the workload of another department?

- A Expert power
- B Negative power
- C Coercive power
- D Physical power

(1 mark)

- (b) Fiedler, Heifetz and Bennis are theorists who wrote about management and leadership. Match each of the statements below with each theorist's findings.

- (i) Individuals at all levels can exert a leadership influence
- (ii) There are 'psychologically close' and 'psychologically distant' managers
- (iii) The manager 'does things right' while the leader 'does the right thing'

23.1 (a) Which **two** of the following conditions would show that a task is important to an organisation?

- A The task will satisfy a key customer
- B The task comes in an email marked urgent
- C The task will add value to the organisation
- D The task has already been delegated by two superiors

(2 marks)

(b) Are the following statements true or false?

- (i) A meeting without a clear objective will always give value to everyone attending for the time taken.
- (ii) Time management can be improved by setting aside times when an individual is not contactable by others.

(2 marks)

23.2 (a) Trevor, Joss, Michael and Leona are all managers in HGF Co experiencing conflict in their teams. Trevor responds to conflict by encouraging the individuals to bargain and negotiate.

Joss puts emphasis on the task in hand and stresses that the group effort must be superior to individual effort.

Michael likes to use his power as manager to force a settlement on his team. This causes some resentment amongst his team members.

Leona ignores the conflict in the hope that the issue is trivial and the team will then continue to operate as normal.

The following are management responses to conflict:

- A Denial
- B Compromise
- C Dominance
- D Integration/Collaboration

For each manager, select the response that they use to conflict.

- (i) Trevor
- (ii) Joss
- (iii) Michael
- (iv) Leona

(2 marks)

(b) Are the following statements about conflict resolution true or false?

- (i) Compromises result in all parties being satisfied
- (ii) A win-win situation is rare, but is the best solution to conflict resolution
- (iii) A lose-lose situation is not possible
- (iv) Win-lose situations can result in damaged relationships within the team **(2 marks)**

- 23.3 (a) Is each of the following either
- A Data

27 Mixed Bank 2**48 mins**

27.1 Which three of the following did Henri Fayol include in his five functions of management?

- (i) Motivating
 - (ii) Co-ordinating
 - (iii) Commanding
 - (iv) Controlling
- A (i), (ii) and (iii)
B (ii), (iii) and (iv)
C (i), (ii) and (iv)
D (i), (iii) and (iv)

(2 marks)

27.2 Which one of the statements below **best** describes contingency theory?

- A Organisational design will be determined by a number of factors all of which depend on the others
- B Companies must plan for changes to their organisation
- C Companies should focus on the short-term as the future is uncertain

(1 mark)

27.3 Peter Drucker grouped management activities or operations into five categories.

Which of the following is not one of those categories?

- A Setting objectives
- B The job of measurement
- C Planning and control

(1 mark)

27.4 Different types of power may be exercised within an organisation any different individuals.

Which type of power is associated with formal authority?

- A Resource power
- B Expert power
- C Position power

(1 mark)

27.5 Rensis Likert identifies four management styles. What are they?

- A Benevolent autocratic, participative, democratic, exploitative autocratic
- B Benevolent authoritative, participative, exploitative authoritative, democratic
- C Exploitative autocratic, benevolent autocratic, participative, laissez faire
- D Benevolent autocratic, consultative participative, exploitative, laissez faire

(2 marks)

27.6 A company has established a project team to design a new information system. The team has had a few meetings to discuss how they are going to tackle the work, and who would do what, but some early ideas have been unsuccessful. Group members are still putting forward a number of very innovative ideas, but they often disagree strongly with each other. The group members appear to be dividing into two 'camps' each of which has an unofficial 'leader'. These two individuals agree about very little and appear to dislike each other. According to Tuckman, which stage in development has the project team reached?

- A Norming
- B Performing
- C Storming

(1 mark)

27.7 In the context of human resource planning, which **two** of the following documents are the outputs of a process of job analysis?

- (i) Human resource plan
- (ii) Job description
- (iii) Person specification
- (iv) Performance appraisal

- A (i) and (ii)
- B (i) and (iii)
- C (ii) and (iv)
- D (ii) and (iii)

(2 marks)

27.8 Belbin described the most effective character mix in a team. This involves eight necessary roles, which should ideally be balanced and spread in a team.

A person who is highly strung, extrovert and passionate about the task fits into which of Belbin's roles?

- (i) Plant
- (ii) Completer Finisher
- (iii) Resource investigator
- (iv) Shaper

- A (i), (ii) and (iii)
- B (ii), (iii) and (iv)
- C (i), (ii) and (iv)
- D (i), (iii) and (iv)

(2 marks)

27.9 Which one of the following team member roles is not from Belbin's list of group rules?

- A Shaper
- B Plant
- C Attacker
- D Finisher

(2 marks)

27.10 Which of the following are positive aspects of teamworking?

- (i) Control
- (ii) Work organisation
- (iii) Knowledge generation
- (iv) Decision making

- A (i), (ii) and (iii)
- B (i) and (ii)
- C (i), (ii) and (iv)
- D All four

(2 marks)

27.11 Tuckman identified four stages in group development, which occur in a particular order. What is the order in which the stages occur?

- A Forming, storming, norming, performing
- B Forming, storming, performing, norming
- C Storming, norming, forming, performing
- D Storming, forming, performing, norming

(2 marks)

27.12 'The justification for empowering workers, or removing levels in hierarchies that restrict freedom, is that not only will the job be done more effectively but the people who do the job will get more out of it in terms of growth, challenge, responsibility and self-fulfilment'.

The thinking is in line with which management writer?

- A Herzberg
- B Fayol
- C Taylor
- D Weber

(2 marks)

27.13 Bruce has been on a training course to help him develop his negotiation skills and learn some new techniques.

He has been practising three of these back in the office – can you identify them?

- (i) Look for a wide variety of possible solutions
- (ii) Try to develop options that would result in mutual gain
- (iii) Create a trusting supportive atmosphere in group
- (iv) Define the problem carefully

- A (i), (ii) and (iii)
- B (ii), (iii) and (iv)
- C (i), (ii) and (iv)
- D (i), (iii) and (iv)

(2 marks)

27.14 There are many different methods of communication, each with its own features and limitations. Can you identify the three features/advantages of conversation as a communication technique from the list below?

- (i) Requires little or no planning
- (ii) Gives a real impression of feelings
- (iii) Complex ideas can be communicated
- (iv) Usually unstructured so can discuss a wide range of topics

- A (i), (ii) and (iii)
- B (ii), (iii) and (iv)
- C (i), (ii) and (iv)
- D (i), (iii) and (iv)

(2 marks)

27.15 Which of the following would Herzberg class among 'hygiene factors'?

- (i) Salary
- (ii) Job security
- (iii) Gaining recognition
- (iv) Challenging work

- A (ii) and (iv) only
- B (i) only
- C (i), (ii), (iii) and (iv)
- D (i) and (ii)

(2 marks)

27.16 Vocabulary and style should contribute to the clarity of message in a presentation. It is recommended that short simple sentences are used and the presenter should avoid certain expressions. Which three from the following list should be avoided?

- (i) Acronyms
- (ii) Jargon
- (iii) Colloquialisms
- (iv) Double meanings

- A (i), (ii) and (iii)
- B (ii), (iii) and (iv)
- C (i), (ii) and (iv)
- D (i), (iii) and (iv)

(2 marks)

27.17 Electronic mail has so many features and advantages that it is easy to forget that there may be limitations associated with it. Can you identify the disadvantages of email from the list below?

- (i) People may not check their email regularly
- (ii) Complex images do not transmit well
- (iii) Requires some computer literacy to use effectively
- (iv) Lack of privacy – can be forwarded without your knowledge

- A (i), (ii) and (iii)
- B (ii), (iii) and (iv)
- C (i), (ii) and (iv)
- D (i), (iii) and (iv)

(2 marks)

27.18 For a formal meeting, in which order would you expect the following items to appear on the agenda?

- 1 Subjects for discussion
- 2 Minutes of previous meeting
- 3 Date of next meeting
- 4 Any other business
- 5 Apologies for absence
- 6 Matters arising

- A The sequence is 5, 2, 6, 1, 4, 3
- B The sequence is 5, 2, 1, 6, 3, 4
- C The sequence is 2, 5, 1, 6, 3, 4

(1 mark)

27.19 A 360° (or multi-source) appraisal collects feedback on an individual's performance from sources such as the person's immediate superior and also his or her immediate subordinates. Identify these other sources from the list below.

- (i) Peers
- (ii) Customers
- (iii) Self-appraisal
- (iv) Family and friends

- A (i), (ii) and (iii)
- B (ii), (iii) and (iv)
- C (i), (ii) and (iv)
- D (i), (iii) and (iv)

(2 marks)

27.20 What type of appraisal occurs when employees judge managers?

- A Peer
- B Traditional
- C Upward

(1 mark)

27.21 Which one of the following is not a general aim of an appraisal system?

- A Identify potential
- B Deal with grievances
- C Reward attainment
- D Measure performance

(2 marks)

27.22 Which one of the following is the person least likely to be requested to fill out feedback forms for use in a 360 degree appraisal of a sales account manager?

- A Accounts payable clerk
- B Credit sales clerk
- C Direct customer

(1 mark)

27.23 Which of the following is not a characteristic of a learning organisation?

- A Learning climate
- B Enabling accounting
- C Reward flexibility

(1 mark)

27.24 Upward appraisal is used by some businesses. This involves staff giving their opinions on the performance of their managers. There are problems with this method, which include three of the following.

Can you identify them?

- (i) Employee point scoring
- (ii) Fear of reprisal
- (iii) The chance of bias is increased
- (iv) Lack of authority

- A (i), (ii) and (iii)
- B (ii), (iii) and (iv)
- C (i), (ii) and (iv)
- D (i), (iii) and (iv)

(2 marks)

28.1 Which of the following is an acronym used to describe the key elements of an organisation's external environment?

- A PERT
- B PEST
- C SWOT

(1 mark)

28.2 Henry Mintzberg categorised five basic components of an organisation.

Which **two** of the following statements describes the work of the technostructure of an organisation?

- 1 Designing systems
- 2 Organising and controlling work
- 3 Standardising work
- 4 Securing inputs

- A 1 and 2
- B 1 and 3
- C 2 and 3
- D 3 and 4

(2 marks)

28.3 Which of the following is a correct definition of the term 'span of control'?

- A The number of employees reporting to one manager
- B The number of managers to whom one employee reports
- C The number of levels in the hierarchy
- D The number of employees at each level of the organisation

(2 marks)

28.4 To whom is the internal auditor accountable?

- A The directors of the company
- B The employees of the company
- C The shareholders of the company

(1 mark)

28.5 SPAMSOAP is a mnemonic for the types of internal control employed by an organisation.

Which **two** of the following are types of internal control included in SPAMSOAP?

- 1 Output
- 2 Arithmetic
- 3 Preventative
- 4 Physical

- A 1 and 2
- B 1 and 3
- C 2 and 3
- D 2 and 4

(2 marks)

28.6 Which of the following are typical responsibilities of the financial accountant in a large organisation?

- 1 Inventory valuation
- 2 Sales invoicing
- 3 Project appraisal
- 4 Payroll

- A 1 and 2
- B 2 and 4
- C 1 and 4
- D 3 and 4

(2 marks)

28.7 Who was responsible for developing the 'Situational Leadership' model?

- A Blake and Mouton
- B Katz and Kahn
- C Hersey and Blanchard
- D Tannenbaum and Schmidt

(2 marks)

28.8 Which of the following statements accurately describes a multi-disciplinary team?

- A All team members collaboratively decide how to organise their work
- B All team members have different skills and specialisms which they pool
- C All team members can perform any and all of the group's tasks
- D All team members are jointly responsible for the leadership of the team

(2 marks)

28.9 Which **two** of the following are examples of content theories of motivation?

- 1 Maslow's hierarchy of needs
- 2 Vroom's expectancy theory
- 3 Herzberg's two factor theory
- 4 Adam's equity theory

- A 1 and 2
- B 2 and 4
- C 2 and 3
- D 1 and 3

(2 marks)

28.10 Which **two** of the following are examples of 'on the job' training?

- 1 Formal training courses
- 2 Mentoring by a colleague
- 3 Self study courses
- 4 Secondments to other departments

- A 1 and 2
- B 2 and 3
- C 3 and 4
- D 2 and 4

(2 marks)

28.11 If a manager in the purchasing department requests the help of the Human Resources Director in preparing for a difficult appraisal, what direction is the communication flow?

- A Vertical
- B Horizontal
- C Diagonal

(1 mark)

28.12 Honey and Mumford classified four different learning styles.

Which of the following statements accurately describes the reflector?

- A Prefers to understand principles
- B Prefers to think things through first
- C Prefers to try things 'hands on'
- D Prefers to see practical examples

(2 marks)

28.13 'An organisation is a social arrangement which pursues collective....., which controls its own performance and which has a boundary separating it from its environment.'

Which of the following words best completes this sentence?

- A Ambitions
- B Duties
- C Goals

(1 mark)

28.14 From the list below, pick out two of Mintzberg's organisational components

- (i) Strategic apex
- (ii) Technicians
- (iii) Specialists
- (iv) Support staff

- A (i) and (ii)
- B (ii) and (iii)
- C (i) and (iv)
- D (ii) and (iv)

(2 marks)

28.15 Which of the following are examples of weak financial control procedures?

- A Suppliers not being paid on time
- B Debtors not paying within credit limits
- C Excessive bad or doubtful debts
- D All of the above

(2 marks)

28.16 In a typical finance function, budgets and budgetary control would usually be the responsibility of which of the following roles?

- A The Financial Controller
- B The Management Accountant
- C The Chief Executive

(1 mark)

28.17 Which function in an organisation is responsible for ensuring that only properly authorised purchases which are necessary for the business are made?

- A Dispatch
- B Internal audit
- C Purchasing/procurement

(1 mark)

28.18 What is the term given to a method of fraud in the accounts receivable area, by which cash or cheque receipts are stolen, and the theft concealed by setting subsequent receipts against the outstanding debt?

- A Collaboration
- B Topping and tailing
- C Teeming and lading
- D Understating sales

(2 marks)

28.19 Which of the following are purposes of a receivables control account?

- (i) A sales ledger control account provides a check on the arithmetical accuracy of the personal ledger
- (ii) A sales ledger control account helps to improve separation of duties
- (iii) A sales ledger control account ensures that there are no errors in the personal ledger
- (iv) Control accounts deter fraud

- A (i), (ii) and (iii)
- B (ii), (iii) and (iv)
- C (i), (ii) and (iv)
- D (i), (iii) and (iv)

(2 marks)

28.20 A is a program which deals with one particular part of a computerised business accounting system.

Which of the following terms correctly completes this definition?

- A Suite
- B Module
- C Spreadsheet

(1 mark)

28.21 Power arising from an individual's formal position in the organisation is called:

- A Coercive power
- B Legitimate power
- C Expert power
- D Negative power

(2 marks)

28.22 What is the most important attribute of a 'group', which distinguishes it from a random crowd of people?

- A Leadership
- B Goals
- C Function
- D Identity

(2 marks)

28.23 Which of Belbin's nine roles does the following description apply to? Single-minded, self-starting, dedicated.

- A Chairman
- B Specialist
- C Co-ordinator
- D Teamworker

(2 marks)

28.24 Which of the following is a category in Maslow's hierarchy of needs theory?

- A Self determination
- B Need for affiliation
- C Safety needs

(1 mark)

29.1 William Ouchi identified three types of control.

Which of the following is not one of those?

- A Bureaucratic control
- B Market control
- C Output control
- D Clan control

(2 marks)

29.2 From the list below, identify the one that doesn't have the attributes of a group.

- A The finance department of an organisation
- B An orchestra
- C A football team
- D Five pop fans

(2 marks)

29.3 Which of the following is most clearly a sign of an ineffective group?

- A Internal disagreement and criticism
- B Passive acceptance of work decisions
- C Competition with other groups

(1 mark)

29.4 A leader may be distinguished from a manager by lack of dependency on:

- A Position power
- B Expert power
- C Personal power
- D Physical power

(2 marks)

29.5 Delegation is needed in organisations to enable a distribution of work in the organisation. Select the two best reasons why managers may be reluctant to delegate.

- (i) Doesn't trust staff to carry out delegated tasks
- (ii) Wants to control all activities under his or her responsibility
- (iii) The organisation is dynamic and turbulent with constant changes
- (iv) Is new and doesn't know how competent staff are

- A (i) and (ii)
- B (ii) and (iii)
- C (iii) and (iv)
- D (i) and (iv)

(2 marks)

29.6 Bill has been on a training course to learn negotiation skills. Which of the following are negotiation skills.

- (i) Look for a wide variety of possible solutions
- (ii) Define the problem carefully
- (iii) Evaluate progress towards objectives
- (iv) Try to develop objectives resulting in mutual gains

- A (i), (ii) and (iii)
- B (ii), (iii) and (iv)
- C (i), (ii) and (iv)
- D (i), (iii) and (iv)

(2 marks)

29.7 Leadership involves activities that are generally people-centred. Which of the following doesn't fall into this category?

- A Creating the culture
- B Inspiring and motivating others
- C Reconciling individual needs with the requirements of the organisation
- D Allocating scarce resources

(2 marks)

29.8 Which of the following describes an employee duty, rather than an employer duty under Health and Safety legislation?

- A To keep all plant and machinery up to a necessary standard
- B To ensure all work practices are safe
- C To take reasonable care of themselves

(1 mark)

29.9 Every organisation has a boundary that separates it from its environment. From an organisation's point of view, which two of the following would be part of the organisation's environment?

- (i) Shareholders
- (ii) Customers
- (iii) Sales team
- (iv) Purchasing department

- A (i) and (ii)
- B (ii) and (iii)
- C (iii) and (iv)
- D (i) and (iv)

(2 marks)

29.10 Which of the following disciplinary actions may be used only if it is (they are) provided for in the employee's contract of employment?

- (i) Suspension without pay
- (ii) Dismissal
- (iii) Demotion
- (iv) Suspension with pay

- A (i) and (ii)
- B (ii) and (iii)
- C (iii) and (iv)
- D (i) and (iv)

(2 marks)

29.11 Which type of culture according to Handy's cultural models would best fit with a matrix structure?

- A Person
- B Role
- C Power
- D Task

(2 marks)

29.12 Who said 'Culture is the way we do things around here'.

- (i) Handy
- (ii) Schein
- (iii) Harrison
- (iv) Deal and Kennedy

- A (i) only
- B (i) and (ii)
- C (i) and (iii)
- D (iv) only

(2 marks)

29.13 Which of the following are connected stakeholders to an organisation?

- 1 Employees
 - 2 Suppliers
 - 3 Managers
 - 4 Customers
-
- A 1 and 3
 - B 1 and 4
 - C 2 and 4
 - D 2 and 3

(2 marks)

29.14 Henry Mintzberg categorised five basic components of an organisation.

Which of the following statements describes the work of the strategic apex of an organisation?

- A Ensuring the organisation pursues its objectives and serves the needs of its owners and stakeholders
- B Securing inputs and processing and distributing them as outputs
- C Organising, planning and controlling work and acting as an interface

(1 mark)

29.15 Which of the following are typical responsibilities of the management accountant in a large organisation?

- 1 Processing sales invoices
 - 2 Reconciling cash balances with bank statements
 - 3 Planning and preparing budgets
 - 4 Appraisal of capital investment projects
-
- A 1 and 3
 - B 2 and 4
 - C 1 and 4
 - D 3 and 4

(2 marks)

29.16 Lack of control over which of the following activities can lead to the fraudulent practice of teeming and lading?

- A Non-current asset register
- B Budgetary system
- C Inventory management
- D Sales ledger and receipts

(2 marks)

29.17 Which of the following statements identifies three broad requisites for fraud?

- A Collusion, opportunity, motivation
- B Dishonesty, opportunity, motivation
- C Opportunity, collusion, dishonesty

(1 mark)

29.18 Which type of audit is concerned with the evaluation and testing of the internal controls within an organisation?

- A Systems
- B Management
- C Transactions

(1 mark)

29.19 To which of the following cultural types did Charles Handy give the name of the Greek god Dionysus?

- A Power/club culture
- B Person culture
- C Role culture
- D Task culture

(2 marks)

29.20 Which of the following describes the 'impoverished' style of management identified by Blake and Mouton's managerial grid?

- A High concern for people and a low concern for the task
- B Low concern for people and a high concern for the task
- C Low concern for people and low concern for the task

(1 mark)

29.21 According to Belbin, the success of a group can depend on the balance of individual skills and personality types.

Which of the following statements are characteristics of the 'shaper'?

- A Calm, self confident and controlled – coordinating and operating through others
- B Concerned with the relationships within the group, supportive and tends to diffuse conflict
- C Highly-strung, outgoing and dynamic and committed to the task
- D Orderly, conscientious, anxious and ensures that timetables are met

(2 marks)

29.22 Which of the following statements describes the correct sequence between sender and receiver within the communication cycle?

- A Encoded message, medium, decoded message
- B Medium, encoded message, decoded message
- C Decoded message, encoded message, medium

(1 mark)

29.23 According to the Ashridge studies on leadership style, what is most important to subordinates about the style of their leader?

- A Consultation
- B Direction
- C Consistency

(1 mark)

29.24 Which of the following must be in a job description?

- 3 Hours of work
- 4 Job content

- A 1 and 3
- B 2 and 4
- C 1 and 4
- D 2 and 3

(2 marks)

(Total = 40 marks)

30 Mixed Bank 5**48 mins**

30.1 Which **two** of the following are advantages of computerised accounting packages over manual systems?

- 1 They make it easier to see where a mistake has been made
- 2 They can be used by non-specialists
- 3 They provide more consistent processing than manual systems
- 4 They are less expensive to implement

- A 1 and 2
- B 1 and 4
- C 3 and 4
- D 2 and 3

(2 marks)

30.2 Which of the following is normally subject to the most direct government regulation?

- A Employment protection
- B Corporate social responsibility
- C Corporate governance

(1 mark)

30.3 Fish and chips are considered complementary products. If the price of fish rises, what will the impact be in demand for chips?

- A Rises
- B Stays the same
- C Falls

(1 mark)

30.4 For which **two** of the following does the external auditor have responsibility?

- 1 Evaluating the efficiency of systems and procedures
- 2 Reporting to shareholders
- 3 Detecting fraud
- 4 Giving an opinion on financial statements

- A 1 and 2
- B 1 and 3
- C 2 and 4
- D 3 and 4

(2 marks)

30.5 A medium sized manufacturing firm produces a number of reports, for example, production and materials reports, marketing reports, personnel reports and financial reports.

Which **two** of the following would you expect to see in a production and materials report?

- 1 Transport costs
- 2 Wastage rates
- 3 Labour utilisation figures
- 4 Sales analyses

- A 1 and 2
- B 2 and 3
- C 2 and 4
- D 3 and 4

(2 marks)

30.6 Which of the following is a feature of a structured decision?

- A There is a formal process for decision-making
- B The decision variables are very complex
- C The information needed for decision-making is unpredictable
- D The manager's experience and intuition play a large part in making the decision

(2 marks)

30.7 Who was responsible for developing the 'two-factor theory' of motivation?

- A Herzberg
- B Maslow
- C Vroom

(1 mark)

30.8 Which of the following statements describes coercive power?

- A Power associated with a particular role or status
- B Power associated with physical force or punishment
- C Power associated with control over physical resources
- D Power associated with individual personality and attitudes

(2 marks)

30.9 Which **two** of the following are parts of the job of a supervisor?

- 1 Managing team performance
- 2 Co-ordinating departmental objectives
- 3 Developing strategic plans
- 4 Organising the work of others

- A 1 and 3
- B 1 and 4
- C 2 and 4
- D 2 and 3

(2 marks)

30.10 Which of the following employee selection methods has the highest 'predictive validity': that is, which is best at predicting a candidate's performance in the job?

- A Interviews
- B Personality testing
- C Assessment centres
- D Work sampling

(2 marks)

30.11 The concept of is based on the belief that the types of individual difference which are protected by anti-discrimination legislation are crude and irrelevant to successful performance, and that an organisation can benefit from embracing all kinds of difference.

Which words correctly complete this sentence?

- A Equal opportunity
- B Managing diversity
- C Diversification

(1 mark)

30.12 Kolb provides a useful descriptive model of adult learning.

Which of the following is the correct sequence of the four stages of the learning cycle?

- A Active experimentation, observation and reflection, abstract conceptualisation, concrete experience
 - B Concrete experience, abstract conceptualisation, active experimentation, observation and reflection
 - C Abstract conceptualisation, observation and reflection, active experimentation, concrete experience
 - D Concrete experience, observation and reflection, abstract conceptualisation, active experimentation
- (2 marks)**
-

30.13 Which of the following features of organisational structure is **not** associated with flexibility and adaptability?

- A Horizontal structure
 - B Shamrock organisation
 - C Scalar chain
- (1 mark)**
-

30.14 Which of the following is the role of the secretary of a committee?

- A Guiding discussion in committee meetings
 - B Selecting members of the committee
 - C Taking and circulating minutes of the meeting
 - D Determining the agenda of the meeting
- (2 marks)**
-

- A Zeus
 - B Apollo
 - C Athena
 - D Dionysus
- (2 marks)**
-

30.16 Which of the following factors help shape an organisation's culture?

- (i) The person who founded the organisation
 - (ii) The failures and successes experienced by the organisation
 - (iii) Recruitment and selection
 - (iv) The industry the organisation is in
 - (v) Labour turnover
- A (ii) and (iv) only
 - B (i), (ii) and (iv) only
 - C (ii), (iii) and (iv) only
 - D (i), (ii), (iii), (iv) and (v)
- (2 marks)**
-

30.17 In the context of the different levels of objectives that an organisation may pursue, environmental protection regulations would represent which of the following categories?

- A Primary economic objective
 - B Non-economic, social objective
 - C Responsibility
 - D Boundary
- (2 marks)**
-

30.18 Three of the following are recognised advantages of a framework-based approach to ethical codes. Which is the exception?

- A Encourages proactive discussion of issues
 - B Encourages consistent application of rules
 - C Suits complex situations and evolving environments
 - D Encourages professional development
- (2 marks)**

30.19 The following, with one exception, are 'building blocks' for team building. Which **one** is the 'blockage'?

- A Diverse mix of personalities
 - B Members do not challenge or criticise
 - C Regular reviews of performance
- (1 mark)**

30.20 Which one of the following would be identified as a problem with the role of non-executive director?

- A External stakeholder security
 - B Time available to devote to the role
 - C Objective viewpoint
- (1 mark)**

30.21 In the context of corporate social responsibility, which two of the following might 'sustainability' involve?

- (i) Using local suppliers
 - (ii) Maintaining long-term relationships with suppliers
 - (iii) Minimising energy consumption
 - (iv) Ethical employment practices
- A (i) and (ii)
 - B (i) and (iii)
 - C (ii) and (iv)
 - D (iii) and (iv)
- (2 marks)**

30.22 is the study of the aggregated effects of the decisions of individual economic units (such as households or businesses).

Which word correctly completes this sentence?

- A Demographics
 - B Globalisation
 - C Macro-economics
- (1 mark)**

30.23 Government can directly affect an organisation by influencing

- 1 Demand
 - 2 Capacity expansion
 - 3 Competition
- A 1 and 2
 - B 1 and 3
 - C 2 and 3
 - D 1, 2 and 3
- (2 marks)**

30.24 In relation to fraud prevention, what objective should external auditors have in designing and implementing their audit procedures?

- A A reasonable prospect of detecting irregular statements or records
 - B The identification of every inconsistency or error within the records
 - C To provide a systematic check of every recorded transaction
 - D To verify pre-determined samples of all types of records
- (2 marks)**

31.1 Which of the following groups are the owners of a limited company?

- A Non-executive directors
- B Stakeholders
- C Shareholders

(1 mark)

31.2 Which of the following correctly describes the meaning of Mintzberg's term: 'technostructure'?

- A Analysts such as accountants and workplanners, whose objective is to effect standardisation in the organisation
- B The range of technology needed for effective organisational performance
- C The organisation of shopfloor workers and their supervisors in a manufacturing environment
- D The central strategy-setting component of organisation structure

(2 marks)

31.3 Z plc sources a range of complex components from suppliers which are critical to the quality of Z plc's final product. Any disruption to the supply of these components will mean that Z plc cannot maintain its service levels to its own customers.

In the purchasing of these components, which **two** of the following are **least** likely to be a component of Z plc's supply strategy?

- (i) Long-term partnership relations with key suppliers of the components
 - (ii) A small number of suppliers of the components
 - (iii) Outsourcing production of the product to low-cost countries
 - (iv) Consolidating purchases of the components and sourcing from a single supplier to reduce sourcing costs
- A (i) and (ii)
 - B (ii) and (iii)
 - C (iii) and (iv)
 - D (i) and (iv)

(2 marks)

31.4 In Robert Anthony's hierarchy, which of the following is the term given to the process of establishing means to corporate ends, mobilising resources and innovating?

- A Strategic management
- B Tactical management
- C Operational management

(1 mark)

31.5 is the system by which organisations are directed and controlled by their senior officers.

Which two words correctly complete this definition?

- A Corporate governance
- B Strategic management
- C Executive directorship
- D Internal controls

(2 marks)

31.6 Which of the following statements is true of a 'progressive tax'.

- A It takes a higher proportion of a poor person's salary than of a rich person's.
- B It takes the same proportion of income in tax from all levels of income.
- C It takes a higher proportion of income in tax as income rises.

(1 mark)

31.7 In employment protection law, which of the following would constitute unfair dismissal?

- A Dismissal because the employer has ceased to carry on the business
 - B Dismissal because the employer has relocated the place of work
 - C Dismissal because demand for the type of work done by the employee(s) is expected to decline
 - D Dismissal because the employee is pregnant
- (2 marks)**

31.8 Various groups of people might be interested in financial information about an organisation, for various reasons.

Match up each of the following groups with the primary nature of their interest in financial information.

| <i>Groups</i> | | <i>Interest</i> |
|------------------|---|--|
| (i) Shareholders | 1 | Ability to maintain and repay loans |
| (ii) Financiers | 2 | Potential social contributions and impacts |
| (iii) Employees | 3 | Management stewardship |
| (iv) Public | 4 | Attainment of performance objectives |

- A (i)2, (ii)4, (iii)1, (iv)3
- B (i)4, (ii)3, (iii)2, (iv)1
- C (i)1, (ii)2, (iii)3, (iv)4
- D (i)3, (ii)1, (iii)4, (iv)2

(2 marks)

31.9 The website of a university contains a dedicated site for academic researchers, giving them access to the university's archived material, if they register and obtain a password to enter the site.

Of which type of network is this an example?

- A Internet
- B Intranet
- C Extranet

(1 mark)

31.10 Which of the following is a feature of an ineffective job advertisement?

- A It narrows the pool of people who might go on to apply for the job
- B It provides all information necessary to make an application
- C It maximises the attractiveness of the job and organisation to potential applicants
- D It is relevant and appropriate to the nature of the job and the desired applicants

(2 marks)

31.11 There are three pre-requisites for fraud: motivation, opportunity and dishonesty. Match each of these with the most immediate control strategy from the following list.

Control strategies

- 1 Recruitment reference checking
- 2 Disciplinary codes
- 3 Internal checks and controls

- (i) Motivation
- (ii) Opportunity
- (iii) Dishonesty

- A 1(i), 2(ii), 3(iii)
- B 1(iii), 2(i), 3(ii)
- C 1(ii), 2(iii), 3(i)
- D 1(iii), 2(ii), 3(i)

(2 marks)

31.12 In which **one** of the following areas does a database system have significant advantages?

- A Data security
- B Data privacy
- C Development cost
- D Data management

(2 marks)

31.13 The Studies is the name given to experimental social research initiated by Elton Mayo, which identified the influence exercised by social needs and informal groups in the workplace, and gave rise to the human relations school of management.

Which word correctly completes the sentence?

- A Hofstede
- B Hawthorne
- C Ashridge
- D Mintzberg

(2 marks)

31.14 In strategic planning, what is the purpose of environmental scanning?

- A To monitor PEST factors
- B To appraise SWOT factors
- C To monitor competitive forces

(1 mark)

31.15 What is the main focus of International Accounting Standards (IASs)?

- A Financial control
- B Accountancy training
- C Financial reporting
- D Corporate governance

(2 marks)

31.16 A large supermarket chain has purchased land for a new out-of-town shopping development in an area of recognised natural beauty. The organisation is now preparing plans for infrastructure development (road access, parking, power) and construction.

Into which quadrant of the above power/interest matrix would the organisation place local nature appreciation groups, and what strategy does this indicate?

- A Consult and involve
- B Keep informed
- C Keep satisfied
- D Minimal effort

(2 marks)

31.17 What is a fraud response plan?

- A A strategy for preventing and controlling fraud
- B A framework of disciplinary rules and sanctions to be applied when fraud is discovered
- C A strategy for investigating and dealing with the consequences of suspected or identified fraud

(1 mark)

31.18 In which **one** of the following areas is economic growth most clearly beneficial, as an objective of macro-economic policy?

- A Employment
- B Public services
- C Environment

(1 mark)

31.19 According to Warren Bennis, which **two** of the following attributes distinguishes a leader, as opposed to a manager?

- (i) Administers and maintains
- (ii) Focuses on people
- (iii) Innovates
- (iv) Focuses on systems

- A (i) and (ii)
- B (ii) and (iii)
- C (iii) and (iv)
- D (i) and (iv)

(2 marks)

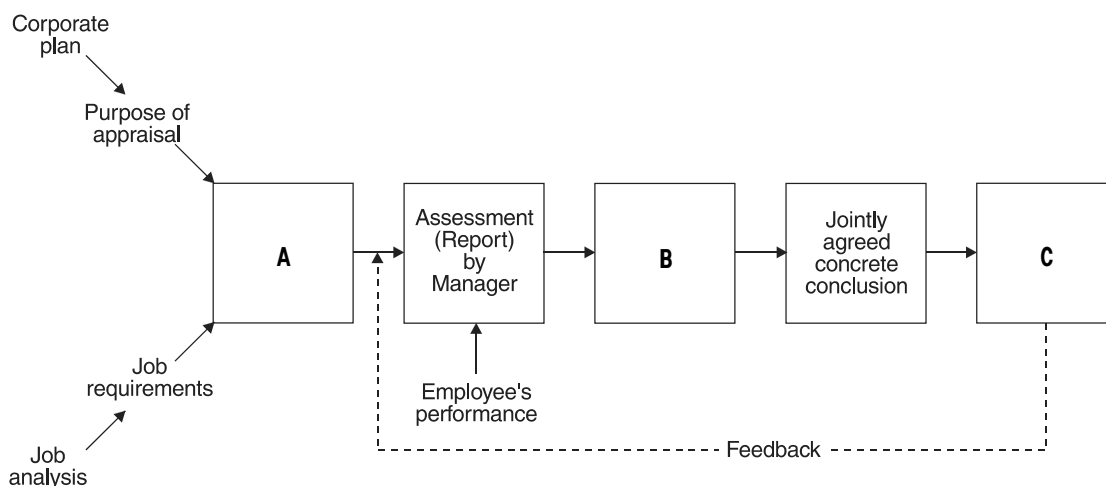

31.20 Comfy Dentiality, a large dental practice, is concerned with the security of its patient records. The manager amends the disciplinary rules of the practice, so that unauthorised disclosure of data by personnel can be made grounds for dismissal.

What type of approach to data security does this reflect?

- A Correction
- B Detection
- C Threat avoidance
- D Deterrence

(2 marks)

31.21

Referring to the above diagram of an appraisal system, identify which of the following labels correctly fills each of the missing labels A, B and C.

Labels:

- 1 Assessment interview
- 2 Follow up action
- 3 Criteria for assessment

- A A1, B2, C3
- B A2, B3, C1
- C A3, B1, C2
- D A1, B3, C2

32.1 In a payroll system, which of the following actions would **not** require authorisation, as a standard control measure?

- A Engagement or discharge of employees
- B Changes in pay rates
- C Statutory deductions from pay
- D Overtime payments

(2 marks)

32.2 At a chocolate manufacturing company, one of the production mixers has recently been made redundant. Fellow shop-floor staff are outraged: he was 'the only one who knew anything about chocolate' and they had relied on his judgement for years. Protests are ignored. A week later, cement is found in a batch of crunchy bars. Two weeks later, staff refuse to work overtime. The mixer is finally reinstated.

Which **two** types of power are illustrated in this scenario by the mixer and the shop floor staff?

- (i) Position power
 - (ii) Expert power
 - (iii) Personal power
 - (iv) Negative power
- A (i) and (ii)
 - B (ii) and (iii)
 - C (ii) and (iv)
 - D (iii) and (iv)

(2 marks)

32.3 In a particular work team, Jemima is acknowledged to be the 'ideas' person who 'thinks outside the box' with creative solutions to difficult problems. However, she tends to look at the big picture, not at the details. Frank spots the gaps in Jemima's suggestions, and encourages the team to consider other options.

Match each character in this scenario with the role that they occupy in Belbin's team role model.

| <i>Characters</i> | <i>Roles</i> |
|-------------------|---------------------|
| A Jemima | 1 Monitor-Evaluator |
| B Frank | 2 Team worker |
| | 3 Plant |

- A A1, B2
- B A1, B3
- C A2, B2
- D A3, B1

- 32.4 Which of the following statements about outsourcing is true?
- A In order to maintain control, the organisation should outsource activities in areas of its own core competence.
 - B Outsourcing to external contractors harnesses specialist expertise, but at the cost of lost economies of scale.
 - C Outsourcing carries commercial and reputational risks. **(1 mark)**
-

- 32.5 Victor Vroom's 'expectancy theory' is an example of which type of motivational theory?
- A Content theory
 - B Process theory
 - C Hierarchy theory **(1 mark)**
-

- 32.6 In the context of improving organisational communication, which **one** of the following would be helpful measures in addressing the problem of information overload on managers?
- A Using email
 - B Introducing reporting by exception
 - C Holding regular staff meetings
 - D Speed reading training for managers **(2 marks)**
-

- 32.7 Which one of the following is represented by Blake and Mouton's managerial grid?
- A The balance in a manager's leadership style between concern for the task and concern for people and relationships
 - B The success of a manager's performance, for the purposes of appraisal
 - C A manager's position on the continuum between concern for task and concern for people and relationships
 - D A matrix organisation structure, combining functional and line authority **(2 marks)**
-

- 32.8 In the context of selection interviewing, which **two** of the following types of question might you use to pin down a candidate who seems reluctant or unable to give a definite answer?
- (i) Open
 - (ii) Closed
 - (iii) Leading
 - (iv) Probing
 - A (i) and (ii)
 - B (i) and (iii)
 - C (i) and (iv)
 - D (ii) and (iv) **(2 marks)**
-

- 32.9 In the context of motivation, workers may have the attitude that work is not an end in itself, but a means to other ends, through earning financial rewards.
What term is given to this attitude?
- A Theory Y
 - B Job enrichment
 - C Instrumental orientation **(1 mark)**
-

- 32.10 In the context of performance appraisal, what does the term 'tell and listen' refer to?
- A An approach to appraisal interviewing
 - B An approach to upward appraisal
 - C A barrier to effective appraisal **(1 mark)**
-

32.11 Which of the following statements about training and development is false?

- A A gap between current performance and required performance is a learning gap which requires training.
- B Training and development activities can have measurable benefits for organisations.
- C Education may form part of training, which in turn may form part of employee development.
- D A 'learning organisation' is one which facilitates the learning of all its members.

(2 marks)

32.12 According to the hierarchy of needs (a motivational theory put forward by Maslow) which **two** of the following rewards might you pursue in order to have your esteem needs satisfied?

- (i) Opportunity to undertake further professional development
- (ii) Award of a departmental prize for your performance
- (iii) Receiving praise on an achievement from your work team
- (iv) Being invited to join colleagues for lunch

- A (i) and (ii)
- B (ii) and (iii)
- C (iii) and (iv)
- D (i) and (iv)

(2 marks)

32.13 If a team has been functioning for some time, it may grow complacent with its performance, and start to devote more attention to relationship and power issues within the group.

In the group development model, which of the following terms would be used for this stage of the team's development?

- A Forming
- B Norming
- C Dorming
- D Storming

(2 marks)

32.14 In a typical recruitment and selection process, in what order would the following steps be carried out. Assign each a number in the sequence, from 1 (first) to 5 (last).

- (i) Preparing job descriptions
- (ii) Selection interviewing
- (iii) Reference checking
- (iv) Selection testing
- (v) Preparing person specifications

- A 1(i), 2(ii), 3(iii), 4(iv), 5(v)
- B 1(ii), 2(iv), 3(i), 4(iii), 5(iv)
- C 1(iii), 2(i), 3(v), 4(ii), 5(iv)
- D 1(i), 2(v), 3(ii), 4(iv), 5(iii)

(2 marks)

32.15 One of the distinctions between coaching and mentoring is that a is not usually the immediate superior of the person being helped.

Which word correctly completes this sentence?

- A Coach
- B Mentor

(1 mark)

32.16 A popular approach to self development is for employees to reflect on work incidents, and assess whether and how they might adjust their behaviour to gain more successful outcomes in future.

On which school of learning theory is this approach based?

- A Behaviourist psychology
- B Cognitive psychology
- C Contingency theory
- D Learning styles

(2 marks)

32.17 Which **two** of the following factors establish the independence of an internal auditor?

- (i) The auditor's mandatory authority
- (ii) The auditor's involvement in the activities being appraised
- (iii) The auditor's own professionalism
- (iv) The auditor's freedom from accountability

- A (i) and (ii)
- B (i) and (iii)
- C (i) and (iv)
- D (ii) and (iv)

(2 marks)

32.18 A manager is coming up to retirement in a year's time. In which of the following circumstances would the organisation be most likely to consider external recruitment, rather than internal promotion, to fill the position?

- A The organisation has a policy of staff development and succession planning
- B The organisation is looking to introduce a culture of innovation for the first time
- C The organisation has a very strong managerial culture, which it wishes to preserve

(1 mark)

32.19 In which one of the following areas is there an advantage to using formal off-the-job training courses as opposed to on-the-job or experiential learning methods?

- A Level of risk for acquiring new skills
- B Relevance of learning to the job
- C Application of learning to the job
- D Continuity of work effort

(2 marks)

32.20 occurs when a person is penalised for giving information or taking action in pursuit of a claim of discrimination.

Which word or words correctly complete this statement?

- A Direct discrimination
- B Indirect discrimination
- C Victimisation

(1 mark)

32.21 Which of the following would be considered a potentially sensitive or negative element of an effective equal opportunities policy?

- A Flexible working and career break programmes
- B Monitoring numbers and performance of ethnic minority staff
- C Diverse job interview panels
- D Counselling and disciplinary policies on discrimination

(2 marks)

32.22 Which of the following checks would the external audit function be responsible for?

- A Separation of duties for independent proving of work
- B Arithmetic checks on the accuracy of data recording and calculation
- C Creating and preserving records that confirm accounting entries
- D Considering whether directors act on internal audit information

(2 marks)

32.23 The effectiveness of training programmes can be evaluated using a five-level model by Hamblin. Assign the correct number from 1 to 5 to each of the following levels.

- (i) Ultimate value
- (ii) Changes in job behaviour
- (iii) Trainee reactions
- (iv) Trainee learning
- (v) Impact on organisational results

- A 1(i), 2(ii), 3(iii), 4(iv), 5(v)
- B 1(iii), 2(iv), 3(ii), 4(v), 5(i)
- C 1(ii), 2(iii), 3(iv), 4(i), 5(v)
- D 1(iii), 2(i), 3(v), 4(ii), 5(iv)

(2 marks)

32.24 In the context of data security, which **two** of the following are examples of physical access controls to protect computer equipment or data storage media?

- (i) Card entry systems
- (ii) Back-up controls
- (iii) Personal identification numbers
- (iv) Logical access systems

- A (i) and (ii)
- B (ii) and (iii)
- C (i) and (iii)
- D (ii) and (iv)

(2 marks)

32.25 An organisation's employees are one of its connected stakeholders.

Is this statement true or false?

- A True
- B False

(1 mark)

(Total = 42 marks)

Answers

1 Business organisations and their stakeholders

- 1.1 C **Rationale:** Collective goals or aims are a feature of organisations.
Pitfalls: Watch out for closely related terminology like 'goals' and 'tactics'. You might have thought 'tactics' would fit here, but they are the lower level plans of functions: they may not be shared by the organisation as a whole.
Ways in: If you didn't know the definition, you could have got to the answer by ruling out the other options. Stakeholders doesn't fit 'pursues'; profits are not the objective of all organisations; and tactics are at a lower level than goals.
- 1.2 C **Rationale:** Synergy is the $2 + 2 = 5$ factor, and is one of the key reasons for the formation of teams and organisations.
Pitfalls: You need to read all the options carefully, especially if they look similar and all 'sound' plausible.
Ways in: You should be able to define the other options, to confirm that they do not fit the definition given.
- 1.3 B **Rationale:** In a limited company, the owners (shareholders) are separate from the managers of the concern (board of directors).
Pitfalls: Some options look plausible because of the wording. 'Limited' doesn't mean 'only being allowed to trade up to' – but looks as if it might. The second half of the statement about partnerships is true – but this doesn't mean that the first half is also true.
Ways in: You should have been able to rule out A (no company's turnover is limited), C (sole traders do have personal liability for debts: they do not have 'limited liability') and D (ordinary partnerships are different from limited companies).
- 1.4 C **Rationale:** Such an organisation is part of the public sector. The voluntary sector comprises charities and other organisations whose members are volunteers. Private sector comprises non-governmental organisations, such as limited companies.
Pitfalls: Watch out for 'public' and 'private' sector terms – and be able to distinguish clearly between them.
- 1.5 B **Rationale:** All these groups have a legitimate stake in the enterprise: the government, as a regulator; employees, as participants in the business; and environmental pressure group and local residents, because of potential impacts.
Pitfalls: Don't forget external stakeholders!
- 1.6 C **Rationale:** Secondary stakeholders are stakeholders who do **not** have a contractual relationship with the organisation. Primary stakeholders are stakeholders who do have a contractual relationship with the organisation.
- 1.7 B **Examiner's comments.** The examiner commented that many students struggled with this question. Measures such as value for money or efficiency are often used in not-for-profit organisations such as local authorities. Students should not restrict their studies to the public sector perspective.
- 1.8 D **Rationale:** A co-operative is a business which is owned by its workers or customers, who share the profits. Others features include open membership, democratic control, distribution of surplus in proportion to purchases and promotion of education.

2 The business environment

- 2.1 C **Rationale:** PEST stands for Political, Economic, Socio-cultural and Technological.
Pitfalls: SWOT (Strengths, Weaknesses, Opportunities, Threats) is a related exercise, as PEST data is fed into the O/T part of the business appraisal.
Ways in: You could eliminate as many distractors as you could identify: SMART (Specific, Measurable, Attainable, Relevant, Time-bounded) refers to objective-setting.
- 2.2 C **Rationale:** This would be interpreted as corruption. The other options are usually legitimate methods of influence. Although B may be questionable in some parts of the world, in others like the UK it is perfectly legitimate.
- 2.3 D **Rationale:** The statement defines demographics. Ergonomics is a study of the interaction of humans and their environments (used in design of office equipment and furniture, for example). Psychographics is the study of psychological factors (used in selection testing, for example).
Ways in: You could eliminate as many distractors as you could define in other ways.
- 2.4 C **Rationale:** Virtual organisation is the collaboration of geographically dispersed individuals and teams, specifically using the latest information and communication technology (ICT) enablers: the Internet, web-conferencing and so on.
- 2.5 B **Rationale:** Information technology has enabled managers or staff 'lower down' the hierarchy to make decisions previously made by middle management. This is known as delayering.
Pitfalls: You may have been tempted to think that this was downsizing. Downsizing, however, means reducing staff from all levels or layers in the business.
Ways in: It is 'layers' of middle management that have been removed. This may help to direct you to the answer 'delayering'.
- 2.6 A **Rationale:** This constitutes unfair selection for redundancy (on the basis of recent age discrimination legislation): redundancy is potentially fair grounds for dismissal as long as the basis of selection is fair. Options B and D are potentially fair grounds: there should be a reasonable attempt at performance or disciplinary management (warnings, training etc). You may have hesitated over C, but this is an example of 'substantial reasons' that would be considered by a tribunal.
Ways in: You could narrow the options by considering that there must be **some** way for companies to dismiss incompetent or deliberately obstructive employees.
- 2.7 C **Rationale:** Increasing diversity has an impact on HR policies in regard to equal opportunity and prevention of discrimination. Falling birthrates creates an aging workforce and skill shortages. All organisations need to take account of environmental regulation and consumerism. An increase in single-member households will impact on **some** organisations: notably, those which market goods and services to this segment (eg single-serve pack sizes), but the questions said 'most' organisations.
Pitfalls: You need to think through a range of compliance, marketing and skilling issues when appraising socio-cultural factors.
- 2.8 D **Rationale:** The other forces are bargaining power of suppliers and rivalry amongst current competitors in the industry.
Pitfalls: The five forces model is basic: you really need to learn the details ...
- 2.9 B **Rationale:** Socio-economic groupings are often the basis on which markets are segmented, so that products/services and marketing messages can be targeted appropriately (to people with the right levels of income, aspiration, education and so on). You might have paused over Human Resources, because social class includes education factors, but the data cannot be used to predict skill availability.

- 2.10 A **Rationale:** Procurement, technology development, HR management and infrastructure are support activities. Inbound and outbound logistics, operations, marketing/sales and service are primary activities.
- 2.11 B **Rationale:** Technology is no longer regarded purely as a threat to job security: it can also support higher-level skilling, options for home-working, cleaner and safer work environments, better employee communications (eg through an intranet) and so on. Option A is true, because IT systems support lower-level decision making and direct communication between strategic apex and operational staff: replacing the role of middle management. Option C is true, because new technologies reduce product life cycles: products and processes can swiftly become obsolete. Option D should be obviously true: think of email at one end of the scale, and 'virtual organisations' at the other.
- 2.12 B **Examiner's comments:** The examiners commented that only 31% of students chose the correct option. Steve, Sam, and Sunny all have support roles and the words 'administration' and 'information technology' should have immediately indicated a support role for Steve and Sam. Sunny's procurement role was not so clear cut but the responsibilities for dealing with the suppliers are sufficient to conclude that Sunny also has a support role.
- 2.13 B **Examiner's comments:** The examiner commented that only 20% of students chose the correct option. Options A and D are incorrect because there is no certainty that the job will be offered or accepted. Option C is incorrect because waiting a few weeks leaves the employee open to risks in those weeks.
- 2.14 C **Rationale:** Low switching costs means that it will be easy for customers to change from existing suppliers to a new supplier: this would facilitate entry to the market. The other options should clearly pose difficulties to a new entrant: not yet big enough to benefit from economies of scale (against competitors who are); high start-up costs; high degree of recognition of and loyalty to existing brands.
- 2.15 B **Rationale:** Outsourcing (contracting some of the firm's activities to external providers) and delayering (removing levels of the organisation hierarchy) are strategies for downsizing (reducing the number of staff permanently or directly employed by the firm). Delegating is the process whereby a superior gives a subordinate part of his or her own authority to make decisions.
- 2.16 B **Rationale:** Option A may **reflect** a cultural trend (increasing expectation of quality of working life, say), but it is a compliance issue. Option C is a demographic trend.
- 2.17 B **Rationale:** Lifestyle is generally considered a reflection of economic status and conditions, not a determinant of them. (For market segmentation purposes, for example, lifestyle factors are often measured in terms of attitudes, interests and opinions, rather than purely economic factors.)

3 The macro-economic environment

- 3.1 D **Rationale:** Exchange rates are a target of monetary policy: government policy on the money supply, the monetary system interest rates, exchange rates and the availability of credit. Fiscal policy is government policy on the three other options.
- Pitfalls:** This whole syllabus area is full of fine distinctions in terminology, which lend themselves to testing in a Multiple Choice and Objective Testing format.
- Ways in:** If you knew that there was a distinction between fiscal and monetary policy, you might have identified exchange rates as the only monetary issue.

- 3.2 C **Rationale:** A budget surplus occurs when a government's income exceeds its expenditure: there is a negative PSNCR or PSDR. When a government's expenditure exceeds its income, so that it must borrow to make up the difference, there is a positive PSNCR and we say that the government is running a budget deficit.
- Ways in:** If you recognised that a negative PSNC means no borrowing, you might have been able to start eliminating some options ...
- 3.3 C **Rationale:** The definition clearly distinguishes an indirect tax (eg sales tax) from a direct tax, which is paid direct by a person to the Revenue authority (eg income tax, corporation tax, capital gains tax and inheritance tax). Option A refers to the proportion of income taken by a tax.
- 3.4 C **Rationale:** Increasing taxation lowers demand in the economy because people have less of their own money after tax for consumption or saving/investment. Increasing public expenditure should increase the level of consumer demand. Decreasing taxation has the opposite effect. Lowering interest rates should stimulate investment (by companies) and consumer expenditure, even if only after a time lag.
- 3.5 D **Rationale:** An increase in the exchange rate makes a country's exports more expensive to overseas buyers, and imports cheaper: it therefore has the opposite of the first three effects. The lower cost of imports, however, is likely to reduce the rate of domestic inflation.
- Pitfalls:** The permutations of increases/decreases in interest rate can be confusing: ensure that the logic makes sense to you!
- Ways in:** You could group options B and C together (increased cost = reduce demand): since both cannot be the answer, and there is only one answer, neither of these options can be correct. This gets you quite a long way towards the solution ... So if you don't know an answer, don't panic: logic can often help!
- 3.6 B **Rationale:** Subsidies for exporters will encourage domestic exports, but will not help to protect domestic producers against overseas producers. The other options are tariff (taxes and duties on goods entering the country) and non-tariff barriers to trade.
- 3.7 A **Rationale:** Frictional unemployment occurs when there is difficulty in matching workers quickly with jobs. This means that frictional unemployment is temporary and short term and so statement 1 is true. A government can encourage labour mobility by offering individuals financial assistance with relocation expenses and by improving the flow of information on vacancies. This means that statement 2 is true.
- 3.8 A **Rationale:** Government policy on taxation, public spending and public borrowing relates to fiscal policy. Government policy on interest rates and exchange rates are part of the monetary policy.
- 3.9 A **Rationale:** Debts lose 'real' value with inflation: a company that owes a lot of money would effectively pay less (in real terms) over time. The other organisations would suffer because: inflation would make exports relatively expensive and imports relatively cheap; business might be lost due to price rises; and the cost of implementing price changes would be high.
- 3.10 D **Rationale:** The four main objectives of macroeconomic policy relate to economic growth, **stable** (not zero) inflation, unemployment and the balance of payments (balance between exports and imports).
- 3.11 D **Rationale:** Recession is part of the business cycle: demand for output and jobs falls, and unemployment rises until recovery is well under way. Option A is an example of frictional unemployment; option B of seasonal unemployment; option C of technological unemployment.
- Pitfalls:** It is easy to confuse cyclical with seasonal unemployment, or frictional unemployment that occurs on a seasonal basis (eg option A). You need to associate cyclical employment firmly with **business** cycles.
- 3.12 A **Rationale:** It is particularly tempting to equate a trade surplus or deficit with a 'profit' or 'loss' for the country, but this is not the case.

- 3.13 A **Examiner's comments.** The examiner commented that some students struggled with this question. Stagflation occurs when economic growth (defined by the change in national income in a period) is low or negative, and inflation is high. So the relevant figures are percentage change in GDP and change in consumer prices. Northland and Eastland both experienced negative growth, however, Northland had a high level of price inflation as well and so A is the correct option.
- 3.14 B **Rationale:** Potential growth is the rate at which the economy would grow if all resources were utilised: it is therefore determined by factors in the capacity of the economy (supply side), such as increases in the amount of resources available, or in the productivity or resources. Actual growth is determined both by growth in output (supply side) **and** aggregate demand (demand side). Option C was merely a distractor.

4 Micro-economic factors

- 4.1 B **Rationale:** In a free market economy, it is the interaction of supply and demand through the price mechanism that determines what should be produced and who should get it.
- 4.2 A **Rationale:** The supply curve for a perfectly competitive firm is its marginal cost curve above the average variable cost curve. The firm will not continue to produce if price is less than average variable cost.
- 4.3 C **Rationale:** Nothing. A minimum price (floor price) only leads to excess supply if it is set **higher** than the equilibrium price.
- 4.4 C **Rationale:** The other options relate to movements **along** the supply curve.
- 4.5 C **Rationale:** The effect of price being above the equilibrium (market clearing) price is that supply will extend and demand will contract.
- 4.6 D **Rationale:** A rise in the price of overseas holidays will lead to a movement along the demand curve rather than a shift in the demand curve.
- 4.7 B **Rationale:** Generally, if incomes fall, demand will fall.
- 4.8 C **Rationale:** A is one of the conditions for a perfect market, B is a monopoly and D is monopolistic competition.
- 4.9 C **Rationale:** Carpet underlay is a complement to carpet.
- 4.10 C **Rationale:** An increase in demand for cars will lead to an increase in demand for petrol and tyres. It will not increase the demand for holidays although people may use their cars to go on holiday.
- 4.11 B **Rationale:** This is a supply-side factor.
- 4.12 D **Rationale:** Coffee and tea are substitute products. Thus, a fall in the price of coffee will result in higher demand for coffee and lower demand for its substitute product, tea. The price of tea might therefore fall. Demand for drinking cups is probably insufficiently related to the consumption of coffee to make them a complementary product to coffee. Even so, lower coffee prices would be likely to raise the demand for drinking cups rather than reduce it.
- 4.13 C **Rationale:** The term 'inferior good' is a technical term in economics. An example of such a good might be small 'starter' homes.
- 4.14 D **Rationale:** It is assumed that cut flowers and flower vases are complementary goods. The rise in price of cut flowers will have an adverse effect on demand for flower vases, and the demand curve for flower vases will shift to the left. Given no change in supply conditions for vases, the new equilibrium price for vases will be lower.
- 4.15 B **Rationale:** As sea ferry tickets and hovercraft tickets are substitute goods, an increase in the price of hovercraft tickets will cause a shift to the right (increase in demand) for sea ferry tickets. Given no change in supply conditions, the consequence will be an increase in the number of sea ferry tickets sold, at a higher price than before.

- 4.16 A **Rationale:** A fall in the price of **sterling** would make London hotels cheaper for foreign tourists. A fall in the price of aeroplane tickets would make London cheaper to visit for foreign tourists. Events 2 and 3 would lead to a **rise** in demand for hotel rooms. In contrast, a fall in the value of the US dollar would make the UK more expensive to visit for US tourists and tourists from other countries where the US dollar is widely used, and demand for hotel rooms in London would fall.
- 4.17 C **Rationale:** This is an example of monopolistic competition.
- 4.18 B **Rationale:** When rent controls are eased, the effect is similar to raising or removing minimum prices in the rented housing market. We should expect higher rents, more supply of housing, and a closing of the gap between demand for rented housing and supply of rented accommodation. Changes 2 and 3 should therefore occur. The reverse of Change 1 should happen, and homelessness should decrease. Given widespread homelessness, it is unlikely that the easing of rent controls will have any effect on demand for owner-occupied dwellings.
- 4.19 D **Rationale:** All of the above.
- 4.20 B **Rationale:** The income elasticity of demand measures the responsiveness of demand to changes in consumers' incomes. An 'inferior' good has a negative income elasticity: as incomes fall, more is bought.
- 4.21 D **Rationale:** Percentage change in quantity = 50%. Percentage change in price = 25%.
- 4.22 A **Rationale:** Consumer surplus is the excess between what consumers are prepared to pay for a good or service and the prevailing market price they have to pay to purchase it.
- 4.23 B **Rationale:** To increase market share requires greater quantities of the firm's products to be both demanded and supplied. To sell more, a firm needs to lower price. For this to be profitable, demand must be elastic. To produce more, supply must also be elastic.
- 4.24 D **Rationale:** Assuming a normal good, a decrease in price results in a greater quantity being demanded. Given that demand is price elastic, the increase in quantity will be proportionally greater than the price fall.
- 4.25 C **Rationale:** Imagine you can buy a second car for \$10,000 or buy a bike for \$100 and they both give you the same extra utility. You wouldn't choose to buy the car as you're paying much more to achieve the same utility as you could get from buying the bike. If you get 10 times more utility for one thing compared to another you'd be prepared to pay 10 times more for it.

5 Section A MTQs

- 5.1 (a) (i) False An inferior good would have negative income elasticity
 (ii) True
 (iii) False If price elasticity is less than 1, demand is said to be inelastic
 (iv) False Unrelated products has a cross elasticity of zero.
- (b) C, D and F
- 5.2 (a) (i) B Wrongful dismissal relates to the method of dismissal
 (ii) C This dismissal would not be classified as unfair or wrongful
 (iii) A This dismissal is unfair to the employee
 (iv) A This dismissal is unfair to the employee
- (b) (i) False There is no entitlement to compensation with less than 2 years' continuous employment
 (ii) True

- 5.3 (a) (i) A Tax incentives will encourage investment which will increase output capacity
(ii) C Forbidding takeover will mean more competitors in an industry and encourages competition
(iii) B Equal opportunities will positively influence employment
(iv) D Product safety standards will ensure a minimum safety level for consumers
- (b) (i) A
(ii) A
(iii) B
(iv) B
- 5.4 (a) (i) A
(ii) C
(iii) D
(iv) B
- (b) B, D If there are a lack of substitutes then the customer has less choice of suppliers and similarly if the product is highly differentiated.
- 5.5 (a) (i) $12.5\%/-5\% = -2.5$
(ii) $-2.5\%/-5\% = +0.5$
(iii) B Since the cross elasticity of demand is positive, the products are substitutes.
- (b) A An inferior good still has a downward sloping demand curve, but less of the product is demanded when incomes rise.
- 5.6 (a) C, D and F The description 'NGO' generally applies to groups whose primary aim is not a commercial one, aimed at promoting social, political or environmental change. NGOs are not necessarily charities, although they tend to raise funds through donations. They are measured in terms of effectiveness and efficiency, rather than customer satisfaction or profit targets.
- (b) A NGOs are measured on their effectiveness and efficiency in how they manage their resources – 'value for money'

6 Business organisation, structure and strategy

- 6.1 D **Rationale:** Line authority can easily be shown on the organisation chart.
- Pitfalls:** You may have hesitated if you didn't know the difference between functional authority (where an expert department has authority over the activities of other departments in the areas of its expertise eg the HR department setting recruitment policy for the sales and production departments) and line authority (direct authority flowing down the chain of command). However, you only needed to know the meaning of line authority to see that the statement was untrue.
- Ways in:** You may have paused to ask whether an organisation chart can improve internal communications, but it does in one key way: by highlighting the length and complexity of lines of communication between people who need to co-ordinate their work.
- 6.2 C **Rationale:** This is the definition of span of control: all the others are distractors.
- Pitfalls:** All the distractors are plausible: note the need to think them through carefully. Option A is close to the correct definition – but if you think about it, the number of subordinate employees includes **all** those below the manager, whereas span of control is direct reports only.
- 6.3 B **Rationale:** Support base is not one of Mintzberg's components of organisation structure: the other correct terms are middle line and support staff.
- Pitfalls:** The basic terminology of well-known models is must-learn material!

- 6.4 B **Rationale:** While there may be elements of functional and geographical organisation, Y plc's situation suits divisionalisation: more or less autonomous product and regional businesses, with co-ordination from head office. 'Diversification' and 'acquisition' are good pointers to divisionalisation.
- Pitfalls:** Don't get sidetracked by the link between 'overseas markets' and 'geographical'.
- 6.5 C **Rationale:** Matrix organisation is based on dual command: the classical principle of unity of command is 'one person, one boss'.
- 6.6 D **Rationale:** Option A is a fact. Option B is true, because of informal 'short cuts' which are often developed and shared, by-passing health and safety rules and procedures. Option C is true, because the 'grapevine' encourages knowledge sharing and multi-directional communication. Option D is not true: managers can feed information into the grapevine and be part of their own informal networks.
- 6.7 C **Rationale:** A centralised organisation is one in which authority is concentrated in one place. If all decisions are made in the same place then it will be easier for the decision-makers to see the 'bigger picture' and therefore understand the consequences of their decisions. Options A and B are advantages of decentralisation, where decisions are delegated.
- 6.8 A **Rationale:** Statement (i) is true. Statement (ii) is not, because the informal organisation has its own agenda. Statement (iii) is not, because a strong informal organisation with its own agenda can undermine the formal organisation: create damaging rumours, safety/quality shortcuts, distractions from task goals etc.
- 6.9 D **Rationale:** This describes a boundaryless organisation. A hollow organisation splits people and activities into core and non-core. In modular organisations different elements or components of the product or service the organisation produces are outsourced to different suppliers. In a jobless structure the employee becomes not a job-holder but a seller of skills.
- 6.10 B **Rationale:** The shared service centre is created within the organisation and is a part of it, although its relationship is similar to that of an external service provider.

7

Organisational culture and committees

- 7.1 A **Rationale:** The role culture is a bureaucratic or mechanistic culture, as described in the scenario. Task culture is project-focused; existential culture is person-focused; and power culture is leader-focused.
- Pitfalls:** If you didn't know Harrison's model well, you might have confused 'focus on the task' (see in the scenario) with a task culture, or the strong central leadership with a 'power' culture.
- 7.2 D **Rationale:** This is a problem with strong cultures (and ultra-cohesive groups).
- Pitfalls:** The other statements are plausible: you need to come up with counter-arguments to show that they are not always true. B is most plausible because it makes a limited claim that values 'can' replace rules: think of health and safety or financial controls, however, to disprove the claim.
- Ways in:** You could rule out two of the statements because they are dogmatic (so that just one counter-example would make them untrue).
- 7.3 B **Rationale:** There are many spheres of culture: nation, ethnic group and social class are only three of them. 'Culture' applies to categories of people including genders, social classes and organisations.
- 7.4 B **Rationale:** The fourth dimension in Hofstede's model is masculinity-femininity.
- 7.5 C **Rationale:** Assumptions are foundational ideas that are no longer even consciously recognised or questioned by the culture, but which 'programme' its ways of thinking and behaving. Values and beliefs are the next level up: they are consciously held concepts which give meaning to the next level up again – observable factors such as rituals, artefacts and behaviour.

- 7.6 B **Rationale:** This is just a case of learning who is associated with which theory and definition. For the FAB/F1 exam, the theorists' names are important.
- 7.7 A **Examiner's comments:** The examiner commented that only 27% of students chose the correct answer. Make sure that you learn the distinctions between the cultural dimensions.
- 7.8 B **Rationale:** R & D tends to be concerned with product research (not market research), and many organisations have internal R & D functions.
Pitfalls: Be aware of the difference between product and market research.
Ways in: If you were able to rule out statement (i), you were only left with two options to choose from – and you should be able to rule out statement (iv) if you know any organisations with an internal R & D department, leaving you with the correct option.
- 7.9 A **Rationale:** Intangibility refers to the fact that there are no material or physical aspects to a service: physical elements help to reduce this effect, and make the provision concrete for the customer. Inseparability and perishability refer to the fact that services are created and consumed at the same time: they cannot be stored – and pose challenges to demand forecasting and scheduling. Variability refers to the fact that services are specific to the situation and cannot easily be standardised.
Ways in: What do physical elements **do** for a customer purchasing eg a train ride or legal advice? If you knew the meaning of the term 'intangible', the answer to this question would get you to the correct answer.
- 7.10 B **Rationale:** A sales orientation assumes that customers must be persuaded to buy the products that the firm produces. A production orientation assumes that customer will buy whatever is produced: the focus of the firm is on meeting demand. A marketing orientation seeks to determine the needs, wants and values of customers and to produce what customers want to buy.
Pitfalls: Don't confuse selling and marketing!
- 7.11 B **Rationale:** HRM is concerned with the most effective use of human resources. It deals with staffing levels, motivation, employee relations and employee services. It is the marketing function which manages an organisation's relationship with its customers, not HRM. Note that increasingly, HRM is undertaken by line managers as well or instead of HR departments.
- 7.12 C **Rationale:** A standing committee is formed for a particular purpose on a permanent basis. Joint committees are formed to co-ordinate the activities of two or more committees: they need not be permanent. Task forces are specifically **not** permanent: they fulfil their allocated task and then wind up.
Pitfalls: The confusion of related terminology is often the target of testing.
- 7.13 A **Rationale:** HR and line departments generally provide details of salary/wage rates, time sheets etc – but the finance department generally administers payroll, so Josh is likely to be responsible.
- 7.14 A **Rationale:** Time, expense and compromise decisions are some of the disadvantages of a committee so Paul is correct. There are, however, many advantages to committees as well.
- 7.15 C **Rationale:** Diane and Joanne work at operational level as they are concerned with routine activities. Lesley is at an intermediate level and is managing resources. She is therefore part of tactical management. Tracey is concerned with direction setting for the business and is therefore part of strategic management.
- 7.16 B **Rationale:** Low masculinity (or femininity) is about high regard for values such as focus on relationships and quality of working life, and the acceptability of such values for both men and women: Mr Q's nurturing style would score on this dimension. His approach does not really say anything about power-distance (command-and-control v delegation-and-involvement). There are elements of uncertainty-avoidance in his attempt to minimise staff insecurity – but this would be high UA, not low UA.
Pitfalls: Don't confuse the masculine/feminine dimension with straightforward gender stereotypes!

- 7.17 B **Rationale:** Dependency increases stakeholder power and creates risks and constraints. A buyer would not necessarily want a supplier to be dependent on its business (for ethical reasons), any more than it would want to be dependent on a supplier (for bargaining and supply risk reasons).
Pitfalls: You may have hesitated over information-sharing, because of intellectual property and confidentiality issues – but it is necessary for high-interest, high-power 'key players'.
- 7.18 A **Rationale:** Internal stakeholders include employees and management and so Janet is the only internal stakeholder. Customers and suppliers (like Mary at P Co) are connected stakeholders. Pressure groups such as D Group are external stakeholders.
- 7.19 B **Rationale:** All the other options are duties of the Committee secretary.
- 7.20 A **Rationale:** You should have been able to rule out the chair of a committee. An ordinary committee member will receive communications, not produce them.

8 Corporate governance and social responsibility

- 8.1 D **Rationale:** Statement (i) is incorrect, because there is no such 'guarantee'; statement (ii) because it is not necessarily so, and statement (iv) because other organisations (eg charities, government bodies) are often more concerned with social responsibility than businesses.
Ways in: It is always worth checking to see if logic helps. Words like 'guarantee' often signal an untrue statement, because they make such extreme claims. And if statement (i) is therefore incorrect, you've halved your options. It should then be obvious that (iv) is incorrect (if you think about a hospital, say).
- 8.2 B **Rationale:** Agency theory suggests that managers will look after the performance of the company if doing so serves their own interests: hence performance incentives and rewards. Stewardship theory views the managers as stewards of the assets of the firm. Stakeholder theory argues that managers have a duty of care to a range of organisational shareholders.
Ways in: You could have ruled out Option C as irrelevant, and then worked on the implications of stewardship and agency.
- 8.3 C **Rationale:** The objective of corporate governance is overall performance, enhanced by good supervision and management, within best practice guidelines. Business is to be conducted in a way that is both ethical and effective from the perspective of all stakeholders – not just shareholders.
- 8.4 B **Rationale:** Corporate governance includes the selection of senior officers (with influence over the future direction of the organisation), and relationships between the organisation and its key stakeholders. It is therefore regarded as being of strategic importance.
- 8.5 A **Rationale:** This is a feature of poor corporate governance because it makes way for self-interested decision-making. The others may 'look' like negatives, but are in fact the opposites of three other features of poor corporate governance: lack of independent scrutiny; lack of supervision; and an emphasis on short-term profitability (which can cause pressure to conceal problems or manipulate accounts).
Ways in: You could have got to the answer with logic, with a sound grasp of corporate governance – but it would be worth learning the list of features of poor corporate governance, so you can recognise them in an exam question.
- 8.6 C **Rationale:** These are some of the roles fulfilled by the board. The audit committee reviews financial statements, audit procedures, internal controls and risk management. The Public Oversight Board monitors and enforces legal and compliance standards. The nomination committee oversees the process for board appointments.
Pitfalls: You need to be able to distinguish clearly between all the various participants in the corporate governance system.
Ways in: Strategy formulation should have steered you towards the correct answer.

- 8.7 D **Rationale:** Professional ethics concern the individual ethical sphere, not the wider sphere of Corporate Social Responsibility which operates at the level of the firm. All of the others are CSR principles: human rights as a component of ethical trading and investment; employee welfare as part of ethical employment; and support for local suppliers as an example of sustainability.
- Pitfalls:** The combinations were designed to test if your thinking was limited to internal organisational matters or commercial matters.
- 8.8 B **Rationale:** Employment protection is just one example of an area which is subject to law. Corporate governance is an area which is subject to codes of best practice (and law in some countries). CSR is therefore the area subject to least regulation and most managerial discretion.
- 8.9 C **Examiner's comments:** The examiner commented that only 47% of candidates answered this question correctly. Codes of practice are usually associated with a principles-based approach (rather than a rules-based approach) and so options A and B should have been easily eliminated. The words 'guidance' and 'should adopt' were the key words to lead to the correct option.
- 8.10 C **Rationale:** Only Option C fulfils the requirement for full independence of the body that sets directors' remuneration (to avoid directors' awarding themselves unjustifiable rewards!). A nomination committee has the separate task of overseeing board appointments.
- 8.11 B **Rationale:** This is the definition used by the Accounting Standards Board. Option C is another corporate governance report that may be required. Option A is just a distractor.
- 8.12 B **Rationale:** 4 is incorrect and can actually be problematic for non-executive directors. Non-executive directors often have limited time to devote to the role as they are likely to have other time consuming commitments.

9 Section B MTQs

- 9.1 (a) (i) C
(ii) B Adding additional features but without actually researching what customers want is product orientation, which is a variant of production orientation.
(iii) A
(iv) D
- (b) D This is known as market segmentation.
- 9.2 (a) (i) A Corporate strategy is concerned with what types of business the organisation is in.
(ii) B Business strategy is how an organisation approaches a particular market area.
(iii) C This relates to a functional decision and therefore is at the operational level.
(iv) B Business strategy is how an organisation approaches a particular market area.
- (b) B, E The other statements are advantages of decentralisation or delegation.
- 9.3 (a) (i) C This company has a high individualism culture.
(ii) B This company has a high uncertainty avoidance culture.
(iii) D This company has a low masculinity culture.
(iv) A This company has a low power distance culture.
- (b) (i) C Attitudes are patterns of collective behaviour such as greeting styles, business formalities, social courtesies and ceremonies.
(ii) B Artefacts are concrete expressions such as architecture and interior design, dress code and symbols.

- 9.4 (a) (i) B Support staff provide ancillary services.
 (ii) A Production is part of the operating core, taking inputs and converting them into outputs.
 (iii) D Middle managers such as a sales manager form the middle line of an organisation.
 (iv) C The board would form the strategic apex of the organisation.
- (b) B, C Although there are employees in the professional core, pay should be tied to performance. Also the contingent work force consists of part-time and temporary workers who experience short periods of employment.
- 9.5 (a) (i) B
 (ii) B
 (iii) A
 (iv) B
 (v) A
 (vi) B
- The treasury department plans and controls the sources and uses of funds by the organisation.
- (b) A Money markets are markets for trading short-term financial instruments.
- 9.6 (a) (i) To define the **purpose** of the company
 (ii) To define the **values** by which the company will perform its daily duties
 (iii) To identify the **stakeholders** relevant to the company
 (iv) To develop a **strategy** combining these factors
 (v) To ensure **implementation** of this strategy
- (b) C Chairing management committee meetings is part of the usual responsibilities of the CEO.

10 The role of accounting

- 10.1 B **Rationale:** This is the main or overall aim of accounting.
- 10.2 D **Rationale:** Non-commercial undertakings still prepare annual financial statements, for accountability to their trustees, members or funding bodies.
- 10.3 B **Rationale:** The Management Accountant provides information for management: cost accounting, budgets and budgetary control and financial management of projects. The Financial Controller is responsible for routine accounting, accounting reports, cashiers' duties and cash control. A Treasurer would be responsible for treasury management: raising and investing funds and cash flow control.
- 10.4 B **Rationale:** Time sheets are used to calculate hours worked and overtime, in order to calculate gross pay (before deductions). The system information for management (payroll analysis), information for employees (pay slips) and methods of payment (credit transfer forms), are all outputs.
Pitfalls: It is worth sorting out the inputs, processing and outputs of any financial system.
- 10.5 A **Rationale:** All the other aims relate to the control system relating to receivables and sales.
Pitfalls: You have to get straight in your mind which transactions and controls relate to payables/purchases and which to receivables/sales.
Ways in: Careful reading of the question should allow you to eliminate options B and D immediately (sales/supply, not purchases). You then have to think how credit notes work – but the fact that Option A mentions the 'purchase' ledger, and Option C the 'sales' ledger should lead you to the right answer.

- 10.6 C **Rationale:** Option A refers to the statement of profit or loss, not the statement of financial position. Option B refers to audit reports.
- Pitfalls:** If you were in a hurry, you might have selected option A immediately you saw the words 'true and fair'. Avoid such mistakes by reading through **all** question options carefully, keeping an open mind.
- 10.7 D **Rationale:** An integrated package is expected to do everything, so it may have fewer facilities than specialised modules (especially as it also requires more computer memory). The other options are advantages of integration: ability to update multiple records from one data entry; ability to extract data from all relevant sources to compile specified reports; and less likelihood of discrepancies in different records.
- 10.8 B **Rationale:** A suite is a set of several modules. A spreadsheet is a type of program, and a format for displaying and processing data: it is often used to integrate data from accounting modules for decision-support and management information systems. A database is a collection of data.
- 10.9 C **Rationale:** The system does not by itself provide for data security: appropriate controls have to be designed and implemented by users. Computer files are as vulnerable to theft and wilful damage as manual files, and are perhaps even more vulnerable to corruption or loss of data through user error.
- 10.10 D **Rationale:** Unfortunately: 'garbage in, garbage out!'...
- 10.11 B **Examiner's comments:** The examiner commented that only 36% of students got this question correct. Mandatory reports to government and shareholders are required under national legislation. Codes of corporate governance are principles-based and voluntary in nature. International and local Accounting Standards do affect the content and presentation of accounts but it is national legislation which dictates the requirements for preparation and filing of accounts.
- 10.12 B **Rationale:** 'Garbage in, garbage out!'
- 10.13 B **Rationale:** Exception reporting focuses attention on those items where performance differs significantly from standard or budget.
- Pitfalls:** The word 'exceptional' was placed in other options as a distractor!
- 10.14 C **Rationale:** Back-up storage, virus detection software and password protection are basic security requirements of any computer system, regardless of whether they are connected to the Internet. Because this system is not so connected, however, it cannot receive email.
- Pitfalls:** Make sure you distinguish between intranet (internal network) and Internet (world wide network), and read questions carefully to see which is being discussed.
- 10.15 C **Rationale:** This is the definition of an Expert System. It is distinguished from a DSS by supporting decision-making at a higher and less structured level. Expert systems draw on a knowledge base to solve well-defined technical problems.
- Pitfalls:** 'Management', 'Expert' and 'Decision' were plausible distractors: make sure you can distinguish between the different types of system, and how they contribute to decision-making and problem solving.
- 10.16 C **Rationale:** Data is any kind of unprocessed information, and information is any kind of processed information.
- 10.17 D **Rationale:** The DBMS is the software that builds, manages and provides access to a database. Data storage is carried out in the database itself. The database administrator is a person (not a part of the system) who controls the system. EPOS is a form of data collection and input.
- 10.18 A **Rationale:** Data can be lost or corrupted as the result of deliberate actions such as fraud, sabotage, commercial espionage or malicious damage – as well as human error. The other statements are true: new staff pose a security risk because of the risk of human error (if they are inexperienced or untrained); it is impossible to prevent all threats (important to be realistic!); and smoke detectors are an example of protection from physical risks (in this case, fire).
- Pitfalls:** Don't forget physical security measures: you may have discounted Option D too quickly. Data security also involves protection against fire, flood, interruption of power source and so on.

- 10.19 A **Rationale:** OAS systems, with functions such as word processing, digital filing, email, schedulers and spreadsheets, are primarily designed to streamline administrative tasks: document management, communication, data management.
- 10.20 A **Rationale:** Managers need most information, at a significant level of detail, to enable them to make planning and control decisions. They have special access to information, because they can arrange to obtain the information they need through the accounting system. Shareholders are entitled to certain information, focused on particular areas of interest (mainly profits). Financial analysts may only have access to public information and reports.
- 10.21 B **Rationale:** In order to control the risks of fraud and error, the internal audit department should be separate from the finance department.
- 10.22 D **Rationale:** A quick phone call may be a more efficient way of obtaining or giving information than email, for example. You may have hesitated over Option C because of often-stated warnings about 'garbage in, garbage out'. The risks of input error are the same – but computerised systems reduce the further risk of computation errors.
- 10.23 C **Rationale:** The purchasing or procurement function is responsible for authorising purchases (and suppliers) and approving. The other functions contribute, however: production, by requisitioning only needed items; goods inwards, by checking that what was purchased is what is in fact received; and accounts, by seeking proper documentary evidence and authorisation for payment.
- 10.24 B **Rationale:** This should be obvious from the context (debts represent goods bought on credit: hence, credit control) – but make sure that you could define the roles of all the other options, if you needed to!
- 10.25 C **Rationale:** IFAC is the International Federation of Accountants. It produces an ethical code but it is not part of the regulatory system.
- 10.26 A **Rationale:** International Financial Reporting Standards are issued by the IASB.

11 Control, security and audit

- 11.1 B **Rationale:** Options A, C and D were identified as aims of internal controls in the Turnbull report. However, the report also states that even a sound system of internal control reduces, but does not eliminate, the possibilities of poorly judged decisions, human error, deliberate circumvention of controls and unforeseeable circumstances. Systems only provide reasonable (not absolute) assurance.
- Ways in:** If you had to guess, you could probably see that option B is an exaggerated claim. Look out for options that say 'always' or 'never' or 'total', in a similar vein: these are much more likely to be untrue than true, in the complex world of business...
- 11.2 C **Rationale:** Non-discretionary controls are as described: as opposed to discretionary controls which are subject to human choice. 'Mandated' is a similar idea, but mandated controls are required by law and imposed by external authorities (as opposed to voluntary controls, chosen by the organisation). Detect controls are controls designed to detect errors once they have happened. Administrative controls are to do with reporting responsibilities, communication channels and other means of implementing policies.
- Pitfalls:** There is so much terminology in this area: fertile ground for exam questions. Be able to use distinctions within classifications (as in 'discretionary and non-discretionary', or 'prevent, detect, control') as well as across classifications, as in this question.
- 11.3 B **Rationale:** Organisation in this context means identifying reporting lines, levels of authority and responsibility to ensure that everyone is aware of their control responsibilities. The full mnemonic stands for: Segregation of duties; Physical; Authorisation and approval; Management; Supervision; Organisation; Arithmetical and accounting; and Personnel.

- 11.4 D **Rationale:** This is an internal control, rather than an internal check. Internal checks are more about dividing work (so that the work of one person can be independently proved by that of another) and using 'proof measures' to ensure the accuracy of records and calculations: options A, B and C are examples.
- 11.5 A **Rationale:** Internal audit is **independent**, but is still part of the internal control system: it is a control which examines and evaluates the adequacy and efficacy of other controls. Internal auditors should report direct to the audit committee of the board of directors (in order to preserve independence). It is **external** audit which is for the benefit of shareholders: internal audit is a service to management.
- Ways in:** Once you realised that the options were circling round different aspects of the definition of internal audit, and the difference between internal and external audit, you would be better able to sort out which statement was given to you 'straight' – and which were opposites of the true points.
- 11.6 B **Rationale:** This should be straightforward if you think through what the potential threats involve. Lightning strike or electrical storms are a key cause of power supply failures and surges which may effect computer functions. Fire and accidental damage are also physical threats to data and equipment. Hacking is a non-physical threat involving unauthorised access to data (possibly resulting in data theft or destruction).
- 11.7 B **Rationale:** System recovery procedures are set in place for activation in the event of breakdown, to get the system up and running again: this is a contingency control, because it plans for a 'worst case scenario'. Password access is an example of a **security** control: protecting data from unauthorised modification, disclosure or destruction of data. Audit trails (showing who has accessed a system and what they have done).
- Pitfalls:** There is a lot of vocabulary and procedure in this area: make sure that you could answer questions on a variety of different data security controls.
- 11.8 D **Rationale:** It would be a limitation if controls **depended** on the method of data processing. The others are limitations, because: the costs of control must not outweigh the benefits; there is always potential for both human error and deliberate override of controls by management; and controls are designed to cope with routine transactions, not non-routine transactions.
- 11.9 B **Rationale:** The primary responsibility of the external auditor is to report to shareholders on whether the client's financial statements are accurate and free from bias ('true and fair'). The other options are true.
- 11.10 B **Rationale:** Substantive tests 'substantiate' the figures in the accounts. They are used to discover **whether** figures are correct or complete, not **why** they are incorrect or incomplete, or how the figures 'got there'. Option A is the aim of **compliance** tests.
- 11.11 C **Rationale:** Correct controls are designed to enable the organisation to minimise the effect of errors: in this case, restoring data from the back-ups if the main data store is corrupted. Prevent controls are designed to prevent errors from happening in the first place, and detect controls are designed to detect errors once they have happened.
- 11.12 B **Rationale:** Audit trails enable system administrators to maintain security, check transactions (in order to identify errors and fraud), recover lost transactions and monitor the use of network resources. Passwords are access controls and archives are long-term back-up storage: both are good system controls.
- Pitfalls:** There is lots of terminology in this area: get to grips with all the basic terms and procedures.
- 11.13 B **Rationale:** A systems audit is based on the testing and evaluation of internal controls. A probity (or transaction) audit checks account entries to identify errors or omissions which may indicate fraud. A social audit measures the social responsibility or social impacts of the business.
- Pitfalls:** This is another area of distinctive clusters of terminology: make sure you can identify operational, systems and transactions audits – and the types of tests they use (compliance v substantive).

- 11.14 C **Rationale:** This may suggest that internal audit work is not properly planned, reviewed or documented: a failure of due professional care. The other options show good status, scope and technical competence.

12 Identifying and preventing fraud

- 12.1 C **Rationale:** Collusion is working with another party (eg customers or suppliers) to commit fraud. Misrepresentation is stating that something is so, when it is not, in order to mislead (eg overstating profits).
- 12.2 D **Rationale:** Payslips can be deliberately miscalculated to pay extra amounts. Staff may collude with customers to under-record quantities of despatched goods on delivery notes so the customer pays less: conversely, employees may collude with suppliers to pay invoices for larger quantities than were actually delivered. Option (iv) may have made you hesitate: it seems such a positive, desirable thing! However, profits in excess of target may be siphoned off, with less scrutiny once targets have been met.
- 12.3 D **Rationale:** One form of fraud is the intentional misrepresentation of the financial position of the business. Bad debt policy may be unenforced deliberately, in order to overstate profits.
- 12.4 B **Rationale:** This is an important distinction in making sense of the three prerequisites for fraud: dishonesty (a willingness to act dishonestly), motivation (an incentive or reason to act dishonestly) and opportunity (an opening to act dishonestly).
- 12.5 A **Rationale:** Increased competition is a risk factor (because it may put pressure on managers to manipulate results) – but it is an **external** factor. The others are internal factors which increase risk because they disrupt supervision and control (options B and C) or introduce unknown factors (option D).
Pitfalls: Look carefully at question stems for qualifier key words such as 'internal' and 'external'.
- 12.6 C **Rationale:** This may seem like normal behaviour in a 'workaholic' office culture, but failure to take full holiday entitlement may signal an employee trying to prevent a temporary replacement from uncovering a fraud. The other options are factors in **reducing** risk: lack of segregation enables fraud to go undetected; low staff morale is often a motive for fraud (in retaliation against the firm); and an autocratic management style may prevent questioning.
Pitfalls: Ensure that you know what 'segregation of duties' means: otherwise, it might look like a risk factor (because it sounds like allowing people to work independently and unsupervised, say).
- 12.7 C **Rationale:** There is a reduction in working capital, which makes it more difficult for the company to operate effectively, potentially resulting in corporate collapse. The other effects should be obvious (remember, we are talking about removal of funds or assets and not overstatement of profits and/or net assets). Reputational damage refers to loss of shareholder and market confidence in the organisation's management when the fraud emerges.
- 12.8 B **Rationale:** This should be clear from the context, because of the collusion with customers (if you remembered what collusion was). Physical security refers to keeping assets under lock and key: not to be dismissed as a fraud prevention measure! Sequential numbering works because it is easy to spot if documents are missing. Authorisation policies increase checks and accountabilities.
- 12.9 A **Rationale:** The directors are responsible for the conduct of the business, the deterrence and detection of fraudulent (and other dishonest) conduct, and the reliable reporting of financial information. The responsibility of the external auditor is only to express an opinion on the financial statements, although audit procedures should have a reasonable expectation of detecting misstatements arising from fraud. The audit committee reviews the organisation's performance in fraud prevention, but also reports to the board.

- 12.10 C **Rationale:** There are plenty of ways of securing access to data, using available software tools: password protection, encryption and so on. (Of course, the firm has to **use** them, but that is a separate issue!) Hackers are unauthorised people breaking into the system. Lack of managerial understanding creates loopholes in controls, and the ability to conceal fraud by technical staff. Integrated systems also help to conceal fraud, by ensuring that alterations to records are consistent: fewer discrepancies to trigger investigation.
- 12.11 C **Rationale:** Investors will be making decisions (and taking risks) on inaccurate information. Suppliers will extend credit without knowing the true financial position of the company. (Staff and customers will eventually be effected if shortfalls in working capital threaten the business ...)
- 12.12 C **Rationale:** These are measures for fraud prevention and control. A fraud response plan specifically deals with investigating and dealing with the consequences of identified frauds. This includes taking immediate steps to secure the security of records that will be investigated (option A) and launching an investigation into the method and extent of fraud (option B).
- 12.13 C **Rationale:** Limit controls limit opportunity for fraud: another example is limiting access to the computer network by means of passwords. Segregation of duties means ensuring that functions which **together** facilitate fraud are performed by **different** individuals: eg separating the cheque signing function from the authorisation of payments. Appropriate documentation involves recording, authorising and tracking transactions through purchase requisitions, orders, invoices and so on.
- 12.14 B **Rationale:** Performance-based rewards increase pressures and motivation for managers to manipulate results.
Ways in: A good approach for these sorts of question is to work systematically through the options to eliminate those which are clearly true. That way, even if you are left with an option you are not sure about (because performance-related pay for managers is such a popular strategy, say), it is the best option you've got.
- 12.15 B **Rationale:** The statement is the definition of money laundering.
- 12.16 A **Rationale:** The order is placement, layering and integration.

13 Section C MTQs

- 13.1 (a) (i) D Suppliers will want to know whether the company is able to pay its debts.
(ii) C Tax authorities want to assess whether tax paid is adequate for the level of profits.
(iii) A Shareholders want to assess the effectiveness of management in performing its stewardship function.
(iv) B Financial analysts need information to advise investors whether to invest or not.
- (b) False Charities and public sector organisations also need to prepare accounts.
- (c) B True and fair is usually taken to mean accurate and not misleading.
- 13.2 (a) (i) B This control is built in to the system
(ii) A This control can be bypassed so is discretionary
(iii) B This control is built in to the system
(iv) A This control can be bypassed so is discretionary
- (b) C Operational audits can be concerned with any sphere of a company's activities and a transactions audit aims to detect fraud.
- (c) False The existence of the controls is not enough. The controls also need to be applied properly and honestly in order for them to be effective.

- 13.3 (a) B, C Information is more accessible in a computerised system and the risk of errors is reduced rather than eradicated.
- (b) C This is the definition of a module.
- (c) False A database should evolve both in the short term and also the long term.
- 13.4 (a) A, C These controls are designed to restrict physical access.
- (b) C These are all examples of input controls.
- (c) B Contingency controls help an organisation recover in the event of a disaster.
- 13.5 (a) (i) B By not reporting suspicions of fraud, Stella is committing an offence.
- (ii) A By informing the financial controller, James is tipping off the client and may prejudice the investigation.
- (b) (i) B Layering involves the transfer of monies from business to business or place to place to conceal the original source.
- (ii) A Placement is the initial disposal of the proceeds of criminal activity into apparently legitimate business activity or property.
- 13.6 (a) D Internal checks are checks on day to day transactions, where the work of one person is proved independently, or is complementary to the work of another. A control total is a total of any sort, used by comparing it with another total that ought to be the same. The other options in the question are features of the overall internal control system.
- (b) (i) External audit
(ii) Internal audit
(iii) External audit
(iv) Internal audit
(vi) Internal audit
(vii) External audit

14 Leading and managing people

- 14.1 B **Rationale:** Position power is legitimate organisational authority, by virtue of a position in the organisation hierarchy: managers depend largely on it for their influence. Leaders are often required to exercise informal, interpersonal forms of influence, such as person power (charisma, inspiration) and expert power (valued knowledge). Physical power (intimidation) should be used by neither managers nor leaders!
- Pitfalls:** the classifications of power are a rich source of related terminology, and hence a potential source both of confusion – and of exam questions!
- 14.2 A **Rationale:** Frederick Taylor is associated with scientific management. The other writers are associated with the human relations school, focusing on the role of 'higher order' needs (such as challenge and interest in the work) in human motivation.
- Ways in:** You could halve your options by realising that Maslow and Herzberg belong to the same school: therefore the 'odd one out' must be one of the other two.
- 14.3 C **Rationale:** The 'country club' is low-task, high-people focus and 1.9 on Blake and Mouton's managerial grid. This describes Monica. Impoverished is 1.1 (both low), task management is 9.1 (all about the task), and dampened pendulum is 5.5 (swinging between the two extremes).

- 14.4 C **Rationale:** Psychologically distant managers (PDMs) maintain distance from their subordinates and they prefer formal procedures rather than informal ones, for example, a formal consultation method.
- Ways in:** Hopefully you were able to rule out the fourth statement and therefore option D. Psychologically close managers are closer to their subordinates. If you remembered that PDMs prefer formal procedures then you may have been able to work out that statements 1, 2 and 3 were correct.
- 14.5 A **Rationale:** The essence of delegation is that the superior gives the subordinate part of his or her own authority. Power is not conferred by the organisation, so it cannot be delegated: it must be possessed. The most important thing to note is that responsibility is not delegated: the superior makes the subordinate responsible to him for the authority he has delegated, but he remains responsible for it to his own boss.
- Pitfalls:** It is easy to confuse these concepts, which is why they would make an excellent exam question.
- 14.6 C **Rationale:** Skilling was an important aspect of scientific management – but multi-skilled team working wasn't. Taylor's approach to job design (referred to in option A) was to break jobs down into single, simple tasks which were given to an individual as a whole (specialised, repetitive) job for an individual. The other options are key techniques (which, as a question in the Pilot Paper pointed out, are still prevalent in some work environments today ...)
- 14.7 A **Rationale:** Option B is not a central concern of human relations: rather, this could apply to the scientific management school. Option C is a contribution of the contingency school. Option D has not yet been provided by any school of management or motivation theory: apart from anything else, business success depends on factors other than the productivity of the workers.
- 14.8 C **Rationale:** Democratic is a 'joins' style: decision is more or less by vote or consensus. Consultative means that the leader takes subordinate views into account, but still makes the decision. Autocratic is basically a 'tells' style and persuasive is a 'sells' style.
- 14.9 B **Rationale:** The monitor role involves scanning the environment and gathering information from a network of contacts. As spokesperson, the manager can then provide information on behalf of the department or organisation to interested parties. As disseminator, (s)he can also spread relevant information to team members. The role of leader means hiring, firing and training staff.
- Pitfalls:** Options B, C and D are all information roles, so the distinction between them is quite fine. However, questions have been set at this level of detail, so such models are worth learning.
- 14.10 C **Rationale:** This is the key definition of the supervisory role: it is between non-managerial and managerial, acting as an information filter and overlap (since supervisors both do operational work and fulfil some managerial functions at a low level). Middle line and junior management are higher, since they are already managerial positions.
- 14.11 A **Rationale:** A consultative style is the most popular among subordinates, although a 'sells' style is perceived to be most used by leaders – and a 'tells' style encourages the highest productivity in many circumstances.
- 14.12 B **Rationale:** Responsibility is the duty to perform an action. Power is the ability to perform an action (and in particular, to influence others). Influence is a process by which a person can direct or modify the behaviour of another person.
- Pitfalls:** These are fine distinctions in meaning – but they underpin the idea of management and leadership and are an excellent source of potential exam questions.
- 14.13 B **Rationale:** Interpersonal roles are based on the manager's formal authority: they include the roles of figurehead, leader and liaison. Informational roles are based on the manager's position in internal and external information networks: they include monitor, spokesperson and disseminator. Decisional roles relate to the work of the manager's department: entrepreneur, disturbance handler, resource allocator and negotiator.
- 14.14 C **Rationale:** Contingency theories are based on the belief that there is no 'one best way' of leading but that effective leaders adapt their behaviour to changing variables. Adair's model sees the leadership process in a context made up of the task needs, individuals' needs and group needs.

- 14.15 B **Examiner's comments.** This question was not handled quite as well as some others. Students must ensure that they understand the main principles associated with the management theories in the study guide.
- 14.16 A **Rationale:** This is a description of John Adair's action-centred leadership model. Contingency theory is more general: indeed, Adair's model is within the contingency school of thought. The managerial grid is based on two dimensions: concern for task and concern for people. Dispersed leadership (Heifetz) is the idea that individuals at all organisational levels can exert a 'leadership influence'.
- 14.17 B **Rationale:** Planning is about determining objectives and how to reach them. Controlling is measuring and adjusting activities in line with plans.
Ways in: even if you didn't recognise the description of organising, you could probably have eliminated the other options.
- 14.18 C **Rationale:** Fayol's five functions of management are: planning, organising, commanding, co-ordinating and controlling. It is assumed that subordinates will carry out a command whether motivated or not.
- 14.19 B **Rationale:** Drucker grouped the work of the manager into five categories, the fifth being developing people. The other options are from Mintzberg's managerial role types.
- 14.20 A **Rationale:** Heifetz wrote on dispersed leadership, Fielder carried out research on the notion of leadership and Blake and Mouton published the managerial grid.

15 Recruitment and selection

- 15.1 C **Rationale:** Screening means sorting through application forms received, in order to separate out candidates which are clearly ineligible for the vacancy, immediately worth short-listing and so on. It is selection because it is part of the process of measuring candidates against requirements, and selecting those who are most suitable. Recruitment is the process of defining requirements and reaching potential applicants.
- 15.2 B **Rationale:** This is job description rather than job analysis, because a job description is the statement produced from a process of job analysis. This is job description rather than personnel specification, because it addresses the requirements of the **job**, rather than the qualities of the ideal job holder or person. Job advertisement is just a distractor.
Pitfalls: The difference between job description and personnel specification has cropped up frequently in exams over the years. There is potential for confusion: remember that one describes the 'job', the other the 'person' ...
- 15.3 C **Rationale:** 'Motivation' is a heading in an alternative method of person specification (the Five Point Pattern of Personality, by J Munro Fraser). Rodger's Seven Points are: physical make-up, attainments (qualifications), general intelligence, special aptitudes, interests, disposition (temperament) and circumstances.
- 15.4 B **Rationale:** The current trend is to devolve recruitment and selection (among other HRM activities) increasingly to line managers, who handle recruitment within their own departments.
- 15.5 D **Rationale:** All the other criticisms about the reliability of selection tests are valid – and yet tests are **still** more reliable than interviews at predicting performance in the job!
- 15.6 D **Rationale:** A leading question pushes the interviewee to give a certain answer. (In this case, it is obvious that the interviewer expects the interviewee to agree.) An open question requires self-expression; a closed question invites a one word either/or answer, and a problem-solving question presents candidates with a situation and asks them to say how they would deal with it.
Pitfalls: This is an easy aspect of interviewing technique to set questions on: make sure you can identify all types of questions.

- 15.7 C **Rationale:** This is a disadvantage because there may not be a clear interview strategy, and candidates may have trouble switching from one topic to another. Option A is an advantage, because it reduces individual bias, and saves time in sharing assessments (eg compared to a series of one-to-one interviews). Option B is an advantage, because a single interviewer may not be able to spot candidate weaknesses in technical areas. Option D is an advantage, because personal rapport may lead to favourable bias on the part of an interviewer.
- 15.8 A **Rationale:** These are all different types of bias and errors of judgement in interviewing. Option A is halo effect. Option B is contagious bias. Option C is stereotyping. Option D is projection.
Ways in: Stereotyping is probably the most recognisable of the options, so you could at least narrow your options by ruling out option C.
- 15.9 B **Rationale:** Proficiency tests focus on current ability to perform tasks. 'Standardised' is a desirable quality of any type of test, meaning that it is applicable to a representative sample of the population being tested. 'Sensitive' is another desirable quality meaning that the test can discriminate between different candidates.
- 15.10 C **Rationale:** Assessment centres are group assessments, usually used for higher-level positions, because of the time and costs involved in exploring candidates' personalities and skills in depth.
Pitfalls: Don't fall for the common trap of thinking that an assessment 'centre' is a place!
- 15.11 C **Rationale:** Two employer references provide necessary factual information and comparison of views (to minimise bias). The other options are untrue: option A because references are highly subjective and/or deliberately limited; option B because personal references are selected to be supportive (you can choose your friends in a way you can't choose your employers!).
- 15.12 D **Rationale:** Job descriptions can be narrow and restrictive, giving people a limited sense of what is their 'job' and what isn't. This can create demarcation lines which prevent people from flexibly switching tasks, or working effectively in multi-skilled teams. The other options are all potential uses of job descriptions, because they clearly state all the elements of a job: for calculating their value to the organisation (job evaluation), identifying gaps in job holders' ability (training needs analysis) and preparing selection criteria (recruitment).
- 15.13 C **Rationale:** A professional journal would not be read by the target audience. National newspapers will be too expensive, given that most of the audience will not be the firm's target group: low level positions are more likely to attract local applicants.
Pitfalls: If asked about choice of advertisement media, you need to think about cost and audience targeting together.
- 15.14 A **Rationale:** Succession planning develops managers in order to ensure managerial continuity over time – and internal promotion is a key way of grooming managers for higher positions. Induction time would be shorter, because an internal promotee is already familiar with the organisation's culture, structures, systems and personnel. Innovation is **not** necessarily supported by internal promotion, because it does not bring 'new blood' into the organisation.
- 15.15 B **Rationale:** 'Maximum' information is not the point of interviews: squeezing as many questions as possible into the time allowed can restrict the flow of communication and put unnecessary pressure on the candidate, while a lengthy open-ended interview will be costly. The **relevance** of the information for selection is more important.
- 15.16 D **Rationale:** The key factors here are the urgency, and the fact that the consultants do not know the organisation: there is not enough time to give the consultants an adequate understanding of the complex recruitment needs. In option A, consultants would bring a 'fresh eye' and avoid bringing the same old types of people into the organisation. In option B, consultants would provide expertise and resources to handle large-scale recruitment, which the organisation lacks in-house. In option C, the organisation can be confident that use of consultants would not be resented and resisted.
Ways in: It helps if you have a checklist in your head of reasons to outsource recruitment: 'new blood', resources/expertise and internal support would certainly be on that list. 'Lead time to brief consultants on the needs of the organisation' would be on the list of reasons **not** to use consultants ...

- 15.17 C **Rationale:** Attributes are simply 'characteristics' of any kind. Skills are learned behaviours, rather than capacities.
- 15.18 C **Rationale:** This should have been fairly straightforward. It would be quite difficult to write a job description or a person specification if a vacancy had not first been identified.

16 Diversity and equal opportunities

- 16.1 D **Rationale:** As well as compliance with relevant legislation, these are the main arguments for having an equal opportunities policy. It is good HR practice to attract and retain the best people for the job, regardless of race or gender.
- 16.2 C **Rationale:** The right to equal pay for work of equal value was established by the Equal Pay (Amendment) Regulations 1984. This does **not** imply that the woman has to be in the same job (option D). Job evaluation is recommended as a way of establishing relative values of jobs, but is not compulsory (option B). Equal Pay deals only with sexual discrimination – not race or other grounds.
- 16.3 D **Rationale:** Positive discrimination refers to actions being taken which give preference to a protected person, regardless of genuine suitability and qualification for the job. Statement 1 is not positive discrimination as the steps are only taken to encourage people to apply. It does not say that they will necessarily be accepted.
- Diversity goes further than equal opportunities. The ways in which people meaningfully differ in the work place include not only race and ethnicity, age and gender but personality, preferred working style, individual needs and goals and so on.
- 16.4 C **Rationale:** Harassment is the use of threatening, intimidating, offensive or abusive language or behaviour focused on the race, religious belief, sex or sexual orientation of another person. This sounds like victimisation, but victimisation is a separate form of discrimination, involving penalising someone because they are involved in a claim of discrimination against an employer.
- 16.5 C **Rationale:** A business can better understand (and meet) the needs of market segments if it employs representatives of those segments: this is a business benefit, because it enhances customer loyalty, sales revenue, profitability etc. Option A is a legal/moral benefit (and addresses equal opportunities rather than diversity). Option B is a benefit to employees in a diverse organisation. Option D is not true of diversity, which requires significant management investment and less 'standardised' HR solutions.
- 16.6 B **Rationale:** The duty is to make 'reasonable' adjustments. The other statements are true.
- 16.7 A **Rationale:** Now that age discrimination legislation is in force, this would be direct discrimination (akin to saying 'blue-eyed, English-speaking people only need apply'). The other options may well be construed as **indirect** discrimination.
- 16.8 C **Rationale:** The organisation has laid itself open to a claim of indirect discrimination, because if the selection decision had been made on the basis of a question asked of a woman but **not** of men, it may have been construed as such. (This rules out options D and A.) The claim would not succeed (ruling out option B) because the organisation would be able to justify the apparently discriminatory conditions on non-discriminatory (job-relevant) grounds.
- Pitfalls:** You need to get to grips with the basics of how this works, and recognise examples when you see them.
- 16.9 C **Rationale:** Equal opportunity is a narrower concept based on eradicating discrimination based on the crude dimensions of individual difference. The other options are just distractors.
- 16.10 A **Rationale:** Positive discrimination (treating a minority group 'unfairly' well) is not permitted, except in relation to training provision. 'Quotas' are positive discrimination, because selection decisions cannot be justified on non-discriminatory grounds: 'targets' (as in option C) are 'positive action' – because they lead organisations to encourage under-represented groups to apply for jobs, and make non-discrimination a performance measure for selectors.

17 Individuals, groups and teams

- 17.1 C **Rationale:** Members of an effectively functioning group will take an active interest (as opposed to option C) in decisions affecting their work. Option A is healthy, particularly in avoiding problems that occur when groups seek consensus at all costs (eg 'group think'). Option B is healthy, as it unites and stimulates the group. Option D can be a sign that the group is supporting the performance of its members – not just that they are focusing on their own performance at the expense of the group.
- Pitfalls:** If you were trying to go by 'common sense' instead of knowledge, you might think that intra-team disagreement and inter-team competition were negatives: not so. The examiner does not set 'trick' questions, but questions can be designed to separate those who have studied from those who are guessing!
- 17.2 B **Rationale:** Personality is a relatively stable and distinctive concept: it is very difficult (if not impossible) to change personality, and the attempt has radical effects! The other options are constructive approaches to handling personality clashes in a team.
- 17.3 B **Rationale:** This is typical of 'storming' behaviour. Forming would be more tentative: just getting to know one another. Norming would be further along in the process of settling into shared values and behaviours.
- Pitfalls:** Don't assume that 'storming' is all about conflict! If you did this, you might have mistaken this description for norming, say.
- Ways in:** Underline some key words in the micro-scenario: 'debating', 'factions', 'disagree' ...
- 17.4 C **Rationale:** This is the definition of attitudes. Personality traits are relatively stable, enduring qualities of an individual's personality (eg 'impulsiveness'). Perceptions are how people 'see' things, according to how the brain selects and organises information. Emotional intelligence is a concept popularised by Daniel Goleman to describe awareness of, and ability to manage, one's own emotions and those of others. None of these concepts is explicitly mentioned in the syllabus – but you are required to know something about the 'characteristics of individual behaviour', so it is worth getting to grips with some of the basics.
- Ways in:** Perceptions are about thinking, emotions are about feeling – and the question asked for something that combines thinking, feeling and intention. So you could probably rule out B and D.
- 17.5 C **Rationale:** Teams are not the best vehicle for crisis decision-making, because group decision-making takes longer, and decisions may protect the team at the expense of the right (possible tough) solution. Teams are, however, great for decision-making where the hearing of different viewpoints is beneficial. They are also great for ideas generation (think of group brainstorming) and coordination (teams are often cross-functional). You might have hesitated over option D, but it is important to realise that distance is now no obstacle to team working (think of virtual teams, connected by IT and communications links).
- Pitfalls:** Don't forget 'virtual' teams in your thinking.
- 17.6 B **Rationale:** Blocking (or difficulty stating) is where members put obstacles in the way of proposals: this may be a positive contribution in circumstances where the proposals are risky or unrealistic – but it is probably contributing to the problem here. Bringing-in is encouraging the contribution of others; summarising, drawing together passages of discussion; testing understanding, checking whether points have been understood. They are generally supportive behaviours, which could be used to get the team back into constructive discussion.
- 17.7 B **Rationale:** 'Compatibility' is not the same as 'homogeneity': teams need diversity, in order to have a mix and balance of contribution and roles. The other options correspond to team identity, and shared objective: two of the key tools of team building.
- 17.8 B **Examiner's comments:** The examiner commented that only 33% of the students chose the correct answer. The key words in the question were 'keen eye for detail', 'always meets deadlines' and 'reluctant to involve others'. These phrases are typical characteristics of a completer-finisher.

- 17.9 C **Rationale:** The definition of a group is, basically, 'any collection of people who **perceive** themselves to be a group' (Handy). Identity means that there are acknowledged boundaries to a group, which define who is 'in' and who is 'out', 'us' and 'them'. Groups **may** have a defined purpose, but not always. Conformity can be an attribute of groups or crowds.
- Pitfalls:** Note that this wasn't a question about the difference between a group and a team – although this too would make a good exam question...
- 17.10 A **Rationale:** This should be straightforward if you have understood the Belbin model. A healthy team has a mix and balance of roles. However, members can adopt more than one role, or switch roles as required: there need not be nine members with fixed roles. Belbin argues that it is the **process** roles (how people behave, contribute and interact with others), rather than the functional roles (technical skills and operational knowledge) that impact on team functioning – although functional roles are still important for getting the task done!
- 17.11 C **Rationale:** Adjourning is where the group sees itself as having fulfilled its purpose, and there is a process of disconnecting from the task and group – because there will have to be a renegotiation of aims and roles for the new task. Dorming is where a group grows complacent about performance. Norming is a much earlier stage in the cycle, where the group reaches agreement about work methods, roles and behaviours.
- Pitfalls:** Dorming and adjourning are all late stages of group development, and can be confused if you are not clear about them. Although 'forming, storming, norming and performing' is better known, these additional stages are part of Tuckman's model.
- 17.12 C **Rationale:** Competition with other groups enhances solidarity, and competition within a group destroys it, so options A and B are the opposite of solidarity-enhancing. Option D would lead to 'group think': inability to confront problems, lack of criticism of poor decisions, false consensus. It may create high solidarity, but not healthy solidarity.
- 17.13 B **Rationale:** A role may be seen as a part you play: people sometimes refer to wearing 'different hats' in different situations or with different groups of people.
- 17.14 B **Rationale:** A multi-skilled team is one which brings together versatile individuals who can perform any of the group's tasks. Multi-disciplinary (or multi-functional) teams bring together individuals with **different** skills and specialisms, so that their skills can be pooled or exchanged. Self-managed teams are given discretion to plan their own task sharing and work methods, within defined task objectives: there is no suggestion that this is the case here. A virtual team is a geographically dispersed team, connected by information and communication technology (ICT) links.
- 17.15 D **Rationale:** The Shaper is the 'dynamo' of the team: one of the forms of leadership in Belbin's model. The Plant is the ideas person and creative problem-solver. The Co-ordinator is the chairperson, clarifying goals, delegating, promoting decision-making. The Implementer is the person who turns ideas into practical actions.
- Pitfalls:** There are several 'leader' roles in Belbin's model: you need to distinguish between them. The Plant is an ideas leader; Resource investigator an entrepreneur; Co-ordinator a task organiser; and the Shaper an interpersonal leader.
- 17.16 D **Rationale:** You may have hesitated between C and D. However blocking is putting obstacles in the way of a proposal without offering any alternatives; whereas shutting-out is interrupting or overriding others and taking over.
- 17.17 D **Rationale:** The team is executing its task and the team briefing is dealing with progress to date.

18 Motivating individuals and groups

- 18.1 C **Rationale:** Intrinsic rewards are 'part of the work itself: extrinsic rewards are 'external' to the work itself.
- Pitfalls:** Potential confusion between intrinsic and extrinsic: a classic exam test!

- 18.2 C **Rationale:** Affiliation is actually a category in another need model by David McClelland. The other options are Maslow's (although freedom of inquiry and expression overarches the hierarchy itself).
- 18.3 B **Rationale:** In Herzberg's theory, only training is a 'motivator factor'. The others are all 'hygiene' factors: if they are inadequate, employees will be dissatisfied, but even if they are got right, they will not provide lasting satisfaction or motivation. Herzberg argued that satisfaction comes only from the job.
Pitfalls: Herzberg is frequently examined, and examiners are frustrated to see students get the basics of the theory wrong! Make sure you can sort the motivator factors from the hygiene factors.
- 18.4 A **Rationale:** Goals are things people choose to pursue: each individual will have their own goals, which may vary with time, circumstances and other factors. The idea of innate (in-born, instinctive) needs is that they are biological or psychological imperatives, common to all people. (This is what makes it possible to have need theories with discussion of only a few innate needs.) Satisfaction arises when a goal is achieved.
- 18.5 C **Rationale:** Willy's expectancy (expectation that by working hard he will be given the team leadership) is high, but valence (importance to Willy of becoming a team leader) is neutral, because he has both positive and negative feelings about it. Since $\text{Motivation} = E \times V$, if V is 0, motivation is also 0.
Pitfalls: Make sure you get valence and expectancy the right way round, and that you recognise why Willy's valence is 0.
Ways in: Work through the equation, calculating your own values for V and E ...
- 18.6 A **Rationale:** Herzberg used the other three terms to describe the same set of factors: the ones that maintain morale but do not positively motivate (maintenance); prevent dissatisfaction but do not promote satisfaction, in the same way that hygiene prevents ill-health but does not promote well-being (hygiene); and that relate to the environment of work rather than to the work itself (environmental). The opposite set of factors is 'motivator' factors in the work itself, which – according to Herzberg – positively create satisfaction and motivation to superior performance.
Pitfalls: An exam question may refer to hygiene factors by any one of its three names, so it is worth using this question to check that you know them all!
- 18.7 C **Rationale:** Autonomy is a degree of freedom or discretion in the job: the removal of restrictive controls.
Ways in: You may have spotted that all the core dimensions are all intrinsic to the job itself: they are all what Herzberg would call 'motivator' factors. You could then eliminate some of the options that are clearly extrinsic to the job, or 'hygiene' factors ...
- 18.8 C **Rationale:** Participation will only work if the individual has the ability and information to participate effectively (the principle of 'capacity'): otherwise, they will feel frustrated and under pressure. You may have hesitated over option D, but this is necessary for people to take participation seriously (the principle of 'consistency').
- 18.9 A **Rationale:** Theory X is the managerial assumption that most people dislike work and responsibility and will avoid them if possible they have to be coerced and controlled to work adequately – hence the kinds of management measures described. Theory Y is the managerial assumption that people can be motivated to accept challenge and responsibility and contribute willingly to the firm – resulting in a quite different management style!
Pitfalls: You really do need to know which way round X and Y are! (If it helps, think of X as a 'cross' against workers' names ...)
- 18.10 C **Rationale:** Options A, B and D are essential for an individual to work out how much effort will be required, and whether it will be worth it for the rewards expected (due to consistency) to be available. However, 'immediacy' is not necessarily required: people may have a high tolerance for 'delayed gratification', and be willing to wait for rewards as long as they have a reasonable expectation that they will eventually accrue. (As a student, for example, you may be working sacrificially hard now, in order to gain qualifications that will benefit your career in several years' time.)

- 18.11 D **Rationale:** Team members may work for individual rewards, rather than contributing to the group, especially since there is a problem offering rewards for less measurable criteria such as team-work. Option A is clearly a benefit. Option B is a benefit of PRP because it relates rewards directly to business objectives. You may have hesitated over option C but this is a benefit because PRP is a way of rewarding employees when there is no other way to do so (eg because they have reached the top of the salary/wage range their position is eligible for).
- 18.12 C **Rationale:** Job enrichment cannot offer management a cheap way of motivating employees: even those who want enriched jobs will expected to be rewarded with more than job satisfaction. The other options have been found in practice to be benefits of job enrichment.
- 18.13 B **Rationale:** According to Maslow, self-actualisation is the final 'need' to be satisfied. It is the fulfilment of personal potential. Maslow claims that this can rarely be satisfied.
Ways in: It might be worth memorising the triangular diagram and perhaps adding pictures to help you remember.
Pitfalls: You may have hesitated over option A but this was just a fictitious distracter. Esteem needs and physiological needs are lower down the hierarchy.
- 18.14 B **Rationale:** Job evaluation focuses on job content, to measure the relative value of jobs, compared to each other, **not** their worth in money terms. Actual pay levels are set with reference to the other options, among others.
- 18.15 A **Rationale:** Option A is valence (V). Option C refers to 'expectancy' (E). Option B is 'force of motivation' (F): the product of valence and expectancy. Hence the equation: $F = V \times E$.
- 18.16 B **Rationale:** Eva's new tasks are of the same skill level and responsibility as her original task, so her job has been horizontally enlarged rather than vertically enlarged (which would be job enrichment). If she had gone from just packing one shift, to just stamping on the next shift (and so on), this would have been job rotation.
Pitfalls: Any area like this where students frequently confuse similar terminology is ripe for examining. Read, think and check your answers carefully, to avoid careless errors!
- 18.17 B **Rationale:** Micro-division of labour (or job simplification) is breaking down jobs into their smallest possible components, and having one person carry out one component. Division of labour (option C) is specialisation, but not to this extent. Job enlargement implies greater task variety, and empowerment, greater task significance and responsibility.

19 Training and development

- 19.1 C **Rationale:** The Theorist seeks to understand basic principles and to take an intellectual, 'hands off' approach prior to trying things. Pragmatists are the opposite. You may have hesitated over option A, but Reflectors learn by thinking things through, rather than necessarily by applying theoretical concepts.
Pitfalls: This is an area ripe for exam questions, because of the clarity of the style classifications. Make sure you can identify the label to go with a description and vice versa.
Ways in: You could probably rule out Pragmatist quite quickly, because of Sara's dislike of 'hands on' methods.
- 19.2 C **Rationale:** The scientific approach to problem-solving **is** a characteristic of learning organisation, but this involves experimentation and learning by testing ideas and making mistakes. Learning organisations have a high tolerance for risk, and regard errors as learning opportunities.
Ways in: If you don't recognise the concept or model, don't give up and guess: think through the options and how they relate to each other. A question phrased 'which is **not**...?' suggests that you are looking for the 'odd one out'. If you look at the options, you should find three that are compatible with each other – leaving one that isn't.

- 19.3 D **Rationale:** This is a positive and realistic view of the benefits and limitations of training: not **all** performance problems are amenable to training, and may need other sorts of intervention (discipline, counselling, equipment repair, job re-design, motivation and so on). Option A would fail to involve trainees and line managers, who are key stakeholders in training. Option B would limit training provision, ignoring its significant benefits. Option C would fail to design training programmes appropriately for specific training needs and learner style preferences.
- 19.4 B **Rationale:** Conditioning may have sounded familiar if you only read as far as 'modification of behaviour', but it involves specific repetition-and-reward techniques. Education is the gradual acquisition of knowledge, by learning and instruction, often leading to qualifications.
Pitfalls: This kind of related terminology lends itself to exam questions. Training, education and development all involve 'learning', but the learning experiences are of different types, and with different overall aims.
- 19.5 B **Rationale:** The learning cycle is experiential learning or 'learning by doing'. 'Action learning' sounds similar, but is actually a specific learning method by which managers are brought together as a problem-solving group to discuss real work issues. Programmed learning is highly structured learning, which doesn't apply here. Reflection is a way of thinking about what you have learnt.
- 19.6 C **Rationale:** 'Employability' refers to an individual's having a portfolio of skills and experience that are valuable in the labour market, thus enhancing his or her mobility (and ability to get a job outside the present employer). This is a double-edged sword for the organisation: it is socially responsible and fosters employee satisfaction but may also cause a skill drain to other organisations. You should be able to see how training contributes to the other options, and why they are benefits for the organisation.
Pitfalls: Look out for qualifier keywords like 'for an organisation' (that is, **not** 'for the individual!'). Think carefully through 'which is the exception?' questions, too. Logically, an option may be an exception for more than one reason: in this case, because it isn't a benefit (but a drawback) **or** because it isn't a benefit to the **organisation** (but a benefit to the individual). In a well designed question, you should get the same answer either way!
- 19.7 C **Rationale:** Day release is 'off-the-job', because the learning comes from the employee's attending a college or training centre one day per week. The other methods are all 'on the job'.
Pitfalls: Note the variety of 'on the job' methods: don't forget to include job rotation (which you might otherwise connect with job design and Herzberg) and temporary promotion (which you might not think of as training).
- 19.8 D **Rationale:** On-the-job approaches support 'transfer of learning': skills are learned in the actual context in which they will be applied – so application is seamless. Options A and B are advantages of **off**-the-job training: the learners don't have the distraction of other work duties, and errors while learning are less likely to have real consequences. You may have hesitated over option C, but there is a risk that by learning on the job, people will pick up 'bad habits' and short-cuts – rather than best practice.
- 19.9 C **Rationale:** Level 1 measures how employees rated the training. Level 2 measures how much they learned: what they know or can do that they didn't do before. However, for a manager concerned with departmental productivity, the important thing is whether the trainees **applied** what they learned effectively to the job: Level 3. Level 5 is the impact of training on the wider 'good' of the organisation and its stakeholders: this kind of information is usually only available (and worth the cost of gathering and analysing it) at senior management level.
- 19.10 C **Rationale:** Option A relates specifically to management effectiveness and succession; option B to planning opportunities for new challenges and learning through career moves (whether vertical or lateral).
- 19.11 A **Rationale:** A Pragmatist likes to learn in 'hands-on' ways that have a direct link to real, practical problems – so on-the-job practice is ideal. Option B would suit an Activist – a similar style, enjoying practical, active, participative learning, but without the need to see a work-related 'payoff'. Option C would suit a Reflector, since a journal offers opportunity for learning through reflection. And option D would suit a Theorist, with a preference for structured intellectual study.

- Pitfalls:** The pairs of 'hands off' and 'hands on' styles are quite similar: don't confuse them. It may help to relate each style to a different stage of Kolb's learning cycle, to make them more distinct. The Pragmatist focuses on the job; the Reflector reflects on what happened; the Theorist seeks to understand it; and the Activist plans to try something new.
- 19.12 C **Rationale:** Employee satisfaction would not be regarded as a quantifiable benefit – unless it could be correlated directly with figures such as reduced absenteeism and labour turnover (although it would be difficult to relate this specifically to training, as opposed to other effects).
- Pitfalls:** Watch out for qualifier keywords in the question like 'quantitative' or 'qualitative' (benefits, characteristics). Examiners don't try to trick you – but they do like you to read questions carefully!
- 19.13 A **Rationale:** It is important to separate development, training and education in your mind for this syllabus. Development is the growth of a person's potential. Training is a planned learning event. Education is knowledge that is acquired gradually by learning or instruction.
- 19.14 C **Rationale:** A formal training needs analysis involves systematic study (at the level of the individual, job or department) of the required level of competence, the present/actual level of competence and any gap between them. The other options are all ways in which learning needs may 'emerge' in the course of work: option A through monitoring developments in your field; option B as a 'critical incident' and option D as on-going performance feedback.
- 19.15 A **Rationale:** It is the networked aspect that makes e-learning different from CBT (using stand-alone computers). Blended learning involves learning using a combination of different methods and technologies: this would be the correct option if the learning support was available from face-to-face tuition, say.
- Pitfalls:** Learning technologies is fertile territory for exam questions, because there are so many closely-related methods and terms (coaching, mentoring etc).
- Ways in:** Just about anything with an 'e-' in front of it, these days, is about the internet – not stand-alone computers, so you should be able to rule out option B.
- 19.16 A **Rationale:** This is Kolb's learning cycle which is a 'learning by doing' approach. It puts the learner in an active problem-solving role and encourages them to formulate and commit themselves to their own learning objectives.
- Ways in:** Simplified, this learning by doing approach involves:
- Act → Analyse action → Suggest principles → Apply principles → Act ... and so on →
- 19.17 A **Rationale:** This can then be used to plan for the other options.

20 Performance appraisal

- 20.1 A **Rationale:** Job evaluation is a method of measuring the value of a job, **not** the performance of the person holding the job. The other options are key applications of performance appraisal. (Succession planning is a form of promotion or potential review, aimed at identifying future managers.)
- Pitfalls:** This is a common source of confusion (akin to the difference between job descriptions and person specifications in recruitment).
- 20.2 D **Rationale:** Overall assessment is narrative comment without the guidance on how the terms should be applied. Grading uses rating scales (definitions of performance on each characteristic from 1-5, say). Behavioural incident methods compare specific behaviours against typical behaviour in each job.
- 20.3 B **Rationale:** Achievable (which is part of the SMART objectives framework) is different from 'easily achievable': one of the key points of performance measures is that they should be motivational, which means that they should be at least a little bit challenging.

- 20.4 B **Rationale:** This manager tells in the first part and listens in the second part of the interview, taking on a dual role as critic and counsellor – and not assuming that all performance problems are the fault of the employee himself. Tell and sell would be more one-sided ('selling' simply being gaining acceptance of the evaluation and improvement plan). Problem-solving is even more of a collaborative, proactive process, with the manager in the role of coach. Sell and listen is not an appropriate method.
- 20.5 D **Rationale:** 360-degree is, by definition, a 'rounded' view of an individual's performance from the appraisee, colleagues, superiors, subordinates and relevant business contacts. Self appraisal is likely to be biased by self-perception; peer appraisal by team relationships; and upward appraisal by subordinates' fear of reprisals.
- 20.6 B **Rationale:** This is the definition of performance management. It differs from performance appraisal in its emphasis on collaboration, objective-setting and on-going management.
- 20.7 C **Rationale:** These are all valid criteria. The fifth criteria would be relevance not results.
- 20.8 A **Rationale:** Multi-source feedback is another term for 360-degree feedback or appraisal. Management by objectives and performance management are both approaches to collaborative objective-setting, on-going development and periodic review.
- 20.9 D **Rationale:** This is a double edged sword: a link between assessment and reward may motivate employees to take appraisal seriously, but can also make it threatening if they fear that they haven't done well. Moreover, there are other factors in setting rewards – and if there isn't a real connection between a positive appraisal and a meaningful reward, the 'implication' that there is will only undermine the appraisal system. The other options are clearly positive.
- 20.10 C **Rationale:** Options A, B and D were identified as barriers to effective appraisal by Lockett: 'appraisal as unfinished business' (distracting from future-focused improvement planning); 'appraisal as bureaucracy' (a mere form-filling exercise); and 'appraisal as an annual event' (where on-going performance management is required). Lockett also identified 'appraisal as confrontation' as a barrier, but this is not what is implied by Option C, which reflects a genuine, job-relevant, problem-solving approach.
- 20.11 C **Rationale:** Although appraisals can be used to measure the extent to which an employee is deserving of a bonus, it cannot be used to measure the effectiveness of the appraisal scheme itself. Funds may not be available for bonuses but this does not mean that the appraisal system is ineffective. Appraisals must be carried out with serious intent and managers must be committed to the system. The system should be fair and reasonably objective.
- 20.12 C **Rationale:** This is an advantage because it gives the individual a greater sense of meaning and contribution to the organisation. It is also an advantage to the organisation – as are all the other options. You may have hesitated over Option A: this would certainly be an advantage to appraisees identified for promotion – but not everyone.
- 20.13 D **Rationale:** This involves setting specific targets and standards of performance, and measuring performance against them. Behavioural incident focuses on job behaviours; rating scales are the same as grading; and guided assessment is narrative comment on defined characteristics.

21 Section D MTQs

- 21.1 (a) (i) C
(ii) A
(iii) D
(iv) B

These all relate to the descriptions of Belbin's team roles.

- (b) C Victimisation occurs when an individual is penalised for giving information in a discrimination claim against an employer.
- (c) True Note that this is not the same thing as positive discrimination.
- 21.2 (a) (i) B Intrinsic rewards arise from the performance of the work
- (ii) C An incentive is a promise or offer of a reward
- (iii) A Extrinsic rewards are separate from the job itself and dependent on the decisions of others
- (iv) A Extrinsic rewards are separate from the job itself and dependent on the decisions of others
- (b) A, D C is job rotation and B refers to job enlargement. E is job simplification.
- 21.3 (a) (i) A
- (ii) B
- (iii) D
- (iv) C
- These all relate to the classifications of Honey and Mumford.
- (b) B, E The other options are all on the job training methods.
- 21.4 (a) (i) D Personal development can help to foster employee job satisfaction, commitment and loyalty.
- (ii) A This may include the development of management/leadership skills or management education such as an MBA.
- (iii) C This is an example of continuing professional development (CPD). CPD is based on the belief that a professional qualification is the basis for a career lifetime of development.
- (iv) B The trend for delayed organisations reduces opportunities for promotion, so opportunities are planned for sideways or lateral transfers.
- (b) B, D For training to be effective there should be timely feedback and also clear objectives for the training. Training does not need to be on or off the job to be effective, it can be either. Training does not need to be expensive to be useful.
- 21.5 (a) (i) D This scheme is based on the results achieved by the sales staff.
- (ii) B Each manager is graded on their performance.
- (iii) A This is a guided assessment method.
- (iv) C This method concentrates on employee behaviour measured against typical behaviour in each job.
- (b) C This is a problem solving approach.
- (c) True This is one of the objectives of performance appraisal.
- 21.6 (a) B Negative power is the use of disruptive behaviour to stop things from happening.
- (b) (i) Heifetz: theory of dispersed leadership
- (ii) Fiedler: contingency theory; people become leaders partly because of their own attributes and partly because of their situation
- (iii) Bennis: put forward specific differences between managers and leaders

22 Personal effectiveness and communication

- 22.1 C **Rationale:** The communication here is both upwards and 'sideways'.
- 22.2 D **Rationale:** Personal development planning is something the individual does for his or her own improvement and learning, although a coach, mentor or counsellor may facilitate this process. Options A, B and C are all types of 'developmental relationships': a coach helps a trainee for a brief period to work on job-relevant skills; a mentor helps a less experienced person over the long term to work on more general personal development issues; and a counsellor helps an individual to work through emotional or social issues or problems.
Pitfalls: These are distinct roles: make sure you can identify them correctly.
- 22.3 C **Rationale:** An assertive style of communication will help in time management, because it enables you to say 'no' (appropriately) to interruptions and unscheduled demands. The other options are problems: options A and B are invitations to waste time in non-essential communication.
- 22.4 C **Rationale:** The wheel has a central figure who acts as a hub for all messages between members. The circle involves a message going from one person to another. The 'Y' involves a message going from person to person up a chain, until it reaches someone who is in contact with more than one person. And all-channel involves everyone sending messages to everyone else.
Ways in: If you can visualise the situation, it helps: you could then eliminate the circle and all-channel, at least.
- 22.5 C **Rationale:** A mobile phone enables both colleagues and customers to reach you when you are out of the office. It also enables you to call the office eg to check inventory availability of items, place immediate orders and so on. (If you had a laptop, this would be even better: you could have direct connection with office systems.) Options A and B all involve linked computer systems, so are not relevant.
- 22.6 A **Rationale:** Security is a key vulnerability of email: there is no guarantee of privacy (and a risk of accidentally sending the message to the wrong person). The other options are significant strengths, however. If you hesitated over D, think about how email can be used for memos/reports/letters, and how many formats (visual, audio) can be 'attached' to email messages.
- 22.7 B **Rationale:** Counselling is facilitating others through the process of defining and exploring their own issues and coming up with their own solutions: this is relatively non-directive. Advising is a relatively directive role: offering information and recommendations on the best course of action to take. Counselling is often **not** directly task-related: it is often about helping employees to formulate learning goals or to cope with work (or non-work) problems.
- 22.8 C **Rationale:** The grapevine is a 'rumour mill': information is often inaccurate and exaggerated. Communication is, however, fast, selective (in that information is not randomly passed on to everyone) and up-to-date (information is often more current than in the formal system).
- 22.9 C **Rationale:** Exception reporting may improve the quality of upward communication (making it more selective), but it does not encourage it: if anything, it may create a culture in which staff don't 'bother' their superiors with information. The other options are all ways of encouraging upward flow of information and ideas – which otherwise tends to be rare in organisations.
- 22.10 D **Rationale:** The sender encodes the message and transmits it through a medium to the receiver who decodes it into information. The answer cannot be A since you need to have a message to feedback on before you provide the feedback.
Ways in: It might help you to picture the radio signal diagram in your mind.
- 22.11 C **Rationale:** Notice boards are unsuitable for upward communication, and organisation manuals and team briefings are for downward communication.
Pitfalls: You needed to be aware of the nature of a team briefing, which is for information and instructions to be given (downward) to a team.

- 22.12 C **Rationale:** Noise is the **other** main type of communication problem: interferences in the environment in which communication takes place, affecting the clarity, accuracy or arrival of the message. Redundancy is a **positive** principle in this context: you can use more than one form of communication, so that if one message does not get through (perhaps because of noise or distortion), another may. Feedback is an essential part of the communication cycle: it is the response which indicates to the sender whether the message has been correctly received.
- 22.13 D **Rationale:** The wheel was the fastest and the Y was the second fastest in Leavitt's experiment. The chain was the slowest. The reason was the fact that messages came through and were distributed from a central source.
- 22.14 A **Examiner's comments.** The examiner commented that around 50% of students got this question wrong and highlighted the point that students must clearly understand the key definitions within the syllabus. For example, coaching is not one-way so option B could immediately be eliminated. It is important to look for key words (clues) to the right answer.
- 22.15 B **Rationale:** Research shows that people pay **more** attention to non-verbal cues in interpreting what someone means than they do to the words themselves. The other statements are true.
Pitfalls: You may have wrongly selected option C if you associated non-verbal communication too narrowly as 'body language': be aware of the full range of non-verbal signals that can be given or received.
- 22.16 B **Rationale:** SMART is 'Specific, Measurable, Attainable, Relevant and Time-bounded', although versions differ. Options A and C are both very plausible – and also qualities of effective goals – but you wouldn't want to replace 'measurable', which is essential (otherwise, how will you know when you've reached your goal?).
- 22.17 B **Rationale:** You may have considered failing to communicate, but you are not given enough information in the scenario to assume that this is the case.
- 22.18 D **Rationale:** A competence framework sets out what an employee should be able to do and ought to know.
- 22.19 C **Rationale:** Focusing attention on an individual's contribution may be constructive, if it brings the employees involved to realise what each contributes.

23

Section E MTQs

- 23.1 (a) A, C These are two of the conditions of an important task. The other is that the potential consequences of failure are long-term, difficult to reverse, far reaching and costly.
- (b) (i) False Meetings without objectives can be a waste of time for all those attending.
(ii) True Constant interruptions from others can prevent work being completed. Setting aside time for these tasks will improve time management.
- 23.2 (a) (i) B Compromise involves bargaining, negotiating and conciliating.
(ii) D Integration/collaboration involves emphasis being put on the task and individual esteem being subordinate to the needs of the group.
(iii) C Dominance is the application of power or influence to settle the conflict.
(iv) A Ignoring the issue is known as denial.
- (b) (i) False Even positive compromises only result in half-satisfied needs.
(ii) True Win-win situations can result in mutual respect and co-operation.
(iii) False Compromise comes into the category.
(iv) True If one team member gets what they want at the expense of another, relationships within the team may break down.

- 23.3 (a) (i) A This is raw material to be processed.
 (ii) B This has been processed and then presented.
 (iii) B This has been processed and then presented.
 (iv) A This is raw material to be processed.
 (v) B This has been processed and then presented.
 (vi) B This has been processed and then presented.
- (b) C Strategic information will help senior managers with long-term planning.
- 23.4 (a) D The email has been sent too close to the date of the meeting, when the financial controller could have sent it much earlier. The medium, clarity and recipients of the email are all suitable for the communication.
- (b) B, C, F The grapevine operates inside the place of work, the grapevine is most active when the formal communication network is active and informal communication is more current than formal information.
- 23.5 (a) A, C Slang or jargon could create misunderstanding if the recipient of the communication is unaware of the meaning.
- (b) C This is the definition of a grievance.
- (c) B This is the definition of distortion.
- 23.6 (a) (i) Establishing priorities with Peggy
 (ii) Delegation of routine tasks
 (iii) Identification of information sources within the business
 (iv) Sequencing of interviews with relevant staff
 (v) Collation of information
 (vi) Report writing
- One of the most important things is for Susan to establish priorities with Peggy. This will enable her to delegate some of her routine work to enable her to make some time for the project.
- (b) D. This option would appear to apply more closely to a mentoring role

24 Ethical considerations

- 24.1 C **Rationale:** 'Fiduciary' means 'of trust'. Although this is a terminology question, it addresses the important point that all managers (and organisations) are accountable to some external entity and purpose.
- 24.2 A **Rationale:** Utilitarianism is based on 'usefulness': the greatest good of the greatest number. Deontology is an alternative approach based on absolute moral principles (or categorical imperatives): what is morally 'right' in a situation. Virtue ethics is a belief in pursuing positive moral qualities, which flow out into behaviour.
- 24.3 D **Rationale:** Grease money refers to payments for benefits to which the company is legally entitled – just to 'oil the wheels'. Bribery is payment for benefits to which the company is **not** legally entitled – to 'bend the rules'! In either case, this is unethical (and in some situations, illegal) – regardless of the legitimacy of the claim or the purposes to which the payment is (supposedly) put.
Pitfalls: Know the difference between extortion, bribery, grease money, gifts and hospitality.
- 24.4 B **Rationale:** The emphasis on managerial responsibility is a feature of the integrity or values-based approach to ethics management. A concern for the law alone is a compliance based approach. Options C and D are examples of responsibilities.
- 24.5 C **Rationale:** Option B is irrelevant, and option A is incorrect, since whistle-blowing gives some protection to employees from being in breach of confidentiality.
- 24.6 D **Rationale:** These are all potential ethical issues. Materials used impacts on product safety and eco-friendliness (eg for recycling). Quality is a safety and customer satisfaction issues. Advertising

poses issues of truth and non-manipulation. You may have hesitated over supplier labour practices, but this is a key area of ethical sourcing. It can cause significant damage to corporate reputations. Packaging raises issues of safety/perishability, eco-friendliness and truthful product labelling.

- 24.7 C **Rationale:** Accountability and social responsibility are classed as professional qualities, not personal qualities. Ambition is a personal quality – but is not considered essential in a professional ethics context: it can even pose ethical dilemmas ...
Pitfalls: You need to read the question stems carefully to pick up fine distinctions such as 'personal' and 'professional'.
- 24.8 D **Rationale:** Independence in appearance means avoiding situations that could cause a reasonable observer to question your objectivity. In the scenario, this is a risk – while independence of mind (free from actual partiality) isn't. The pure distractors were plausible because of the possibility of raising questions (scepticism) with your superiors (accountability) – but irrelevant.
- 24.9 D **Rationale:** Employability training helps employees to get other employment but it is not an ethical objective.
- 24.10 C **Rationale:** The saying is: 'the law is a floor'. By meeting non-legal regulations (including the rules of your workplace) you should meet a higher standard of behaviour than the legal requirements. Ethical behaviour is a higher moral standard, based on society's expectations and principles.
- 24.11 A **Rationale:** This is a definition of fairness.
- 24.12 B **Rationale:** Option A is a definition of openness, C is responsibility and D is accountability.
- 24.13 C **Rationale:** The statement is the definition of integrity made by the UK Nolan Committee on Standards in Public Life.
- 24.14 C **Rationale:** Organisational self-interest is a threat to independence and a source of conflict of interest. The other options are different varieties of ethical systems.
- 24.15 A **Rationale:** A firm or a member of an assurance team should not accept gifts or hospitality unless the value is clearly insignificant. In this case, it is likely that the cost of corporate hospitality at major sporting events will be significant.
- 24.16 B **Rationale:** This is a case of intimidation. You may have been tempted to pick self-interest but the threat of legal proceedings makes this intimidation.
- 24.17 C **Rationale:** The fact that the ACCA member does not deal with the client's affairs is a safeguard against a conflict of interest.
- 24.18 A **Rationale:** The issue for you is confidentiality, as the accounts are likely to contain sensitive information and should definitely not be left lying around. You may have wondered about unprofessional behaviour but this would apply to your supervisor rather than you.
- 24.19 C **Rationale:** Statement A refers to absolutism and Statement B refers to egoism.
- 24.20 B **Rationale:** Statements A and C are criticisms of relativism and Statement D refers to egoism.

25 Section F MTQs

- 25.1 (a) B, D It is argued that relativism leads to a philosophy of anything goes and the statement that all statements are relative is an absolute (therefore non-relative) statement.
- (b) (i) True Social responsibility costs money and goes against the idea of maximising shareholder wealth.
- (ii) False An environmental audit monitors things such as legal compliance with environment regulations or emissions levels.
- (iii) False As can be seen in many examples, a number of companies take socially responsible actions.
- (iv) True This is an example of a company being socially responsible.

- 25.2 (a) (i) False This is the deontological view. Teleology is based on consequences.
(ii) False Bribery involves payment for services that the organisation is not legally entitled to.
(iii) True Virtue ethics suggest managers should incorporate such virtues into their daily behaviour.
(iv) True This is a key reason why accountants should behave ethically.
- (b) A, E Absolutism takes no account of 'advances' in morality and if human interpretation leads to different views there cannot be universal agreement.
- 25.3 (a) A, C, D, F The professional qualities that an accountant should demonstrate are reliability, responsibility, courtesy, respect and timeliness.
- (b) A, C The fundamental principles are integrity, confidentiality, objectivity, professional behaviour and professional competence and due care
- 25.4 (a) (i) B YRT Co is threatening its independence by taking the client's position in the legal case.
(ii) A Since the audit partner has a long-term relationship with the audit client, there is a familiarity threat.
(iii) D A self-interest threat exists if there are close personal relationships between the client and the audit team.
(iv) C Where the external auditor helps to prepare the financial statements there is a clear self-review threat.
- (b) A Litigation gives rise to a threat of intimidation. The others give rise to self-interest threats.
- (c) B Ethics are a moral rather than legal or regulatory issue, although professional ethics are particularly important.
- 25.5 (a) C, E Because it is important for JKL Co to retain this client, due to significance of the revenue, there is a self-interest threat here. The client is also looking to intimidate the auditors over the fee negotiations.
- (b) (i) True ACCA students and members must always follow ACCA's code of conduct.
(ii) False Professional ethics should be followed even if this is at the expense of a contractual obligation.
(iii) True The public expects all professionals to act in an ethical manner.
(iv) False This process is known as lowballing and raises a significant self-interest threat, particularly if the firm want to offer more profitable non-audit services as well.
- 25.6 (a) (i) Customer purchases may be influenced by ethical considerations
(ii) Employees need to know what is expected of them
(iii) Local communities may need reassurance that the organisation will act as a 'good citizen'
- (b) B The most effective way to ensure standards are maintained is to instil the standards into the company culture. Staff training is the only way to ensure that standards are communicated, and that staff understand the implications of any violation.

26 Mixed Bank 1

- 26.1 C The correct answer is isolated from its external environment.
The difference between an open and a closed system is very basic, and depends on the relationship the system has with its environment. A system being closed to protect from unauthorised access merely refers to the system's security arrangements. Incapability of further technical enhancement refers to a stage in the system's life cycle.
- 26.2 B This is indirect discrimination because most part time employees are women. If it were direct discrimination then the advert would actually state that women had less favourable terms.
- 26.3 C The correct answer is: To record financial information.
This is its basic, original role and is still the best way to describe its part in the modern business organisation.
- 26.4 D The correct answer is: Improves the motivation of junior managers.
While the other options may arise in a decentralised organisation, they are not necessarily features that are specifically associated with decentralisation.
- 26.5 C The correct answer: There is little similarity between team members' work.
Where there is little similarity in work, subordinates will not be able to help each other, and will rely more heavily on their managers.
Where the work is routine, or the team very experienced, team members will require less support so a wider span may be appropriate. the wider the geographical dispersion, the narrower the span.
- 26.6 D The correct answer is: Independence of the non-executive directors.
This will be examined in the internal position audit of the company rather than the environmental analysis which looks at matters external to the company.
- 26.7 C The correct answer is: Managing the prompt payment of suppliers.
The purchasing manager will be concerned with all aspects of supplier management (eg discussing prices, discounts, delivery lead times, specifications, chasing late deliveries, sanctioning payments).
- 26.8 C The correct answers are: Committees and reports slow down the decision-making process. Innovation is difficult; over prescriptive rules produce a simplistic approach to problems.
The other statement describes the adhocracy, which is complex and disorderly and does not rely on standardisation to co-ordinate its activities. It also relies on the expertise of its members, but not through standardised skills.
- 26.9 C The correct answers are: It may introduce bugs that do not exist in the standard version. It may delay delivery of the software.
Customisation should not stop the company from being able to buy 'add-ons' to the basic package. In fact they are sometimes used to give the package more flexibility to suit particular needs. Dependence on the supplier for maintenance is also a disadvantage of ready-made packages.
- 26.10 C In the short run, firms will continue to supply customers provided that they cover variable costs. They will incur fixed costs whether they produce any output or not. Therefore provided revenues cover variable costs and therefore make a contribution towards fixed costs, it is beneficial for the firm to continue producing.

- 26.11 A The correct answer is: Dual authority.
Dual authority may lead to conflict between the managers involved.
The advantages of such a structure are:
- Greater flexibility
 - Improved communication
 - Motivating employees
- 26.12 A The correct answer is: The board of directors.
As with all company-specific matters it is the directors who are primarily responsible for the implementation of procedures, which follow best practice with regard to the current corporate governance advice.
- 26.13 B The correct answer is: Shareholders are accountable to auditors.
All the other statements are true. Both directors and auditors are agents of the shareholders and their primary duties relate to them.
- 26.14 B The correct answer is: To examine and express an opinion on the company's periodic financial statements.
This is a Companies Act requirement. The other responses are specific director responsibilities.
- 26.15 A An audit trail shows who has accessed a system and the operations performed.
- 26.16 B The correct answers are: Authoritative, Accurate, Relevant.
It should be **accurate** – in the sense of correct for the purpose. Inaccurate information is of little use for strategic, tactical or operational purposes. **Authoritative** means that the source of the information should be reliable. It must also be **relevant to** the user's needs. Information that is not needed for a decision should be omitted, no matter how 'interesting' it might be. If the information is **comprehensive**, it may be more wide ranging than it needs to be. It needs to be complete ie include everything that is needed.
- 26.17 A The correct answer is: External auditors need to assess the work of internal audit first.
Although some of the procedures that internal audit undertake are very similar to those undertaken by the external auditors, the whole basis and reasoning of their work is fundamentally different.
- 26.18 D The correct answer is: Hardware purchase costs; installation costs; software purchase costs.
Capital costs, which are capitalised and then depreciated, include installation, hardware purchase and software purchase costs. The remaining costs are revenue items which are expensed as incurred.
- 26.19 C The correct answer is: Shareholders.
It is very important that external auditors are independent of the company's management.
- 26.20 A The correct answer is: Banked, complete, prevented.
In any business controls over cash receipts are fundamental if the company is to keep a healthy cash position.
- 26.21 C The correct answer is: Dishonesty, motivation and opportunity.
If one or more of them can be eliminated, the risk of fraud is reduced.
- 26.22 B The correct answer is: A higher than normal risk audit.
The instances given are all examples of inherent risk or control risks and therefore they would be indicative of higher risk audit.
Certain of the factors combined, such as a poor internal control environment coupled with a dominant chief executive, might raise the auditors' suspicions of fraud, but not necessarily. However, they would all increase the overall risk of the audit.

- 26.23 D The correct answer is: information about personnel from the payroll system. Value of sales from the accounting records. Information on decisions taken from the minutes of a meeting.
- Data and information captured from internal sources come from transaction systems, such as the payroll system and the sales ledger, or is communicated formally or informally, as in a decision taken at a meeting.
- Although the type of information is circulated within the organisation, it is captured from outside. For example, the source of the market information is the market itself, which is clearly external to the organisation.

27 Mixed Bank 2

- 27.1 B The correct answers are: Controlling, Co-ordinating, Commanding.
- Fayol wrote that to manage is to forecast and plan, to organise, to command, to co-ordinate and to control. Commanding is the exercise of centralised authority and leadership. Co-ordinating involves harmonising the activities of all groups towards the common objective. Controlling is measuring performance and accounting for deviations from plans. Writers after Fayol substituted functions such as motivating and consulting for commanding.
- 27.2 A The correct answer is: Organisational design will be determined by a number of factors all of which dependent on the others.
- These factors include elements such as the company's objectives, the environment, the staff, the culture, the management style, the tasks carried out, the structure and the technology used.
- 27.3 C The correct answer is: Planning and control.
- The five categories are setting objectives, organising the work, motivation, the job of measurement and developing people. Planning and control are included within setting objectives and measurement. Drucker gave more emphasis to the 'human resource' aspects of management than writers on classical management theory such as Fayol.
- 27.4 C The correct answer is: Position power.
- Position power or legitimate power is conferred by the authority linked to a formal position within the organisation structure.
- 27.5 B The correct answer is: Benevolent authoritative, participative, exploitative authoritative, democratic.
- These are Likert's four management styles.
- 27.6 C The correct answer is: Storming.
- This is the storming stage, as identified by Tuckman. During this stage, conflict can be quite open. Objectives and procedures are challenged and risks are taken. However, there is a considerable amount of enthusiasm within the group and new ideas emerge. So too do political conflicts, as leadership of the group becomes an issue. This appears to be the situation described in the question.
- 27.7 D Job analysis involves finding out what are the task, skill and knowledge requirements of a job. This information is then output in the form of a job description (tasks, duties, objectives and standards of a job) and a person specification (reworking of the job description in terms of the kind of person needed to perform the job). A human resource plan (option (i)) is a much broader statement of the future skill requirements of the organisation as a whole, and how they will be met (by recruitment, training, retention and so on). A performance appraisal (option (iv)) analyses how a job holder **does** the job – not the nature of the job itself.

- 27.8 D The correct answer is: Shaper.
All of Belbin's roles are important to the effective functioning of a team.
You should familiarise yourself with all nine roles.
- Plant
 - Shaper
 - Resource investigator
 - Monitor evaluator
 - Company worker
 - Completer finisher
 - Team worker
 - Chairman
 - Specialist
- 27.9 C The correct answers are: Shaper, Plant, Finisher.
The shaper is a leader role, where the role holder spurs the team to action. The plant provides the creative thinking in the team, while the finisher's actions are directed to the completion of the task.
Attacking is a type of group behaviour identified by Rackham & Morgan.
- 27.10 D The correct answer is: All four.
A team is a number of people with complementary skills who are committed to a common purpose for which they hold themselves basically accountable. This is a control mechanism which improves work organisation by using knowledge from a broad range of perspectives to evaluate decision options.
- 27.11 A The correct answer is: Forming, storming, norming, performing.
Forming is the stage where the team comes together. Storming happens next; the group re-assesses its targets and (hopefully) trust between group members develops. Norming is a period of settling down, when the group established norms and procedures for doing their work. Performing then occurs; the team sets to work to execute its task and the difficulties of development no longer hinder it.
- 27.12 A The correct answer is: Herzberg.
Herzberg found that people's behaviour in the workplace was affected by more than their physical and social needs; the content of the work itself had an effect on motivation and performance.
- 27.13 C The correct answers are: Define the problem carefully; Try to develop options that would result in mutual gain. Look for a wide variety of possible solutions.
Bruce's course would have covered many approaches to resolving problems. The negotiation techniques you should have identified include trying to develop options that would result in mutual gain; defining the problems carefully and looking for a wide variety of possible solutions. Evaluating progress towards objectives and creating a trusting supportive atmosphere in the group will enhance the project team's performance but would not be considered negotiation techniques.
- 27.14 C The correct answers are: Usually unstructured so can discuss a wide range of topics; Requires little or no planning. Gives a real impression of feelings.
The feature is an advantage associated with other types of communication. Complex ideas that require deeper consideration are probably best communicated in written form, or perhaps in a presentation. Holding a meeting is the main communication technique for allowing multiple options to be expressed. However, an effective chairperson is needed if all sides are to be heard.
- 27.15 D Hygiene factors are extrinsic or environmental factors (salary and job security), while motivator factors are to do with the satisfactions of the work: challenging work is clear in this category – and recognition could be in either.

- 27.16 B The correct answers are: Colloquialisms, Jargon, Double meanings.
Colloquialisms should only be used in informal conversation and jargon should be avoided, although it may be used where it is an excellent form of shorthand and unique to the particular organisation, provided it remains comprehensible and is understood by all parties. Acronyms can be used freely as long as they are explained.
- 27.17 D The correct answers are: Lack of privacy – can be forwarded on without your knowledge. People may not check their email regularly. Requires some computer literacy to use effectively.
Complex images can be included as an attachment to an email and there is no limitation on their transmission.
- 27.18 A The correct answer is: The sequence is 5, 2, 6, 1, 4, 3.
The sequence of items on an agenda is apologies for absence, approving the minutes of the previous meeting, matters arising out of the minutes, the main items of business on the agenda (subjects for discussion), any other business (items not on the agenda) and finally deciding the date of the next meeting.
- 27.19 A The correct answers are: Peers; Self-appraisal; Customers.
Peers or co-workers could be members of a team or people receiving or providing services.
Customers can be a useful source, especially for sales staff. Knowing what customers think of you helps to improve your technique.
When individuals carry out their own self-evaluation, it is a major input to the appraisal process because they can identify the areas of competence that are relevant to the job and their own relative strengths.
- 27.20 C The correct answer is: Upward.
There is a current trend towards this more progressive appraisal system where subordinates appraise their superiors.
Potential problems with this method may include:
- Fear of reprisal
 - Vindictiveness
 - Unwillingness of superior to respond to feedback
- 27.21 B The correct answer is: Deal with grievances.
Grievances should be dealt with by a formal mechanism separate from the appraisal process. If a grievance arises during appraisal it should be dealt with using the normal grievance procedure.
- 27.22 A The correct answer is: Accounts payable clerk.
It is unlikely that the accounts payable clerk will be asked. The others will all come in contact with the sales manager and therefore potentially could be asked to assist with completing the appraisal forms required by 360 degree feedback process.
- 27.23 B The correct answer is: Enabling accounting.
Enabling accounting is a made up term here, and sounds like a rather dubious practice for a business. Accounting should be a well-controlled and regulated process.
The other options are all characteristics of a learning organisation.
- 27.24 C The correct answers are: Fear of reprisals; Employee point scoring; Lack of authority.
The advantages of upward appraisal are that the subordinates feel more involved, managers receive objective feedback and can therefore improve their performance.

28 Mixed Bank 3

- 28.1 B PEST
- 28.2 B Designing systems and standardising work.
- 28.3 A The number of employees reporting to one manager.
- 28.4 A The directors of the company.
- 28.5 D Arithmetic, physical.
- 28.6 B Sales invoicing and payroll.
- 28.7 C Hersey and Blanchard.
- 28.8 B All team members have different skills and specialisms which they pool.
- 28.9 D Maslow and Herzberg.
- 28.10 D Mentoring and secondment.
- 28.11 C Diagonal, the manager is in a different function and also below the director.
- 28.12 B Prefers to think things through first.
- 28.13 C **Rationale:** Collective goals or aims are a feature of organisations.
- 28.14 C The others are distractors! Make sure you do know these technical terms as the examiner could set a similar question to trip you up.
- 28.15 D All of these are examples of weaknesses in financial controls.
- 28.16 B **Rationale:** The **Management Accountant** provides information for management: cost accounting, budgets and budgetary control and financial management of projects.
- 28.17 C **Rationale:** The **purchasing or procurement function** is responsible for authorising purchases (and suppliers) and approving.
- 28.18 C
- 28.19 C
- 28.20 B **Rationale:** A suite is a set of several modules. A spreadsheet is a type of program, and a format for displaying and processing data: it is often used to integrate data from accounting modules for decision-support and management information systems.
- 28.21 B This is also known as 'position' power.
- 28.22 D **Rationale:** The definition of a group is, basically, 'any collection of people who perceive themselves to be a group' (Handy). **Identity** means that there are acknowledged boundaries to a group, which define who is 'in' and who is 'out', 'us' and 'them'.
- 28.23 B Specialist.
- 28.24 C Safety needs is one of the needs in Maslow's hierarchy.

29 Mixed Bank 4

- 29.1 C Output control. Ouchi assumed that output control was part of market control, where it is possible to price output of a system effectively and where there is external competition as a reference.
- 29.2 D Five pop fans. They are a random collection of people. They have no common purpose, or common leader and they do not see themselves as having a common identity.
- 29.3 B Passive acceptance of work decisions. Members of an effectively functioning group will take an active interest in decisions affecting their work, rather than passively accepting them.

- 29.4 A Position power. A leader is someone who does not have to rely on position power alone.
- 29.5 A These suggest a lack of trust by the manager toward staff. The other reasons are likely to lead to reduced delegation in themselves.
- 29.6 C Evaluating progress towards objectives will enhance team performance but would not be considered a negotiation technique.
- 29.7 D Allocating scarce resources. This could be concerned with people as a resource but is not people-centered.
- 29.8 C To take reasonable care of themselves. Although there is an employer duty of care towards employees, this does not cover employee negligence or stupidity.
- 29.9 A These are groups outside the organisation's boundary, in its environment. The others are within the boundary and belong to the organisation system.
- 29.10 A Suspension without pay or demotion. Dismissal is a course of action an employer can take although not provided for specifically in the employee's contract of employment.
- 29.11 D Task. The matrix structure requires a culture that reacts quickly to change and focuses on particular projects or tasks as dictated by the needs of the business. A task culture will suit this best as it focuses an achievement of the task above all else, and is very flexible and reactive to changes in the environment.
- 29.12 B This quote is variously attributed to Schein and Handy. An organisation's culture is exclusive, shared and gives its participants a sense of community.
- 29.13 C The others are internal stakeholders.
- 29.14 A B is 'operating core', C is 'middle line'.
- 29.15 D
- 29.16 D Teeming and lading is the theft of cheque receipts. Setting subsequent receipts against the outstanding debt conceals the theft.
- 29.17 B All three are essential: dishonesty, opportunity and motivation.
- 29.18 A
- 29.19 B
- 29.20 C The worst of both worlds.
- 29.21 C The shaper thrives on pressure.
- 29.22 A
- 29.23 C Consistency was found to be more important to subordinates than any particular style.
- 29.24 C Salary and hours of work will be in the employment contract.

30 Mixed Bank 5

- 30.1 D In fact it may be more difficult to see where a mistake has been made.
- 30.2 A The other areas are dealt with by a combination of best practice, codes and some legislation.
- 30.3 C Because chips are a complementary product to fish, a rise in the price of fish will lead to a fall in the demand for chips.
- 30.4 C 1 and 3 are the responsibility of the internal auditor, and ultimately of management.
- 30.5 B
- 30.6 A
- 30.7 A

- 30.8 B Coercion means compelling someone to do something.
- 30.9 B 2 and 3 will generally be carried out by higher levels of management.
- 30.10 D Work sampling (via portfolios of work or trial periods, say) have the highest reliability (followed closely by cognitive selection tests). Personality testing and assessment centres (group selection exercises) are slightly less reliable. Interviews, ironically, have a very low predictive power – at about the same level as reference checking.
- 30.11 B Equal opportunity is a narrower concept, based on securing non-discrimination on the basis of those 'crude' dimensions of individual difference (sex, age, disability and so on). Diversification is from an organisational strategy involving widening its range of products/markets.
- 30.12 D This may also be worded as: have an experience, review the experience, conclude from the experience and plan the next steps.
- 30.13 C The scalar chain is the downward flow of delegated authority in an organisation and the need for reports to flow back 'up': it is often a source of slow communication and rigidity (eg in bureaucracies). Horizontal structure allows the flow of information and decisions across functional (vertical) boundaries: it is a key approach to flexibility. The 'Shamrock' is a form of numerical flexibility, where a firm has a core staff and a various peripheral 'leaves' which it can draw on as the demand for labour fluctuates.
- 30.14 C Minute-taking is one of the roles of the secretary, who essentially provides administrative support to the committee. A is the role of the chair, while B and D may be imposed on the committee by the authorities to which it reports.
- 30.15 A Apollo is associated with role culture; Athena with task culture; Dionysus with person culture.
- 30.16 D The founder influences culture through founding values; history/experience through creating expectations and stories; recruitment and selection by choosing people who will 'fit' (or change) the culture; industry by having its own culture; and labour turnover by allowing people who don't 'fit in' to 'get out'.
- 30.17 D Boundaries are the rules that restrict management's freedom of action: they include legislation, regulation and contractual agreements. Responsibilities are obligations which a company voluntarily undertakes. The primary economic objective relates to optimal resource-conversion (eg profitability). Non-economic, social objectives modify management behaviour in line with stakeholder expectations.
- 30.18 B A framework approach sets out principles and guidelines, rather than detailed rules to cover every specific situation. This leads to listed advantages – but not to consistent application, since there is a high degree of discretion in applying guidelines to different cases.
- 30.19 B Failure to challenge or criticise is **not** a positive thing, in this context, but a symptom of poor communications: the 'building block' would be developing a climate in which people can speak their minds, constructively. The other options describe positive building blocks in the areas of membership, review and control and objectives. (The terminology of 'building blocks' and 'blockages' is drawn from a model by Woodcock, but it is not essential to know this.)
- 30.20 B This is a major problem for non-executive directors, because they are likely to have other commitments. You should have had to think through the other options, however. Some of the **advantages** of non-executive directors are that they offer a comfort factor for third parties such as investors and suppliers; they have a wider perspective and (hopefully) no vested interest; and they have a combination of knowledge/expertise and detachment.
- 30.21 B Using local suppliers is part of the government's sustainability strategy, as it develops and preserves local business, employment and communities. Minimising energy consumption conserves resources. The other two options are not directly related to sustainability goals.
- 30.22 C Macro-economics looks at a complete national economy or economic system: factors such as economic activity and growth, inflation, unemployment and the balance of payments. The other options are pure distractors, drawn from other disciplines.

30.23 D These are three of the ways that government can directly affect the economic structure, according to Porter. Demand is affected as the government is a major customer. Governments can affect capacity expansion, for example, by using taxation policies to encourage investment in equipment. Government can introduce regulations and controls within an industry which may affect growth and profits and may therefore affect competition.

30.24 A **Examiner's comments.** The examiner commented that only 36% of students got this question correct. The examiner stated that it is important for students to be realistic about what the external auditing function can achieve. (In other words, common sense should help to answer this type of question.)

31 Mixed Bank 6

- 31.1 C The shareholders are the owners, as they provide the capital for the business.
- 31.2 A This is the definition of the 'technostructure' in Mintzberg's components of structure. D defines the 'strategic apex' component of the model.
- 31.3 C Secure continuity of supply **and** quality are Z's priorities. Long-term partnership helps secure both (i), while having a small number of suppliers avoids the risk of supplier failure (ii).
- 31.4 B This is the definition of tactical management, carried out by middle management. Strategic management is at a higher level of establishing corporate direction and policy: carried out by senior management. Operational management is at a lower level of implementing the tactical plans: carried out by supervisors and operatives.
- 31.5 A Strategic management is a process which may or may not be carried out in a given organisation. Executive directorship and internal controls are elements of corporate governance.
- 31.6 C This is the definition of a progressive tax (such as income tax in general). Option A is a 'regressive' tax (such as road tax) which is the same for all people. Option B is a 'proportional tax' (such as Schedule E income tax within a limited range of income).
- 31.7 D The first three are circumstances defined as redundancy. Dismissal on the grounds of pregnancy is automatically considered to be unfair dismissal.
- 31.8 D This should be straightforward if you work through the options.
- 31.9 C Researchers may connect to this network via the internet (world wide web), and the university may have an intranet for its own lecturers and students. An extranet, however, is an intranet that is accessible to authorised 'outsiders', using a valid username and password.
- 31.10 C Job advertisements must be positive, but they should also be honest, in order to manage applicants' (and future employees') expectations. Options B and D should be obvious. You may have hesitated over option A, but advertisements should encourage unsuitable applicants to rule themselves out before applying (and wasting the organisation's time).
- 31.11 B Motivation is the incentive to behave dishonestly: one part of this equation is the risks, and whether they are worth the rewards – so strong disciplinary penalties for fraud are a disincentive. Opportunity is having an opening for fraud: internal checks and controls (such as segregation of duties and authorisations) limit those openings. Dishonesty is a predisposition or tendency to behave unethically: it needs to be spotted early – ideally before a person joins the organisation!
- 31.12 D The database concept encourages management to regard data as an organisational resource, which needs to be properly managed. However, there are problems of data security and privacy, due to the potential for unauthorised access and sharing. If the organisation develops its own system from scratch, initial development costs will be high.
- 31.13 B The studies were carried out at the Hawthorne Plant of Western Electric. The Ashridge studies are a study in leadership styles (tells, sells, consults, joins). Hofstede's model describes dimensions of difference in national cultures.

- 31.14 A Political, Economic, Socio-cultural and Technological (PEST) factors are the external factors which may impact on the organisation. SWOT (strengths, weaknesses, opportunities and threats) incorporate data from the environmental scan, by analysing PEST factors that present opportunities and threats: however, the name given to this process is corporate appraisal. Option C would be called competitive intelligence.
- 31.15 C IASs are standards for financial reporting: the preparation of financial statements and accounts. They are used as bases and benchmarks for companies and national standard-setting systems.
- 31.16 B Local nature appreciation groups would have high interest (due to potential environmental impacts) but relatively low power: because of their high interest, though, they might be able to band together or lobby to increase their power. So a 'keep informed' strategy is appropriate to segment B.
- 31.17 C Fraud response relates specifically to investigation and damage minimisation (not prevention), including: actions that will be taken to protect the security of records that will be required for identification; protection of vulnerable assets; investigation procedures; and crisis management. Implementing this plan would be the responsibility of a fraud officer.
- 31.18 B A growing economy is more easily able to provide welfare services without creating a heavy tax burden on the community. Growth has potential adverse effects for employment, where some sections of the population are unable to adapt to demands for new skills. It also has potential adverse effects for the environment, in terms of resource usage, pollution, emissions etc.
- 31.19 B Options (i) and (iv) are managerial attributes.
- 31.20 D Deterrence is an approach which seeks to minimise threats due to deliberate action, by creating penalties to 'put people off' attempting the action. Correction is an approach to ensure that vulnerabilities are dealt with when found. Detection is an approach to identifying vulnerabilities and attacks (eg keeping a log of patient records accessed or removed). Threat avoidance means eliminating a threat (eg by changing the system so no unauthorised access is possible).
- 31.21 C This should be straightforward if you think systematically through the process.
- 31.22 C In the PEST model, social factors include demographics: the study of population structures and characteristics. Birth and mortality rates affect population numbers, distribution (if they are unequal in different areas) and age structure (lower birth and mortality rates creates an ageing population).
- 31.23 B Interdependence of team members is important, because no-one feels they could earn higher rewards on their own: everyone's contribution is necessary, and everyone 'pulls their weight'.

32 Mixed Bank 7

- 32.1 C Non-statutory deductions (such as pension contributions) should be authorised, to prevent money being 'siphoned' off via non-existent deductions. However, statutory deductions are non-discretionary: they cannot **not** be authorised!
- 32.2 C The production mixer has expert power, because he has knowledge that is recognised and valued by the rest of the staff. The shop-floor staff exercise negative power: the power to disrupt operations. Neither have position power (organisational authority), nor (as far as we know) personal power, or charisma.
- 32.3 D In Belbin's model, the Plant is the ideas person; the Monitor-Evaluator the discerning critic; and the Team worker the diplomatic relationship-builder.
- 32.4 C There are several risks associated with outsourcing: being locked in to an unsatisfactory relationship; losing in-house assets and knowledge; sharing confidential information; and 'reputational' risk (if the supplier gives poor service, or is found to be unethical in its practices, say). The other statements are untrue: an organisation should **not** outsource its 'core competences' (areas of unique and non-replicable competitive advantage); outsourcing often creates economies of scale (taking advantage of the larger dedicated resources of the contractor); and outsourcing still incurs significant costs, including internal costs of managing the relationship.

- 32.5 B Process theories explore the process by which individuals come to value, select and explore goals: in other words, **how** people become motivated. Content theories (including Maslow's hierarchy of needs and Herzberg's two-factor theory) explore the needs that motivate people to act in certain ways: in other words, **what** motivates people.
- 32.6 B Reporting by exception means only reporting to managers when there is a deviation from plan. Options A and C would increase information flow. Option D would not address the problem: information overload is about excessive complexity as well as volume!
- 32.7 A This is straightforward, if you recall the managerial grid. It does not represent a continuum (option C) because it assumes that the two things are compatible: they can both be high or low at the same time. The grid can be used in appraisal, to focus attention on the manager's approach, but does not indicate 'success' or effectiveness (option B).
- 32.8 D Closed questions pin the candidate down to either/or options. Probing questions push for an answer where a candidate is being vague. Open questions wouldn't work here, because they give the candidate space to answer in any way (s)he wishes. You may have hesitated over leading questions, but these would encourage the candidate to give a **particular** reply, suggested by the interviewer – not to pin down what the **candidate** meant.
- 32.9 C An instrumental orientation accounts for why some people take jobs offering high monetary rewards rather than intrinsic interest or job satisfaction (up to a certain point). Option B is a form of job design which more or less assumes the **opposite**: that people seek intrinsic satisfactions in work itself. Option A is irrelevant, relating to McGregor's Theory X and Theory Y.
- 32.10 A 'Tell and listen' is one of Maier's three approaches to appraisal interviewing: 'tell and sell' and 'problem-solving' are the other two approaches.
- 32.11 A A gap between current 'competence' and required 'competence' may be amenable to learning or training. A gap between current 'performance' and required 'performance', however, may be caused by other problems to do with supervision, systems, resources, motivation and other factors. The other options are true.
- 32.12 B Esteem needs are for recognition and respect from others. Statement (i) would be self-actualisation and statement (iv) would be a social need.
- 32.13 C This is the definition of dorming. Forming is a 'getting to know each other' stage; norming the development of agreed ways of behaving; and storming a stage of conflict and testing.
- 32.14 D This should be straightforward, if you work through the options carefully. A person specification is prepared **from** a job description. Testing follows interviewing, as a more rigorous form of selection. Reference checking comes last, as it only applies to candidates who are potentially going to be offered a job.
- 32.15 B A coach is often the trainee's immediate superior: indeed, coaching is accepted as a style of management/leadership. A mentor is **not** usually the immediate superior of the protégé, so that there can be open, confidential discussion of work and non-work issues.
- 32.16 B Cognitive psychology argues that the human mind uses feedback information on the results of past behaviour to make rational decisions about whether to maintain successful behaviours or modify unsuccessful behaviours, according to the outcomes we want. Behaviourist psychology focuses on the relationship between stimuli and responses: we are 'conditioned' to respond in ways that are repeatedly positively reinforced (rewarded) and to avoid behaviours that are repeatedly negatively reinforced (punished). Option C is not a learning theory, and option D is a particular learning model (by Honey & Mumford) not relevant here.
- 32.17 B The third element in the auditor's independence is the responsibility structure – which does **not** mean freedom from accountability (statement (iv)). The internal auditor is accountable to the highest executive level in the organisation (preferably the audit committee of the board of directors). Statement (ii) is the opposite of independence: internal auditors should not install new procedures or systems, or engage in activities, which they will later have to appraise – as this might (or might be seen to) compromise their independence.

- 32.18 B Cultural change is a good reason to seek 'new blood' in management, rather than promote people who are used to thinking in familiar ways. Options A and C argue for internal promotion as a matter of policy and staff retention (option A) and as a way of preserving culture (option C).
- 32.19 A Off-the-job training allows people to make mistakes in learning, without the costs and consequences of making the same mistakes on the job. However, formal courses may **not** always be directly relevant to the circumstances of the job and workplace (option B), and it may not be easy to 'transfer learning' from the classroom to the job, for various reasons (option C). Meanwhile, formal courses take people away from work (option D). You could think of options B, C and D as advantages of on-the-job training.
- 32.20 C Remember that direct discrimination is less favourable treatment of a protected group. Indirect discrimination is when requirements cannot be justified on non-discriminatory grounds.
- 32.21 B This is likely to be a sensitive issue. How do you identify job applicants' ethnic origins without potentially causing offence or suspicion? How do you apply particular performance monitoring to ethnic minority staff without seeming to discriminate? All the other options are much more straightforward!
- 32.22 D The first three options are internal checks to an internal control system. External auditors will need to check that directors and management act on any internal audit recommendations.
- 32.23 B The lowest level is how trainees feel about the training: this is an inexact measure of results. Level 2 is trainee learning, measuring what the trainees have learned (what they know or can do at the end of the course, compared to pre-training tests): the likely focus of trainers. Level 3 is changes in job behaviour, which measures whether learning has been **applied** successfully to the job: the likely focus of departmental managers. Level 4 is whether these changes result in measurable performance gains for the organisation: the likely focus of senior management's cost-benefit analysis of training. Level 5 (which many organisations never reach) is evaluating impacts on 'wider' goals such as greater social responsibility.
- 32.24 C Physical access controls are basically 'lock and key' systems – basic though that may sound! Card entry and PIN systems are ways of identifying yourself (by swipe card and keypad entry respectively) in order to gain authorised entry to an area or storage device. Logical access systems are non-physical access controls, involving password-protected access to data in the system. Back-ups are not access controls at all: they are integrity and/or contingency controls.
- 32.25 B Connected stakeholders include shareholders, customers, suppliers and financiers. Don't confuse this with internal stakeholders which include employees and management.

Mock Exams

Paper FAB

Accountant in Business

Mock Examination 1

Specimen Exam June 2014

| | |
|--|-----------------------|
| <i>Question Paper</i> | |
| Time allowed | <i>2 hours</i> |
| <i>This paper is divided into two sections:</i> | |
| <i>Section A – ALL 46 questions are compulsory and MUST be attempted</i> | |
| <i>Section B – ALL SIX questions are compulsory and MUST be attempted</i> | |

DO NOT OPEN THIS PAPER UNTIL YOU ARE READY TO START UNDER EXAMINATION CONDITIONS

Section A

ALL 46 questions are compulsory and MUST be attempted

- 1 The major purpose of the International Accounting Standards Board (IASB) is to ensure consistency in _____.

Which two words complete the sentence above?

- A Financial control
- B Corporate reporting
- C External auditing

(1 mark)

- 2 The leadership style that least acknowledges the contribution that subordinates have to make is _____.

Which word correctly completes the sentence above?

- A Authoritarian
- B Autocratic
- C Assertive

(1 mark)

- 3 In relation to the management of conflict, which of the following approaches will maximise the prospect of consensus?

- A Acceptance
- B Negotiation
- C Avoidance
- D Assertiveness

(2 marks)

- 4 Darragh has been appointed to the management team of a professional football club. His role includes coaching, mentoring and counselling young players who have just signed contracts with the club for the first time.

The following are his main activities:

- 1 Helping the young players to settle in during their first week
- 2 Identifying each player's key skills and encouraging them to develop new skills
- 3 Advising the players on addressing personal issues, such as managing their finances
- 4 Helping the players to anticipate opponents' reactions

Which of the following matches the correct role to carry out in each of the four activities?

- A 1. Mentor 2. Counsellor 3. Coach 4. Counsellor
- B 1. Mentor 2. Coach 3. Counsellor 4. Coach
- C 1. Mentor 2. Coach 3. Counsellor 4. Mentor
- D 1. Counsellor 2. Mentor 3. Coach 4. Counsellor

(2 marks)

- 5 In order to ensure that the policies of an organisation are consistent with the public interest, on which of the following should the directors of a company focus?

- A The long-term welfare of the shareholders
- B Compliance with legal requirements and codes of governance
- C The collective well-being of stakeholders

(1 mark)

- 6 Martin is an experienced and fully trained shipbuilder, based in a western European city. Due to significant economic change in supply and demand conditions for shipbuilding in Martin's own country, the shipyard he worked for has closed and he was made redundant. There was no other local demand for his skills within his own region and he would have to move to another country to obtain a similar employment, and could only find similar work locally through undertaking at least a year's retraining in a related engineering field.

Which of the following describes the type of unemployment that Martin has been affected by?

- A Structural unemployment
- B Cyclical unemployment
- C Frictional unemployment
- D Marginal unemployment

(2 marks)

- 7 Which of the following is the MAIN function of marketing?

- A To maximise sales volume
- B To identify and anticipate customer needs
- C To persuade potential consumers to convert latent demand into expenditure
- D To identify suitable outlets for goods and services supplied

(2 marks)

- 8 The following are sanctions used against companies for potentially unlawful actions:

- 1 Investigation of its financial affairs by a government department or agency
- 2 Imposition of a fine by the government's company registration body
- 3 Refusal of the external auditor to sign the financial accounts
- 4 Suspension of dealings in securities by the stock exchange

Which of the above are the consequences of a listed company failing to file its accounts?

- A 1 and 2
- B 1 and 3
- C 2 and 4
- D 3 and 4

(2 marks)

- 9 The overall average age of a population in a country is directly dependent on two demographic factors: Birth rate and death rate.

Assuming equal rates of change, which of the following must lead to an overall ageing of the population?

- | | Birth rate | Death rate |
|---|------------|------------|
| A | Rising | Rising |
| B | Falling | Rising |
| C | Rising | Falling |
| D | Falling | Falling |

(2 marks)

- 10 Gils is conducting an appraisal interview with his assistant Jill. He initially feeds back to Jill areas of strengths and weaknesses of performance but then invites Jill to talk about the job, her aspirations, expectations and problems. He adopts a non-judgemental approach and offers suggestions and guidance.

This is an example of which approach to performance appraisal?

- A Tell and sell approach
- B Tell and listen approach
- C Problem solving approach
- D 360 degree approach

(2 marks)

- 11 What is the primary responsibility of the external auditor?
- A To verify all the financial transactions and supporting documentation of the client
 - B To ensure that the client's financial statements are reasonably accurate and free from bias
 - C To report all financial irregularities to the shareholders of the client
 - D To ensure that all the client's financial statements are prepared and submitted to the relevant authorities on time
- (2 marks)**
-

- 12 The following are examples of business information:
- (1) Annual forecasts of revenues and costs for a department
 - (2) Product development plans for the next 2 – 3 years
 - (3) Targets agreed by key managers at their performance appraisal interviews

Which of the above would be classified as tactical information?

- A 1, 2 and 3
 - B 1 and 3 only
 - C 2 and 3 only
- (1 mark)**
-

- 13 Wasim is the Customer Services Manager in a large leisure park. The forthcoming weekend is going to be the busiest of the year, as it is a public holiday. Wasim has to cope with several absentees, leaving him short-staffed in public areas of the park. His manager has told him that he expects him to catch up with some administrative reports that were due last week. Wasim also has to arrange for six new staff to be trained, who will be arriving imminently.

In order to manage his workload most effectively, what should Wasim do?

- A Prioritise the tasks in relation to the most important business outcomes
 - B Deal with the reports that the manager insists be prepared
 - C Train the new recruits
 - D Carry out some of the work that the absentees would normally do
- (2 marks)**
-

- 14 In order to discharge their duties ethically, finance directors must ensure that the information published by their organisations provides a complete and precise view of the position of the business, without concealing negative aspects that may distort the reader's perception of its position.

This duty describes which of the following ethical principles?

- A Probity
 - B Honesty
 - C Independence
 - D Objectivity
- (2 marks)**
-

- 15 Which of the following is a purpose of the International Federation of Accountants?

- A Agreement of legally binding financial reporting standards across all member accountancy organisations
 - B Prevention of international financial crimes, such as money laundering and insider dealing
 - C Promotion of ethical standards in all member organisations
 - D Development of universally applicable detailed rules to deter inappropriate behaviours
- (2 marks)**
-

- 16 The following government policies can be used to expand or slow down the level of economic activity.

- 1 Taxation
- 2 Public expenditure

Which of the following combinations of policy would maximise expansion of the economy?

- A Increase 1 and increase 2
 - B Increase 1 and reduce 2
 - C Reduce 1 and increase 2
 - D Reduce 1 and reduce 2
- (2 marks)**
-

- 17 Neill works as the procurement manager of JL Company, a large services company.
Information provided by Neill is most relevant to which of the following elements of the marketing mix?

A Physical evidence
B Distribution (or place)
C Price
D Processes

(2 marks)

- 18 In relation to employee selection, which type of testing is most appropriate for assessing the depth of knowledge of a candidate and the candidate's ability to apply that knowledge?

A Intelligence testing
B Competence testing
C Psychometric testing

(1 mark)

- 19 Malachi has been asked by his manager to obtain information about ABC Company, which is bidding for a contract offered by Malachi's company in the near future. The two statements which he will be using as his sources are the statement of financial position (SOFP) and the statement of profit or loss (SOPL). The information he is required to obtain is as follows:

1 The equity of the company
2 Operating costs as a percentage of turnover
3 Long-term borrowings
4 Liquidity

Which of the following correctly matches the above items of information with the financial statements in which they would be found?

| | | | | |
|---|------|------|------|------|
| | 1. | 2. | 3. | 4. |
| A | SOFP | SOPL | SOPL | SOFP |
| B | SOPL | SOFP | SOFP | SOPL |
| C | SOPL | SOFP | SOPL | SOFP |
| D | SOFP | SOPL | SOFP | SOPL |

(2 marks)

- 20 Linh owns a busy restaurant. She has had complaints from regular customers about diners failing to control their noisy and unruly children, which is spoiling their dining experiences.

Which of the following courses of action would be regarded as a pluralist solution to this problem?

A Setting aside a separate section of the restaurant for families with children
B Not accepting bookings from families with children
C Advising customers that the restaurant is a family restaurant before they book
D Taking no action, assuming that those who complain will always be a minority **(2 marks)**

- 21 Which of the following is data protection legislation primarily designed to protect?

A All private individuals and corporate entities on whom only regulated data is held
B All private individuals on whom only regulated data is held
C All private individuals on whom any data is held

(1 mark)

- 22 The system used by a company to summarise sales and purchases is an example of which of the following?

A A transaction processing system
B A management information system
C An office automation system
D A decision support system

(2 marks)

23 The following are stakeholders of a business organisation:

- 1 Manager
- 2 Customer
- 3 Executive Director
- 4 Supplier

Which of the above are CONNECTED stakeholders?

- A 1, 2 and 3
- B 2 and 4
- C 2 and 3 only
- D 3 and 4

(2 marks)

24 In an economic environment of high price inflation, those who owe money will gain and those who are owed money will lose.

Is this statement true or false?

- A True
- B False

(1 mark)

25 Role playing exercises using video recording and playback would be most effective for which type of training?

- A Development of selling skills
- B Regulation and compliance
- C Dissemination of technical knowledge
- D Introduction of new processes or procedures

(2 marks)

26 Renata has attended a leadership development course in which she experienced a self-analysis exercise using the Blake and Mouton managerial grid. The course leader informed her that the results suggested that Renata demonstrated a 9·1 leadership style.

What other conclusions may be drawn in relation to Renata's leadership style?

- 1 She maximises the involvement of her team
- 2 She demonstrates little concern for people in the team
- 3 She balances the needs of the team with the need to complete the task
- 4 She is highly focused on achieving the objectives of the team

- A 1 and 2
- B 2 and 4
- C 1 and 4
- D 2 and 3

(2 marks)

27 The implementation of a budgetary control system in a large organisation would be the responsibility of the internal auditor.

Is this statement true or false?

- A True
- B False

(1 mark)

28 The following are duties of either internal or external auditors:

- (1) Confirming that the financial accounts present a true and fair view
- (2) Confirming that there are appropriate policies for preventing and detecting fraud
- (3) Confirming that the financial accounts have been prepared in accordance with legal requirements

Which of the above are the roles of an external auditor?

- A 2 and 3
- B 1 and 2
- C 1 and 3

(1 mark)

29 Professional accountants must demonstrate integrity at all times.

Which of the following best describes the meaning of integrity?

- A Applying consistently high moral values
- B Maintaining a neutral and unbiased view on all business decisions
- C Provide timely and accurate information free from errors

(1 mark)

30 The following are either characteristics of a co-operative or of a public limited company:

- 1 Maximising the excess of income over expenditure not a primary objective
- 2 Members can vote according to the number of shares owned
- 3 Shares can be bought and sold through personal transactions of the members
- 4 All members are invited to attend the annual general meeting and participate in decisions at the meeting

Which of the above are the characteristics of public limited companies?

- A 2, 3 and 4
- B 2 and 3 only
- C 2 and 4 only
- D 3 and 4 only

(2 marks)

31 A company has advertised for staff who must be at least 1.88 metres tall and have been in continuous full-time employment for at least five years.

Which of the following is the legal term for this practice?

- A Direct discrimination
- B Indirect discrimination
- C Victimisation
- D Implied discrimination

(2 marks)

32 Which one of the following statements is correct in relation to monetary rewards in accordance with Herzberg's two-factor theory?

- A Pay increases are a powerful long-term motivator
- B Inadequate monetary rewards are a powerful dissatisfier
- C Monetary rewards are more important than non-monetary rewards
- D Pay can never be used as a motivator

(2 marks)

33 In a higher education teaching organisation an academic faculty is organised into courses and departments, where teaching staff report both to course programme managers and to subject specialists, depending on which course they teach and upon their particular subject specialism.

According to Charles Handy's four cultural stereotypes, which of the following describes the above type of organisational structure?

- A Role
- B Task
- C Power
- D Person

(2 marks)

34 Which pattern of communication is the quickest way to send a message to all intended recipients?

- A The circle
- B The chain
- C The Y
- D The wheel

(2 marks)

35 Kelly wants to explain a business problem to Pawel on the problem on the telephone.

Who will be involved in 'encoding' the communication that takes place?

- A Kelly
- B Pawel
- C Kelly and Pawel

(1 mark)

36 Which of the following types of new legislation would provide greater employment opportunities in large companies?

- A New laws on health and safety
- B New laws to prevent discrimination in the workplace
- C New laws making it more difficult to dismiss employees unfairly
- D New laws on higher compensation for employer breaches of employment contracts

(2 marks)

37 What is the responsibility of a Public Oversight Board?

- A The establishment of detailed rules on internal audit procedures
- B The commissioning of financial reporting standards
- C The creation of legislation relating to accounting standards
- D The monitoring and enforcement of legal and compliance standards

(2 marks)

38 Adrian is the manager of a call centre. Consultants have advised him that by reorganising his teams to complete highly specific tasks the call centre will be able to increase the throughput of work significantly, as well as increasing the number of sales calls made to the public. The reorganisation proposals are unpopular with many workers, who feel that their jobs will become tedious and repetitive.

The proposal to reorganise the work of the call centre utilises principles put forward by which school of management thought?

- A The administrative school
- B The empirical school
- C The scientific school

(1 mark)

39 The aggregate level of demand in the economy is made up of government expenditure, _____, _____ and net gains from international trade.

Which of the following correctly completes the sentence above?

- 1 Savings
- 2 Taxation
- 3 Investment
- 4 Consumption

- A 1 and 3
- B 2 and 3
- C 3 and 4
- D 1 and 4

(2 marks)

40 In the context of marketing, the 'four Ps' are price, promotion, _____ and _____.

Which TWO words correctly complete the above sentence?

- 1 Product
- 2 Positioning
- 3 Place

- A 1 and 3
- B 1 and 2
- C 2 and 3

(1 mark)

- 41 Which one of the following is a potential advantage of decentralisation?
- A Risk reduction in relation to operational decision-making
 - B More accountability at lower levels
 - C Consistency of decision-making across the organisation
- (1 mark)**
-
- 42 FKT Company is considering the introduction of a code of ethics following media criticism of its selling practices.
- Which of the following is most important when deciding on the content of the proposed code of ethics?
- A The minimum acceptable standards of behaviour and conduct of employees (KEY)
 - B The legal requirements affecting the sales of core products and services
 - C The main issues of concern to customers who have made complaints
 - D The generally accepted standards by other companies operating in the same sector
- (2 marks)**
-
- 43 Ahmed is preparing his personal development plan. He is particularly concerned about how others see him.
- In order to analyse this aspect of his personal development plan further, Ahmed should consider which of the following?
- A Problems and strengths
 - B Strengths and opportunities
 - C Strengths and weaknesses
- (1 mark)**
-
- 44 Jackie leads an established team of six workers. In the last month, two have left to pursue alternative jobs and one has commenced maternity leave. Three new staff members have joined Jackie's team.
- Which one of Tuckman's group stages will now occur?
- A Norming
 - B Forming
 - C Performing
 - D Storming
- (2 marks)**
-
- 45 In the context of fraud, 'teeming and lading' is most likely to occur in which area of operation?
- A Sales
 - B Quality control
 - C Advertising and promotion
 - D Despatch
- (2 marks)**
-
- 46 Which of the following statements is true in relation to the average revenue function of a business in a perfect market?
- A It is diagonal
 - B It is horizontal
 - C It is vertical
- (1 mark)**
-

Section B

ALL SIX questions are compulsory and MUST be attempted

1 Here are four short references to the function of management:

- A There are essentially five functions of management that apply to any organisation
- B Individual and group behaviour at work is a major factor in productivity.
- C Management is the development of a true science of work.
- D The manager of a business has one basic function – economic performance.

Required:

(a) Identify the description above which is associated with each of the following theorists, by selecting A, B, C, D or None.

- (i) Peter Drucker
- (ii) Elton Mayo
- (iii) Henry Mintzberg
- (iv) F W Taylor

Note: The total marks will be split equally between each part.

(2 marks)

(b) Below are listed five functions of management.

- A Planning
- B Organising
- C Managing
- D Monitoring
- E Motivating

Required:

Write down which two of the above are those functions identified by Fayol by selecting TWO of the letters from (A, B, C, D, E).

(2 marks)

(4 marks)

2 (a) XYZ Company installed a computer system to handle its main accounting functions including accounts receivables, accounts payables and payroll. Management has a number of concerns about access to the system and are considering a number of controls to overcome those concerns.

The following are types of control they are considering:

- A General control
- B Application control

Required:

Classify the following as either A (General control) or B (Application control):

- (i) Locking the computer room to prevent access to non-employees.
- (ii) Limiting access to the payroll system by making it password protected.
- (iii) Taking backup of data files each evening and holding backup copies off-premises.
- (iv) Providing basic IT training to the entire staff to prevent errors in using the system.

Note: The total marks will be split equally between each part.

(2 marks)

- (b) A company has considerable cash collections on a regular basis. The cashier receives the cash, records it and then banks it at the end of each day. Since a single person is responsible for access to cash, the financial director is concerned that fraud and error may occur in cash handling and recording. He proposes use of appropriate internal controls to prevent any such errors or misappropriations.

The following are specific examples of internal controls used in business:

- A Segregation of duties
- B Induction and training
- C Authorisation limit
- D Internal audit

The following sentences contain gaps which specify the appropriate internal control which could be used to prevent fraud and errors.

Fraud and errors in handling cash can be prevented through 1 since no one individual could record and process a complete transaction.

Required:

- (i) Select the correct internal control which appropriately fills gap 1 above; i.e. select A, B, C or D. **(1 mark)**

Even if such a measure were introduced, the possibility exists that staff could act together to perpetrate fraud and bypass this control. This can be prevented through 2 as it would ensure awareness of the heavy sanctions to be imposed in cases of dishonesty.

- (ii) Select the correct internal control which appropriately fills gap 2 above; i.e. select A, B, C or D. **(1 mark)**
(4 marks)

- 3 There are a number of ways of developing staff on a one-to-one basis within organisations. Each has its own strengths and weaknesses and is appropriate in different work situations.

Examples of types of development include coaching, mentoring, counselling and appraising.

Required:

- (a) For each type of development below, which work situation is most appropriate?
- A An interview to help another person to identify and work through a problem.
 - B A longer term relationship in which a more experienced person encourages an individual's personal and career development.
 - C An approach whereby a trainee is put under the guidance of an experienced employee who shows the trainee how to perform tasks.
 - D An interview, the aim of which is to review performance and identify training and development needs.
- (i) Coaching. Select ONE of A, B, C or D
(ii) Mentoring. Select ONE of A, B, C or D
(iii) Counselling. Select ONE of A, B, C or D
(iv) Appraising. Select ONE of A, B, C or D

Note: The total marks will be split equally between each part.

(2 marks)

(b) An organisation uses mentoring as a form of one-to-one personal development.

- A Determine remuneration
- B Decide promotions
- C Career and personal development
- D Resolve a grievance
- E Demonstrating how to perform
- F Using experienced staff for training
- G Providing a role model for an employee

Required:

Which TWO of the above are benefits of this approach? Select TWO from (A, B, C, D, E, F, G).

(2 marks)

(4 marks)

4 Sport-4-Kidz is a charitable organisation that operates a sports centre in a large city.

The land on which the playing fields and facilities are located is held on behalf of the charity by Donna and Dietmar, the two trustees. Donna and Dietmar simply hold the land on behalf of Sport-4-Kidz and play no role in running the charity. They are rarely contacted by the management of the charity.

However, they are the only people who are able to enter into contracts in relation to the land and its use. Sport-4-Kidz is managed and operated by a management committee. The committee has decided on a major expansion of facilities by building a new sports hall. The committee has the power to legally bind the charity in all matters other than the land. Their decisions are overseen by the government charity regulator, which generally sanctions the charity's decisions except in relation to financial reporting. The management committee is negotiating with four building companies.

The proposed expansion of the facilities has angered the local residents, many of whom are concerned about heavy building site traffic and the danger posed to their children. Many believe that the design of the new sports hall is ugly and insensitive. Three well-respected local politicians serve on the residents' committee.

(a) The following are types of stakeholder:

- A Internal stakeholder
- B External stakeholder
- C Connected stakeholder

Required:

For each of the following, indicate whether they are internal, connected or external stakeholders.

- (i) Donna and Dietmar. Select one of A, B or C
- (ii) Members of the management committee. Select one of A, B or C
- (iii) The four building companies. Select one of A, B or C
- (iv) Local residents. Select one of A, B or C

Note: The total marks will be split equally between each part.

(2 marks)

(b) Complete the following sentences about Sport-4-Kidz stakeholders, with reference to Mendelow's grid.

The local residents exert 1 and should be 2

(i) Select which ONE of the following fills Gap 1:

- A high power, low interest
- B high power, high interest
- C low power, low interest
- D low power, high interest

Write down A, B, C or D.

(ii) Select which ONE of the following fills Gap 2:

- A treated as a key player
- B kept satisfied
- C kept informed

Write down A, B, or C.

The building companies exert 3 and should be 4

(iii) Select which ONE of the following fills Gap 3:

- A high power, low interest
- B high power, high interest
- C low power, low interest
- D low power, high interest

Write down A, B, C or D.

(iv) Select which ONE of the following fills Gap 4:

- A treated as a key player
- B kept satisfied
- C kept informed

Write down A, B, or C.

Note: The total marks will be split equally between each part.

(2 marks)

(4 marks)

5 Accounting bodies set out a code of ethics to establish ethical behaviour requirements for professional accountants.

(a) The following are qualities you might see in a professional at work:

| | |
|-----------------------------|----------------------|
| Integrity A | Honesty B |
| Trustworthiness C | Expertise D |
| Professional behaviour E | Confidentiality F |
| Respectfulness G | Objectivity H |

Required:

Write down which of the FOUR boxes from (A–H) contain fundamental principles of ethical behaviour from the IFAC (IESBA) and ACCA codes of ethics.

(2 marks)

(b) The following are desirable characteristics of professions and vocations:

- A Acting in the public interest
- B Highly skilled
- C Ethical codes of conduct
- D Governance by association
- E Highly valued services
- F Training requirement
- G Process of certification
- H Qualification by examination

Required:

Select FOUR of the characteristics from the list above, which distinguish a profession from an occupation. **(2 marks)**

(4 marks)

6 Company A is an accountancy professional body which has a tall structure and a high level of centralisation. The span of control is very narrow. Subordinates have minimal latitude for self-determination or to influence decision-making and mainly concentrate on carrying out highly prescribed and defined roles.

Company B is a financial services company which gives a wide ranging role to its traders and promotes cultural values such as assertiveness, risk appetite, and a high degree of competition between employees. The employees are usually young and unmarried, and work and socialise together for long hours at a frenetic pace.

Company C is a research and development company where the business is divisionalised by product. Staff work very flexibly and often need to communicate laterally to achieve objectives through ad hoc projects and collaboration. There are no formal rules about reporting structures, or about set starting or finishing times. Staff are rewarded on the basis of creativity and innovation.

Company D is a family company which is highly controlled by the owners and the CEO is the main shareholder. There is a very low staff turnover, but employees are expected to be very loyal to the company and are often required to work long hours and carry out tasks outside their normal range of duties. Relationships between employees and managers are very informal and close and the rights of employees and their overall interests are strongly defended by the owners when challenged.

The following are dimensions used by Hofstede to classify types of organisational culture:

| | | 1. High | 2. Low |
|---|-----------------------|---------|--------|
| A | Power distance | A1 | A2 |
| B | Uncertainty avoidance | B1 | B2 |
| C | Individualism | C1 | C2 |
| D | Masculinity | D1 | D2 |

Required:

- (i) For Company A select which combination of dimensions apply from the grid above.
(For example A1) **(1 mark)**
 - (ii) For Company B select which combination of dimensions apply from the grid above.
(For example A1) **(1 mark)**
 - (iii) For Company C select which combination of dimensions apply from the grid above.
(For example A1) **(1 mark)**
 - (iv) For Company D select which combination of dimensions apply from the grid above.
(For example A1) **(1 mark)**
- (4 marks)**

Answers to Mock Exam 1

**DO NOT TURN THIS PAGE UNTIL YOU HAVE
COMPLETED THE MOCK EXAM**

ACCA Examiner's answers. The Examiner's answers to all the questions in Mock Exam 1 are included after this section.

SECTION A

- 1 B The IASB seeks to promote consistency in corporate reporting by creating internationally accepted financial reporting standards.
- 2 B This is the least participative of the styles in the Ashridge model.
- 3 B Negotiation gives the best opportunity for the two sides in a conflict to converge their positions. The other options either involve backing down, forcing a position, potentially increasing conflict, or leaving the issue unresolved.
- 4 B Mentors usually help staff on broader work related development, including orientation and induction. Coaches work on developing specific skills of the job itself, while counsellors work with people on a personal level, perhaps if they are having non-work related or emotional problems.
- 5 C By considering the collective well-being of all stakeholders an organisation will make decisions that are in the public interest.
- 6 A Because of the particular circumstances of the scenario where someone is made redundant from an industry in decline where skills cannot be easily transferred, where re-training might take a long time or where work is not available in the short term within a reasonable geographic proximity, this is classed as structural unemployment.
- 7 B The basic principle that underlies marketing is that it is a management process that identifies and anticipates customer needs. The other distracters in the question refer to specific activities undertaken by a sales or promotion function.
- 8 C The normal sanctions in such a case is that fines are imposed on companies by the registration body of the company and, where listed, the company may be delisted by the stock exchange authorities. Although the option wasn't included, sanctions against responsible directors may also be imposed.
- 9 D The ageing population trend is caused by a decreasing birth rate and a decreasing mortality rate.
- 10 B The 'tell and listen' approach encourages input from the individual, promoting participation in the process by the appraisee.
- 11 B The external auditor has to ensure that the financial statements of the organisation truly reflect the activities of the business in the relevant accounting period. This assessment should be independent and therefore free from subjectivity on the part of the management of the client organisation.
- 12 B Tactical information is medium term in nature and so does not include the long term product development plans, but does include annual forecasts and targets from performance appraisals.
- 13 A An employee with a range of tasks or objectives to achieve and pressures to achieve them to set deadlines, should always prioritise tasks in accordance to business importance. Deciding on other criteria such as pressure applied by colleagues, whether someone is absent or not or simply because a task is urgent may damage wider business objectives.
- 14 D A professional accountant acting in accordance with fundamental ethical principles is demonstrating objectivity when they give a complete and precise view, which by implication means that negative aspects should not be concealed or positive aspects accentuated.
- 15 C IFAC has no legal powers against businesses, nor does it set financial reporting standards. It is an accounting association member body which promotes educational and ethical standards of behaviour amongst its member bodies, through a code of ethics and behaviour, but does not prescribe detailed rules on this.
- 16 C Increasing taxation leaves individuals with less disposable income for expenditure within the economy thereby slowing economic activity. The same effect is caused by a reduction in government expenditure. Therefore economic activity can be stimulated by reducing taxation and increasing government expenditure.

- 17 C Information on purchase costs of finished goods or raw materials is important in establishing the price of a product. In terms of the marketing mix, this information is most relevant to the price element as prices should be set at least to cover cost and give an acceptable level of profit.
- 18 B Competence testing is most appropriate when testing a specific skill.
- 19 D The key correctly matches the information required to the particular financial statement in which they are to be found.
- 20 A The pluralist solution is to cater for the needs of more than one stakeholder group without seriously compromising the interests of any individual group. Therefore setting aside a special area for families with children while having an adults only section would achieve this. The other options involve adversely affecting the rights of one or other group of stakeholders in some way.
- 21 B Data protection legislation applies only to regulated data and is designed to protect the interests of private individuals only.
- 22 A A transaction processing or office automation system would mainly concern the *recording* of transactional data and would provide a summary. A decision-support system would *analyse* information.
- 23 B is correct because customers and suppliers deal closely on a transactional basis with the organisation, but are not internal stakeholders like managers and executive directors.
- 24 A In a period of high price inflation the value of money is reduced over time, so those who owe money are better off and those who are owed money lose out.
- 25 A Role playing exercises are most effectively used for skills development, including sales training. Other common business applications include effective selection interviewing and performance appraisal interviewing.
- 26 B The Blake and Mouton managerial grid enables leadership styles to be categorised on a nine point scale with reference to concern for production and concern for people. Renata is therefore highly concerned with the task and much less interested in her team as individuals.
- 27 B Internal auditors are responsible for monitoring the effectiveness of systems, not implementing them.
- 28 C External auditors are responsible for ensuring that the financial statements show a true and fair view and that they comply with legal requirements. Directors are responsible for ensuring that systems are in place to prevent and detect fraud.
- 29 A Integrity is often described as being honest and applying morality to decisions. Accuracy relates to professional competence and being neutral does not indicate morality.
- 30 B Only shareholders have voting power related to the number of shares that they own. Members of a co-operative organisation can vote but will only have one vote. Co-operatives may be owned by members, but ownership stakes cannot be exchanged between members unless the members belong to limited companies.
- 31 B To discriminate against someone on the grounds of characteristics which are predominately associated with their sex, gender, nationality or religion is illegal. As women are generally shorter than men, to restrict admission on the basis of height, indirectly discriminates against women. The other options are either direct discrimination, or other illegal and undesirable employment practices.
- 32 B According to Herzberg, money is a hygiene factor (or dissatisfier). Although it is a powerful short-term motivator, it is questionable whether each individual increase in monetary reward will have a major long-term effect. According to Herzberg, 'A reward once given becomes a right'.
- 33 B The task culture is appropriate where organisations can accommodate the flexibility required to adjust management and team structures to address the tasks that must be fulfilled. This is very common in large consultancy firms.
- 34 D The wheel facilitates transmission of the message directly to all receivers and therefore transmits most quickly.

- 35 C In a two-way communication link, both parties need to encode messages and both have to decode them in order for the communication to be understood.
- 36 B Equal opportunity policies widen opportunity and enlarge the potential pool of employees to recruit from. The other options either indirectly or directly reduce the potential for staff turnover and therefore limit the number of job vacancies available at any point in time.
- 37 D The primary aim of a public oversight board is to eliminate or minimise any actual or potential breaches of legislative requirements and to ensure compliance with regulations applicable to organisations within their terms of reference.
- 38 C Maximising efficiency in production (as in the scenario) is a feature of scientific management..
- 39 C The components of effective demand in the economy are consumer spending, investment by enterprises, central and local government expenditure and the net gains from international trade.
- 40 A The four Ps are Price, Promotion, Product and Place.
- 41 B Decentralisation involves having greater authority and power at lower levels of the organisation and accountability goes with this power.
- 42 A Compliance with legal requirements may not eliminate unethical behaviour. The issues of concern to those who complain may not be fully representative of issues of concern to customers in general. Other companies in the sector may not be concerned about ethical behaviour.
- 43 C Using SWOT analysis, the strengths and weaknesses are the relevant points as these are internal to the individual and these are the factors that would influence the opinions of others.
- 44 B As new members are about to join the group, essentially the group is reforming which is the start of a new group development process. The other options are all later stages in group development as identified by Tuckman.
- 45 A Teeming and lading involves the theft of cash and is a type of fraud that is carried out by manipulating transactions. There would be most potential for this fraud within the sales department where cash may be received and remitted.
- 46 B The demand curve in a perfect market is horizontal, because they can sell as much as they want at the prevailing market price and nothing at all at a higher price.

SECTION B

- 1 (a) (i) D Drucker emphasised the economic objective of managers in business
- (ii) B Mayo investigate individual and group behaviour at work, as a factor in productivity.
- (iii) None Mintzberg described managerial roles, arguing that management is a disjointed, non-systematic activity.
- (iv) C Taylor pioneered the scientific management movement and sought the most efficient methods.
- (b) A, B Fayol classified five functions of management: Planning, Organising, Commanding, Coordinating and Controlling.
- 2 (a) (i) A
- (ii) A
- (iii) A General controls relate to the environment in which the application is operated.
- (iv) B Application controls are controls that prevent, detect and correct errors.
- (b) (i) A Segregation of duties would prevent one individual recording and processing a complete transaction.
- (ii) B Awareness and training would make staff aware of sanctions in cases of dishonesty.
- 3 (a) (i) C Coaching involves a trainee being put under the guidance of an experienced employee.
- (ii) B Mentoring is a long-term relationship where a more experienced person encourages career and personal development.
- (iii) A Counselling is an interpersonal interview to help an individual identify and work through a problem.
- (iv) D Appraisals are part of performance management and can be used to establish areas for improvement and training and development needs.
- (b) C, G Mentoring is a long-term relationship where a more experienced person encourages career and personal development and can also be a role model.
- 4 (a) (i) C Donna and Dietmar are connected stakeholders as they are trustees of the charity.
- (ii) A The management committee are internal to the charity as they can legally bind the charity.
- (iii) C The building companies are in negotiation with the management committee and therefore are connected stakeholders.
- (iv) B Local residents will always be external stakeholders.
- (b) (i) B Residents have high interest due to the anticipated effects of the development, but due to the involvement of the local politicians they also have high power.
- (ii) A Stakeholders with high power and high interest should be treated as key players.
- (iii) D The building companies have high interest in the decision to award the building contract.
- (iv) C Stakeholders with low power and high interest should be kept informed.
- 5 (a) A, E, F, H The fundamental principles are Integrity, Confidentiality, Objectivity, Professional behaviour and Professional competence and due care.
- (b) A, C, D, G These qualities distinguish a profession from an occupation.

- 6 (i) A1 High power distance cultures accept greater centralisation, a top-down chain of command and closer supervision.
- (ii) D1 High masculinity cultures clearly differentiate gender roles. Masculine values of assertiveness, competition, decisiveness and material success are dominant.
- (iii) B2 Low uncertainty avoidance cultures respect flexibility and creativity. They have less task structure and written rules. There is more tolerance of risk, dissent, conflict and deviation from norms.
- (iv) C2 Low individualism cultures emphasise interdependence, reciprocal obligation and social acceptability. The organisation is seen as a family.

ACCA's exam answers

SECTION A

- 1 B The IASB aims to promote consistency in corporate reporting by creating financial reporting standards to which major businesses are expected to adhere.
- 2 B The Ashridge model identifies four styles: autocratic; authoritarian; consultative; laissez-faire (or participative). The first of these is the least participative.
- 3 B Negotiation gives the best opportunity for the two sides in a conflict to converge their positions. The other options either involve backing down, forcing a position, potentially increasing conflict, or leaving the issue unresolved.
- 4 B Mentors usually help staff on broader work related development, including orientation and induction. Coaches work on developing specific skills of the job itself, while counsellors work with people on a personal level, perhaps if they are having non-work related or emotional problems.
- 5 C The board of directors are responsible for the well being of a wide group of constituencies, including shareholders, but also employees and other internal, external and connected stakeholders.
- 6 A Because of the particular circumstances of the scenario where someone is made redundant from an industry in decline where skills cannot be easily transferred, where re-training might take a long time or where work is not available in the short term within a reasonable geographic proximity, this is classed as structural unemployment.
- 7 B The basic principle that underlies marketing is that it is a management process that identifies and anticipates customer needs. The other distracters in the question refer to specific activities undertaken by a sales or promotion function.
- 8 C The normal sanctions in such a case is that fines are imposed on companies by the registration body of the company and, where listed, the company may be delisted by the stock exchange authorities. Although the option wasn't included, sanctions against responsible directors may also be imposed.
- 9 D The ageing population trend is caused by a decreasing birth rate and a decreasing mortality rate.
- 10 B The 'tell and listen' approach encourages input from the individual, promoting participation in the process by the appraisee.
- 11 B The external auditor has to ensure that the financial statements of the organisation truly reflect the activities of the business in the relevant accounting period. This assessment should be independent and therefore free from subjectivity on the part of the management of the client organisation.
- 12 B Annual targets and management forecasts from performance appraisals indicate medium term planning horizons which are both tactical in nature, whereas product development plans for 2-3 years are longer term strategic objectives.
- 13 A An employee with a range of tasks or objectives to achieve and pressures to achieve them to set deadlines, should always prioritise tasks in accordance to business importance. Deciding on other criteria such as pressure applied by colleagues, whether someone is absent or not or simply because a task is urgent may damage wider business objectives.
- 14 D A professional accountant acting in accordance with fundamental ethical principles is demonstrating objectivity when they give a complete and precise view, which by implication means that negative aspects should not be concealed or positive aspects accentuated.
- 15 C IFAC has no legal powers against businesses, nor does it set financial reporting standards. It is an accounting association member body which promotes educational and ethical standards of behaviour amongst its member bodies, through a code of ethics and behaviour, but does not prescribe detailed rules on this.
- 16 C Increasing taxation leaves individuals with less disposable income for expenditure within the economy thereby slowing economic activity. The same effect is caused by a reduction in government expenditure. Therefore economic activity can be stimulated by reducing taxation and increasing government expenditure.

- 17 C Information on purchase costs of finished goods or raw materials is important in establishing the price of a product. In terms of the marketing mix, this information is most relevant to the price element as prices should be set at least to cover cost and give an acceptable level of profit.
- 18 B As the test is needed to test specific skills, competence testing is most appropriate. Intelligence and psychometric tests are intended to assess innate ability or psychological traits, which are more general.
- 19 D The key correctly matches the information required to the particular financial statement in which they are to be found.
- 20 A The pluralist solution is to cater for the needs of more than one stakeholder group without seriously compromising the interests of any individual group. Therefore setting aside a special area for families with children while having an adults only section would achieve this. The other options involve adversely affecting the rights of one or other group of stakeholders in some way.
- 21 B Data protection legislation is formulated to protect the interests of data subjects who are private individuals. Not all data is regulated.
- 22 A A transaction processing system enables all sales and purchase transactions to be recorded by volume and category.
- 23 B is correct because customers and suppliers deal closely on a transactional basis with the organisation, but are not internal stakeholders like managers and executive directors.
- 24 A Where price inflation is high the value of money reduces consistently over time. Those who owe money (debtors) therefore pay back less capital in real terms, and interest rates seldom adjust adequately to compensate for this.
- 25 A Role playing exercises are most effectively used for skills development, including sales training. Other common business applications include effective selection interviewing and performance appraisal interviewing.
- 26 B The Blake and Mouton managerial grid enables leadership styles to be categorised on a nine point scale with reference to concern for production and concern for people. Renata is therefore highly concerned with the task and much less interested in her team as individuals.
- 27 B The implementation of budgetary control system would be the responsibility of the financial controller in many organisations. The internal auditor is not responsible for implementing systems, but is involved in monitoring the effectiveness of these systems.
- 28 C The external auditor is responsible for ensuring that financial reports portray a true and fair view and comply with legal disclosure requirements. External auditors are not responsible for ensuring that systems exist to prevent fraud.
- 29 A Integrity is about honesty and applying morality to business and professional behaviour. A person acting with integrity should not be corruptible. Neutrality in the making of business decisions does not indicate morality nor does producing accurate work, which is more about professional competence.
- 30 B Only shareholders have voting power related to the number of shares that they own. Members of a co-operative organisation can vote but will only have one vote. Co-operatives may be owned by members, but ownership stakes cannot be exchanged between members unless the members belong to limited companies.
- 31 B To discriminate against someone on the grounds of characteristics which are predominately associated with their sex, gender, nationality or religion is illegal. As women are generally shorter than men, to restrict admission on the basis of height, indirectly discriminates against women. The other options are either direct discrimination, or other illegal and undesirable employment practices.
- 32 B According to Herzberg, money is a hygiene factor (or dissatisfier). Although it is a powerful short-term motivator, it is questionable whether each individual increase in monetary reward will have a major long-term effect. According to Herzberg, 'A reward once given becomes a right'.

- 33 B The task culture is appropriate where organisations can accommodate the flexibility required to adjust management and team structures to address the tasks that must be fulfilled. This is very common in large consultancy firms.
- 34 D The wheel facilitates transmission of the message directly to all receivers and therefore transmits most quickly.
- 35 D All the options describe measures that will limit environmental impact or potentially reduce the carbon footprint.
- 36 C Both parties in a two way communication link will need to encode messages and both have to decode them for them to be understood. The other options imply that only one party encodes messages.
- 37 D The primary aim of a public oversight board is to eliminate or minimise any actual or potential breaches of legislative requirements and to ensure compliance with regulations applicable to organisations within their terms of reference.
- 38 C Scientific management principles consider the ways in which the factors of production (land, labour, capital and the entrepreneurial function) can be combined to maximise efficiency in production. The founding principles are based on the work of Frederick Winslow Taylor. The reorganisation of the call centre follows these principles.
- 39 C The components of effective demand in the economy are consumer spending, investment by enterprises, central and local government expenditure and the net gains from international trade.
- 40 A The Four Ps are Product, Price, Promotion and Place.
- 41 B Decentralisation devolves authority to lower levels and gives more autonomy to individuals and teams. Decentralisation on the other hand increases risk as there is less control over individual and group behaviour decision-making. Allowing more freedom to act independently leads to less consistency across the organisation.
- 42 A Compliance with legal requirements may not eliminate unethical behaviour. The issues of concern to those who complain may not be fully representative of issues of concern to customers in general. Other companies in the sector may not be concerned about ethical behaviour.
- 43 C Using SWOT analysis, the way to conduct this analysis would be for the individual to consider their own strengths and weaknesses and how they could affect the impression given to others. The other options are external factors to the individual so would not directly affect the opinion that others would have of that individual.
- 44 B As new members are about to join the group, essentially the group is reforming which is the start of a new group development process. The other options are all later stages in group development as identified by Tuckman.
- 45 A Teeming and lading involves the theft of cash and is a type of fraud that is carried out by manipulating transactions. There would be most potential for this fraud within the sales department where cash may be received and remitted.
- 46 B The demand curve of a company in a perfect market is horizontal, because they can sell as much as they want at a given market price and nothing at all at a price set higher than the prevailing market price.

SECTION B

FIA

Paper FAB

Accountant in Business

Mock Examination 2

| | |
|--|----------------|
| Question Paper | |
| Time allowed | 2 hours |
| <i>This paper is divided into two sections:</i> | |
| <i>Section A – ALL 46 questions are compulsory and MUST be attempted</i> | |
| <i>Section B – ALL SIX questions are compulsory and MUST be attempted</i> | |

Please note that it is not possible to predict question topics in an examination of this nature. We have based the content of this Mock Exam on our long experience of the ACCA exams. We do not claim to have any endorsement of the question types or topics from either the examiner or the ACCA and we do not guarantee that either the specific questions or the general areas that are featured here will necessarily be included in the exams, in part or in whole.

We do not accept any liability or responsibility to any person who takes, or does not take, any action based (either in whole or in part and either directly or indirectly) upon any statement or omission made in this book. We encourage students to study all topics in the ACCA syllabus and this Mock Exam is intended as an aid to revision only.

DO NOT OPEN THIS PAPER UNTIL YOU ARE READY TO START UNDER EXAMINATION CONDITIONS

SECTION A

ALL 46 questions are compulsory and MUST be attempted

- 1 1 Private companies can raise share capital by advertising to the general public.
 2 Private companies can raise share capital from venture capitalists

Are these statements true or false?

- A Statement 1 is true and statement 2 is false
 B Statement 1 is false and statement 2 is true
 C Both statements are true
 D Both statements are false

(2 marks)

- 2 Nysslit Lerner plc, an organisation of some 400 employees, has an average span of control of three, throughout its structure. From this, which of the following inferences might one make?

- A The work is systematic and routine
 B The level of complexity in the work is high
 C The organisation is flat

(1 mark)

- 3 Which of the following is part of the research and development function of a business?

- A The analysis of survey data on consumer behaviour, produced under contract by an independent market research company
 B Creating new products and improving existing ones
 C Contracting independent advertising agencies to promote the products being sold by the company

(1 mark)

- 4 Which of the following members of the finance function would be responsible for deciding how much credit should be given to customers?

- A The financial manager
 B The financial accountant
 C The management accountant

(1 mark)

- 5 Mrs Grey likes swimming and playing badminton as part of her exercise routine. She has a budget of up to \$25 to spend each week on getting fit. Each trip to the swimming pool costs \$3, and each badminton session costs \$4.

Her marginal utility schedule is given below:

| Number of trips | Marginal utility of swimming | Marginal utility of badminton |
|-----------------|------------------------------|-------------------------------|
| 1 | 90 | 100 |
| 2 | 80 | 90 |
| 3 | 70 | 80 |
| 4 | 60 | 70 |
| 5 | 50 | 60 |

Which combination of activities gives Mrs Grey the highest utility?

- | | <i>Swimming</i> | <i>Badminton</i> |
|---|-----------------|------------------|
| A | 1 | 5 |
| B | 3 | 4 |
| C | 4 | 3 |
| D | 2 | 4 |

(2 marks)

- 6 You have received a letter from an estate agent, requesting financial information about one of your clients, who is applying to rent a property. The information is needed as soon as possible, by fax or e-mail, or the client will lose approval.

Which of the following ethical principles, identified in the ACCA code of ethics, is raised by the decision of whether, when and how to respond to this request?

- A Objectivity
- B Technical competence
- C Confidentiality
- D Professional behaviour

(2 marks)

- 7 A large, well-established construction company organises itself on a project basis, using temporary matrix and project team structures.

What cultural type is most likely to fit this organisation?

- A Role culture
- B Power culture
- C Task culture

(1 mark)

- 8 Which one of the following options sets out the required procedures for all of the various functions of a business?

- A An accounting manual
- B A function policy
- C A management information manual
- D A policy manual

(2 marks)

- 9 Which of the following is a purpose of a job evaluation?

- A Identifying individuals' training and development needs
- B Evaluating the organisation's recruitment and selection procedures
- C Improving upward communication
- D Demonstrating compliance with equal pay legislation

(2 marks)

- 10 Which of the following is an external stakeholder?

- A Professional body
- B Customer
- C Bank of the organisation

(1 mark)

- 11 Helen, Jack, Sue and Joe work in the finance department of Y Co which has separate financial accounting and management accounting functions. Helen works on inventory valuation, budgetary control and variance analysis. Jack deals with sales invoicing and debt collection. Sue deals with quarterly sales tax returns and corporation tax and Joe carries out risk assessments and assists in project planning. Which member of the department would report to the management accountant?

- A Helen
- B Jack
- C Sue
- D Joe

(2 marks)

- 12 Homer and Marge work for similar companies but at Marge's company a mechanistic system of management exists, in contrast to the organic approach at Homer's firm. They are discussing some of the characteristics of each system, which are outlined below.

- (i) Managers are responsible for co-ordinating tasks
- (ii) Insistence on loyalty to the organisation
- (iii) Job description are less precise, it is harder to 'pass the buck'.
- (iv) Hierarchical structure of control in an impersonal organisation

Which three would Marge recognise from her workplace?

- A (i), (ii) and (iii)
- B (i), (ii) and (iv)
- C (ii), (iii) and (iv)
- D (i), (iii) and (iv)

(2 marks)

- 13 Individuals may conform with the norms and customs of a group without real commitment. Which of the following terms describes such behaviour?

- A Compliance
- B Counter-conformity
- C Internalisation
- D Identification

(2 marks)

- 14 Which of the following is a negative contribution of the audit committee, in a corporate governance framework?

- A A lack of independence in reviewing the proposed approach of the external auditors
- B Acting as a barrier between the main (executive) board and the external auditors
- C Not allowing a forum to raise issues of concern

(1 mark)

- 15 Which of the following is a feature of ineffective delegation by a manager?

- A Specifying performance levels and the results expected of the subordinate
- B Obtaining the subordinate's agreement with the task and expected results
- C Ensuring that all the subordinate's decisions are confirmed or authorised by the superior
- D Ensuring that the subordinate reports the results of her decisions to the superior

(2 marks)

- 16 In the context of fraud, which of the following statements is *false*?

- A Deliberate manipulation of depreciation figures is difficult because of its cash flow effects.
- B Fraudulently understating expenses will inflate the reported profit figure.
- C Selling goods to friends (with a promise of buying them back at a later date) is potentially fraudulent.
- D Employees within or outside the payroll department can perpetrate payroll fraud.

(2 marks)

- 17 If you are a team leader, seeking to evaluate the effectiveness of your team, which of the following criteria should you use?

Criteria:

- (i) Contribution to organisational objectives
- (ii) Fulfilment of group task objectives
- (iii) Satisfaction of the development needs of members

- A Criterion (ii) only
- B Criteria (i) and (ii) only
- C Criteria (ii) and (iii) only
- D Criteria (i), (ii) and (iii)

(2 marks)

- 18 In the context of motivation theory, what are Douglas McGregor's Theory X and Theory Y?
- A Extreme types of managers
 - B Extreme sets of assumptions that managers may have about workers
 - C Extreme types of employees
- (1 mark)**
-
- 19 In the context of interpersonal skills for counselling, is the skill of seeing an issue from the other person's point of view and reflecting your understanding back to the other person.
- Which of the following terms correctly completes this sentence?
- A Rapport-building
 - B Empathy
 - C Active listening
- (1 mark)**
-
- 20 Which one of the following is **not** an offence relating to money laundering?
- A Concealing the proceeds of criminal activity
 - B Tipping off
 - C Dealing in price affected securities
 - D Failing to report suspicion of money laundering
- (2 marks)**
-
- 21 Anna, Barry, Charles, Dilip and Elaine all work in the same department and form a communication network within the department.
- When there is information to be communicated, Charles is given this information. He then communicates this to Barry, Dilip and Elaine.
- Barry will then communicate this information to Anna.
- Which of the following patterns of group communication is being used here?
- A Wheel
 - B Chain
 - C Circle
 - D Y
- (2 marks)**
-
- 22 Lockett suggested a number of barriers to effective performance appraisal, including 'appraisal as unfinished business'. What is meant by this phrase?
- A Appraisal interviews are subject to interruption or left incomplete
 - B The manager is embarrassed by the need to give feedback and set challenging targets, and leaves the interview with unresolved issues.
 - C Appraisal is used as a wrapping up of the unresolved performance issues of the past year, rather than focusing on future improvement and problem-solving
 - D Appraisal is seen as a sort of show-down, in which unresolved conflicts can be brought into the open
- (2 marks)**
-
- 23 In the context of work planning, a is an undertaking that has a defined beginning and end and is carried out to meet established goals within cost, schedule and quality objectives.
- Which word or phrase correctly completes this definition?
- A Contingency plan
 - B Project
 - C Strategy
- (1 mark)**
-

- 24 The management of RST Co recently held a meeting regarding its financial results for the last year. It has been suggested in the media that RST Co makes excessive profits. In order to combat this the management have decided to deliberately understate its financial performance for the last year.

Which of the following is a potential consequence of RST, fraudulently understating its results?

- A Excessive distribution of profits to shareholders
- B Restricted access to loan finance
- C Unrealistic expectations in the financial markets
- D Potential shortfalls in working capital

(2 marks)

- 25 The price elasticity of demand (PED) of good A is negative, its income elasticity of demand (IED) is positive and its cross elasticity of demand (XED) with respect to good X is negative. What is the nature of good A?

- A A good bought for purposes of ostentation, complementary to X
- B An inferior good, substitute for X
- C A normal good, complementary to X

(1 mark)

- 26 In the context of Tuckman's model of team development, which of the following sequences of stages is correct?

- A Norming, storming, forming, performing
- B Forming, storming, norming, performing
- C Storming, forming, norming, performing
- D Forming, performing, storming, norming

(2 marks)

- 27 In the regulatory system surrounding financial accounting, which body has as a key objective the development of a single set of enforceable global accounting standards?

- A The Accounting Standards Board
- B The International Accounting Standards Board
- C The European Union

(1 mark)

- 28 Which three of the following are typical of informal groups within an organisation?

- (i) Membership is voluntary
- (ii) Tasks are assigned by management
- (iii) Communication is open and informal
- (iv) Tasks are not assigned by management

- A (i), (ii) and (iii)
- B (ii), (iii) and (iv)
- C (i), (ii) and (iv)
- D (i), (iii) and (iv)

(2 marks)

- 29 Some meetings achieve very little because of hindrances. Sally is learning about these problems and how she can avoid them in her role as chairperson at the next project team meeting. Following conversations with other people in the business she has come up with four suggestions for making meetings more effective.

- (i) Name the person responsible for completing each action point, and assign a completion date
- (ii) Agree goals in advance
- (iii) Include all actions required and the assigned dates in the minutes
- (iv) Prepare a focused agenda and ensure people stick to it

Which two of the above are ways of avoiding participants being unclear about the purpose of the meeting?

- A (i) and (ii)
- B (ii) and (iii)
- C (iii) and (iv)
- D (ii) and (iv)

(2 marks)

- 30 Which of the following should be the purposes of an appraisal interview?
- 1 To discuss employee performance
 - 2 To discipline an employee
 - 3 To agree an employee's salary review
 - 4 To identify an employee's development needs
- A 1 and 3
B 1 and 4
C 3 and 4
D 1 and 2
- (2 marks)**
-

- 31 If a government increased its expenditure and reduced levels of taxation, the effect would be to (i) demand in the economy and to (ii)..... the size of the Public Sector Net Cash Requirement.
- Which words correctly complete this statement?
- A (i) stimulate, (ii) reduce
B (i) reduce, (ii) reduce
C (i) stimulate, (ii) raise
D (i) reduce, (ii) raise
- (2 marks)**
-

- 32 Which of the following statements is an example of lateral communication?
- A Communication between middle managers and their first line supervisors
B Communication between heads of department, who report to the same divisional manager
C Communication between supervisors and their team members
- (1 mark)**
-

- 33 While out to lunch, you run into a client at the sandwich bar. In conversation, she tells you that she expects to inherit from a recently deceased uncle, and asks you how she will be affected by inheritance tax, capital gains tax and other matters – which you have not dealt with, in detail, for some years.
- Which of the following principles of the ACCA Code of Ethics is raised by this scenario?
- A Due care
B Integrity
C Professional behaviour
D Confidentiality
- (2 marks)**
-

- 34 learning is a method in which managers are brought together as a problem-solving group to discuss a real work issue, and a facilitator helps them to identify how their interpersonal and problem-solving skills are affecting the process.
- What word correctly completes this definition?
- A Experiential
B Action
C Off-the-job
D Behavioural
- (2 marks)**
-

- 35 There are a number of different views on ethics within the finance department of TUV Co.
- Tina believes that actions should be judged by their outcomes or consequences.
- Chris states that there is an unchanging set of ethical principles that always applies.
- Will believes that right and wrong are culturally determined
- Which view of ethics is given by Will?
- A Ethical relativism
B Cognitivism
C Teleological
D Deontological
- (2 marks)**
-

- 36 Business are a set of moral principles to guide behaviour in business contexts.
Which of the following words correctly completes the sentence?
- A Objectives
 - B Controls
 - C Ethics
- (1 mark)**
-
- 37 Which TWO of the following are best shown using a bar chart?
- 1 The nature of activities within an action plan
 - 2 A sequence of activities within a project
 - 3 The time required for different activities
 - 4 Quantitative relationships between activities
- A 1 and 2
 - B 2 and 3
 - C 2 and 4
 - D 3 and 4
- (2 marks)**
-
- 38 Emma, John, Pratish and Rekha all work for W Co. Emma ensures that goods are only purchased when they are required. John ensures that goods that are purchased are purchased from authorised suppliers. Pratish pays the suppliers' invoices and Rekha evaluates the financial stability of potential suppliers. Three of the members of Q Co work in the purchasing department and one works in the accounting department. Which member works in the accounting department?
- A Emma
 - B John
 - C Pratish
 - D Rekha
- (2 marks)**
-
- 39 When an organisation carries out an environmental scan, it analyses which of the following?
- A Strengths, weaknesses, opportunities and threats
 - B Political, economic, social and technological factors
 - C Strategic options and choice
 - D Inbound and outbound logistics
- (2 marks)**
-
- 40 Which part of SWOT analysis considers external environmental factors?
- A Strengths and weaknesses
 - B Strengths and threats
 - C Opportunities and threats
 - D Opportunities and weaknesses
- (2 marks)**
-
- 41 The IFAC code is administered by which body?
- A ACCA
 - B IESBA
 - C FATF
- (1 mark)**
-
- 42 In the context of internal control systems which of the following would be included in the 'control procedures'?
- A Strategies for dealing with significant identified risks
 - B Clear definition of authority, responsibility and accountability
 - C Detailed policies and procedures for administrative and accounting control
 - D Senior management commitment to competence and integrity
- (2 marks)**
-
- 43 Which of the following is likely to pose the *least* number of problems for effective time management?
- A Personal work patterns
 - B Meetings
 - C The telephone
- (1 mark)**
-

44 Stephanie works in the internal audit department of M Co. Her duties involve using substantive tests in order to detect fraud. She produces reports to senior management detailing her findings. For which type of audit is Stephanie responsible?

- A Operational audit
- B Transactions audit
- C Efficiency audit
- D Management audit

(2 marks)

45 Julie and Nick are both on the same salary and grade at P Co. Julie is the finance director and Nick is the operations director. A new project team has been created to consider an alternative office location for P Co. Julie and Nick are part of this team. When Julie and Nick communicate with each other, what type of communication is this?

- A Downward
- B Diagonal
- C Lateral

(1 mark)

46 The following qualities are some of those expected of an accountant, but which is a professional quality as opposed to a personal quality?

- A Reliability
- B Respect
- C Timeliness
- D Scepticism

(2 marks)

SECTION B

ALL SIX questions are compulsory and MUST be attempted

1 (a) Mintzberg defined three categories of managerial role as follows:

- A Interpersonal
- B Informational
- C Decisional

For each of the following managerial roles select the correct category from the above list

- (i) Negotiator
- (ii) Spokesperson
- (iii) Disseminator
- (iv) Figurehead
- (v) Liaison
- (vi) Disturbance handler

(3 marks)

(b) Are the following statements about supervisors true or false?

- (i) Supervisors spend all their time on managerial aspects of the job
- (ii) A supervisor is a filter between managerial and non-managerial staff

(1 mark)

2 (a) Frank, Gloria, Helen and Ian are discussing how they should structure their newly formed company.

Frank wants a structure which would allow the newly recruited employees to be more flexible.

Gloria would prefer a structure where decisions can be made at a local level rather than centrally.

Helen wants a structure that will facilitate the recruitment of technical specialists for the business.

Ian 's preference is for a structure that does not have bureaucratic obstacles that are present in other structures.

The following are different ways of structuring a company

- A Functional departmentation
- B Geographic departmentation
- C Matrix organisation

Which structure would be preferred by each of the following?

- (i) Frank
- (ii) Gloria
- (iii) Helen
- (iv) Ian

(2 marks)

(b) Which TWO of the following are features of a boundaryless structure?

- A The employee is a seller of skills
- B Barriers are removed between the organisation and its suppliers
- C The organisation only exists electronically
- D The focus is on the customer
- E Elimination of bureaucracy

(2 marks)

- 3 (a) The Board of Directors of BCD Co discussed corporate governance concepts.

The finance director wants to provide financial projections to shareholders which were used as the basis for deciding to proceed with a major overseas investment.

The marketing director has decided not to authorise a proposed advertising campaign which she believes is misleading, despite the other directors pushing for the campaign to go ahead.

The HR director, who was responsible for introducing an unsuccessful training programme across the entire business, accepts that he should take the blame for this issue.

The chief executive has decided not to proceed with a proposed takeover of a competitor, that would not have increased the value of BCD Co, but would have given the directors higher status.

The following are corporate governance concepts:

- A Responsibility
- B Transparency
- C Judgement
- D Integrity

For each of the above scenarios, select the corporate governance concept being applied by:

- (i) The finance director
- (ii) The marketing director
- (iii) The HR director
- (iv) The chief executive **(2 marks)**

- (b) Which of the following describes the minimum level of compliance an organisation must have?

- A There is no minimum level
- B Legal obligations only
- C Legal obligations and non-legal regulations **(1 mark)**

- (c) Managers have a duty of faithful service to an organisation. This is known as their

Which phrase correctly fills in the blank?

- A financial responsibility
- B fiduciary responsibility
- C ethical position **(1 mark)**

- 4 (a) The following are all areas of legal issues that can affect an organisation.

- A Directors' duties
- B Minimum wage
- C Theft
- D Waste disposal

For each of the following legal factors, select the appropriate example it relates to:

- (i) Employment law. Select one of A, B, C or D
- (ii) Company law. Select one of A, B, C or D
- (iii) Criminal law. Select one of A, B, C or D
- (iv) Environment. Select one of A, B, C or D **(2 marks)**

- (b) Are each of the following statements about Health and Safety true or false?

- (i) Employers have a duty to employ competent safety and health advisers.
- (ii) Employees have a responsibility to find out about the safety policy
- (iii) Employers do not need to introduce controls to reduce risks
- (iv) If an employee is aware of the risk of injury at work, they consent to this risk **(2 marks)**

5 (a) The following are qualities that might be found in accounting information

- A Reliability
- B Irrelevance
- C Electronic
- D Completeness
- E Objectivity
- F Unformatted
- G Incomparability
- H Timeliness

Select FOUR from the list that accounting information should have if it is to be useful.

(2 marks)

(b) Identify which of the following tasks are the responsibility of:

- A Management accountant
- B Financial accountant
- (i) Budgetary control
- (ii) Statutory accounts
- (iii) Job costing
- (iv) Taxation

(2 marks)

6 (a) FGH Co has a culture of informality in most of its communications at lower levels, but communications with and amongst members of the board are typically formal.

The following are methods of communication used by FGH Co:

- A Postal service
- B E-mail
- C Report
- D Video conference

In each of the following circumstances select the appropriate method of communication:

- (i) Communicating the findings of an external review into investment possibilities to the board
- (ii) Formal document requiring directors' signatures to be sent to company lawyers
- (iii) A meeting between sales managers based in geographically distant locations
- (iv) Letting employees know about a staff meeting to be held in one month's time

(2 marks)

(b) Which TWO of the following are effects on an organisation of its employees being ineffective?

- A Staff turnover will increase
- B Deadlines will be missed
- C Problems are not dealt with as they arise
- D Customer satisfaction will increase

(2 marks)

Answers to Mock Exam 2

**DO NOT TURN THIS PAGE UNTIL YOU HAVE
COMPLETED THE MOCK EXAM**

SECTION A

- 1 B **Rationale:** The key difference between private and public companies is that only public companies can advertise their shares to the general public. Both private and public companies can raise share capital from venture capitalists.
Pitfalls: You had to get your 'private and 'public' companies the right way round.
- 2 B **Rationale:** The organisation has a narrow span of control: this would typically be the case if the work is complex, as it requires closer supervision.
Pitfalls: Remember: narrow span typically means tall organisation; wide span typically means flat organisation.
Ways in: Work through each option. Systematic/routine work would not need such a narrow span of control. With a control span of three in a fairly large organisation, the organisation must be tall...
- 3 B **Rationale:** Options A and C would be part of the marketing function.
- 4 A **Rationale:** The financial manager, among other responsibilities, will decide how much credit should be given to customers.
Pitfalls: The management accountant presents accounting information to support management. The financial accountant reports the results and financial position of a business.
- 5 B **Rationale:** Utility is greatest at the point where:
- $$\frac{\text{Marginal utility of swimming}}{\text{Price of swimming trip}} = \frac{\text{Marginal utility of badminton}}{\text{Price of badminton session}}$$
- $$= \frac{60}{3} = \frac{80}{4} = 20$$
- = 4 swimming trips and 3 badminton sessions
- Note: 4 swimming trips and 3 badminton sessions cost a total of \$24 and so are within the \$25 budget. Mrs Grey's overall total utility is restricted by her budget, so the total cost of any combination she might wish to choose must be less than \$25.
- 6 C **Rationale:** Confidentiality is the immediate ethical issue. You need the client's authority to disclose the information: you may also need to confirm the identity of the person making the request, and take steps to protect the confidentiality of the information if you send it (ie not using fax or e-mail). The other ethical principles do not apply here.
- 7 C **Rationale:** A task culture (in Harrison's classification) suits project management structures, with their focus on deliverables (project completion) rather than processes. Role culture suits bureaucratic cultures and power culture suits simple/entrepreneurial structures.
Pitfalls: Just because the organisation is large and well-established, don't immediately jump to the conclusion that it is a bureaucracy (role culture)!
- 8 D **Rationale:** Every employee will be expected to have read the areas relevant to their functions and the policy manual should always be readily available for easy reference.
- 9 D **Rationale:** Equal pay legislation requires that women be paid equal pay to men for work 'of equal value' (to the organisation): this is established by job evaluation. The others are potential purposes of a performance appraisal. Equal pay is about the value of the job, not the value of the job holder. If you hesitated over option B, think of performance appraisal as a way of monitoring whether people really do as well in the job as the selection system predicted they would when they were hired!
- 10 A **Rationale:** External stakeholder groups – the government, local authorities, pressure groups, the community at large, professional bodies – are likely to have quite diverse objectives.
- 11 A **Rationale:** The Financial Accountant is responsible for activities such as payroll, receivables and payables ledger, credit control, financial accounts and taxation. Jack and Sue would report to the financial accountant. The Treasurer (if there is one) would be responsible for project (investment) appraisal, and his or her priority would be funds management. Joe would report to the treasurer.
Pitfalls: These are essential distinctions: any combination of the tasks and titles could be tested.

- 12 B **Rationale:** The correct answers are: Managers are responsible for coordinating tasks; insistence on loyalty to the organisation; hierarchical structure of control in an impersonal organisation. In contrast, Homer would recognise the other feature as typical of an organic system of management.
- 13 A **Rationale:** Compliance is behaving in such a way as to conform, regardless of underlying commitment or attitude: it applies to organisations as well as individuals! Counter-conformity is rejection of group norms. Internalisation is 'inner' acceptance and ownership of the norms. Identification is a separate idea: it is one of the processes through which norms are reinforced in a group.
- 14 B **Rationale:** This may sound like an 'independence' benefit, but the key word is 'barrier': the main board needs to take responsibility for the financial statements and be open to question by auditors.
- 15 C **Rationale:** There is a fine distinction between option D (making the subordinate accountable) and option C (interfering!) If the superior doesn't trust the subordinate to make decisions, she shouldn't have delegated at all. Options A and B should clearly be effective practice.
- 16 A **Rationale:** Depreciation is an expense that doesn't have any cash flow effect, so the figures are easily tampered with: eg understating depreciation to give a healthier net book value. Option B is clearly true. Option C is true because this can be used to create fictitious sales values or manipulate year end results. Option D is true because, for example, any employee can falsify time-sheets, and payroll staff can channel payments to bogus staff accounts.
- 17 D **Rationale:** The criteria for team effectiveness are *both* fulfilment of task objectives (which should contribute to organisational objectives) *and* member satisfaction, where that contributes to the ability of the group to fulfil its task (eg in the development of members' skills and abilities).
- 18 B **Rationale:** Theory X and Y are only managerial assumptions – which then *influence* the kinds of motivational approaches and leadership styles the manager will adopt. They do not describe actual types of people (managers or employees).
Pitfalls: You are often asked to show critical awareness and understanding of theories, so it is worth getting this distinction clear.
- 19 B **Rationale:** The closest distractor is active listening, as reflecting understanding is one of the ways a listener can be 'active'. (Other ways include questioning, summarising, showing attentive body language, giving feedback and so on.) Rapport-building is the skill of making another person feel at ease with you, and willing to communicate with you.
- 20 C **Rationale:** This could be insider dealing, if the person dealing was an insider and was using inside information.
- 21 D **Rationale:** This is an example of the Y network. Drawing out what is going on may help here.
- 22 C **Rationale:** This is what Lockett meant by the phrase. Option A is a simple distractor. Options B and D describe other barriers: 'Appraisal as chat' and 'Appraisal as confrontation'.
- 23 B **Rationale:** A project is distinguished from routine work because of these characteristics. A contingency plan is a plan for what should be done if changes or problems occur. A strategy is a long-term plan relating to the direction of the firm or business unit.
- 24 B **Rationale:** Finance may be hard to come by because the financial health of the firm (ability to maintain and pay off loans) is understated. The other options are impacts of fraudulently overstating results.
Pitfalls: Ensure that you read the question carefully and address understated, not overstated, results.
Ways in: This should have been clear if you worked through each of the options. Once you identified that some of the distractors were overstatement impacts, you would have a good idea what to look for.
- 25 C **Rationale:** Goods of ostentation have positive PED. Inferior goods have negative IED. Substitutes have positive XED.

- 26 B **Rationale:** Forming is the tentative 'getting to know each other' stage; storming, the conflict that results as people begin to assert themselves; norming, the 'settling down' stage, as roles, behaviours and working methods are agreed; and performing, 'getting down to work'.
- Pitfalls:** This can be confusing: make sure you get the terminology right, because it is solid territory for exam questions.
- 27 B **Rationale:** The IASB has this as a key objective. The ASB issues Financial Reporting Standards in the UK. The EU is interested in harmonisation of standards, but does not have global jurisdiction.
- Ways in:** You should have been tipped off to the international element by the word 'global'. Combine that with 'accounting standards' and you could take an educated guess at the correct answer, if you had to.
- 28 D **Rationale:** The correct answers are: Membership is voluntary; Tasks are not assigned by management; Communication is open and informal.
- An organisation can be described as a collection of groups both formal and informal.
- Pitfalls:** It is important not to underestimate the importance of groups within an organisation. *Elton Mayo* first established this point through the Hawthorne Experiments.
- It is also important to remember that there are alliances and power structures that exist within an organisation, other than those documented in an organisational chart.
- 29 D **Rationale:** The correct answers are: Agree goals in advance and prepare a focused agenda and ensure people stick to it.
- Ensuring meeting goals are agreed before the meeting and producing an agenda based around achieving the agreed goals should ensure attendees are fully aware of the meeting purpose.
- 30 B **Rationale:** There are drawbacks to linking appraisal to salary review, not least that there may not be enough money to reward the employee for his performance.
- 31 C **Rationale:** Demand would be raised because firms and households would have more money (after tax) for consumption or saving/investment. The increased expenditure would not be covered by revenue from taxation, so the change would be financed by a higher PSNCR (borrowing mount).
- Pitfalls:** You have to be able to think through all the permutations of fiscal and monetary policies and their impacts on the economy and (where relevant) business decision-making.
- 32 B **Rationale:** Lateral communication is between those of equal rank.
- 33 A **Rationale:** The principle of due care is that, having accepted an assignment, you have an obligation to carry it out to the best of your ability, in the client's best interests, and within reasonable timescales, with proper regard for the standards expected of you as a professional. In this scenario, any answer you give on the spot would risk being incomplete, inaccurate or out-of-date, with potentially serious consequences, if the client relies and acts on your reply. Integrity is honesty, fair dealing and truthfulness; professional behaviour is upholding the reputation of your profession; and confidentiality is not using or disclosing information given to you by employers or clients in the course of your work. (None of these issues applies directly here.)
- 34 B **Rationale:** Experiential learning is 'learning by doing', usually involving self-managed learning by reflection, planning and adjustment. Action learning is classed as on-the-job learning, because it involves real work problems and groups. Option D is just a distractor.
- 35 A Ethical relativism
- 36 C **Rationale:** Ethics are 'moral principles': all the other options set behavioural guidelines of a different sort.
- 37 D

- 38 C **Rationale:** Paying suppliers' invoices would be a function of the accounts department, once the purchasing department has authorised the invoices for payment. You may have hesitated over option D, but evaluating potential suppliers is a key element in supplier appraisal and selection, not a finance matter. (However, in some companies the finance department would do the supplier appraisal because of their technical skills or knowledge but this is not the norm.)
- 39 B **Rationale:** These are the external factors which impact the business.
- 40 C **Rationale:** Strengths and weaknesses are internal.
- 41 B **Rationale:** The IFAC code is now administered by the IESBA. The ACCA code of ethics is based on the IFAC code. FATF (Financial Action Task Force) promotes policies to combat money laundering.
- 42 C **Rationale:** Options A, B and D relate to the 'control environment' which embraces the overall organisational and cultural context of control. Options A, B and D were highlighted as aspects of a strong control environment in the Turnbull report.
- 43 A **Rationale:** You can take advantage of personal work patterns, which include times of high energy and focus as well as low. The other options all expose you to the demands of other people, which may be harder to manage.
- 44 B **Rationale:** A transactions audit aims to detect fraud and uses only substantive tests. Operational, efficiency, management or value-for-money audits basically monitor management's performance throughout all the activities of the organisation.
- 45 C **Rationale:** Lateral (or horizontal) communication flows between people of the same rank, in the same section or department or in different sections or departments.
Ways in: Hopefully you would have been able to disregard option A as 'downward' suggests communication from superior to subordinate.
- 46 D **Rationale:** The professional qualities are: independence, accountability, scepticism and social responsibility.

SECTION B

- 1 (a) (i) C Negotiation often occurs before a decision is taken
- (ii) B The manager provides information on behalf of the organisation to interested parties.
- (iii) B Managers disseminate relevant information to subordinates.
- (iv) A A chief executive spends time representing the company at conferences, dinners etc.
- (v) A Some managers spend a significant amount of time meeting peers rather than their subordinates.
- (vi) C A manager has to make decisions when there has been a deviation from the plan.
- (b) (i) False A supervisor spends time doing technical or operational work.
- (ii) True
- 2 (a) (i) C A matrix structure encourages flexibility of people

Date: _____

How have you used this Practice & Revision Kit?

(Tick one box only)

- On its own (book only)
- On a BPP in-centre course _____
- On a BPP online course
- On a course with another college
- Other _____

Why did you decide to purchase this Practice & Revision Kit? (Tick one box only)

- Have used complementary Interactive Text
- Have used BPP Texts in the past
- Recommendation by friend/colleague
- Recommendation by a lecturer at college
- Saw advertising
- Other _____

During the past six months do you recall seeing/receiving any of the following?

(Tick as many boxes as are relevant)

- Our advertisement in *ACCA Student Accountant*
- Our advertisement in *Teach Accounting*
- Other advertisement ____
- Our brochure with a letter through the post
- ACCA E-Gain email
- BPP email
- Our website www.bpp.com

Which (if any) aspects of our advertising do you find useful?

(Tick as many boxes as are relevant)

- Prices and publication dates of new editions
- Information on Practice & Revision Kit content
- Facility to order books
- None of the above

Have you used the companion Interactive Text for this subject? Yes No
